1. Overview

1.1. Purpose of Document

The purpose of this guide is to provide an overview of user guidance and the configuration associated with the *Overlapping Warnings* feature. Items covered include:

- Overlapping warnings configuration
- Dashboard configuration
- Security configuration
- Viewing overlapping warnings

1.2. Overview of Feature

Overlapping Warnings display during the actioning of employee *Leave Requests*, alerting the approver at the approval/rejection stage. This feature alerts approvers if a *Leave Request* overlaps with:

- An absence or approved *Leave Request* for another employee in the approver's remit.
- An un-actioned request for another employee in the approver's remit.
- A previously rejected request for the same employee.

Note:

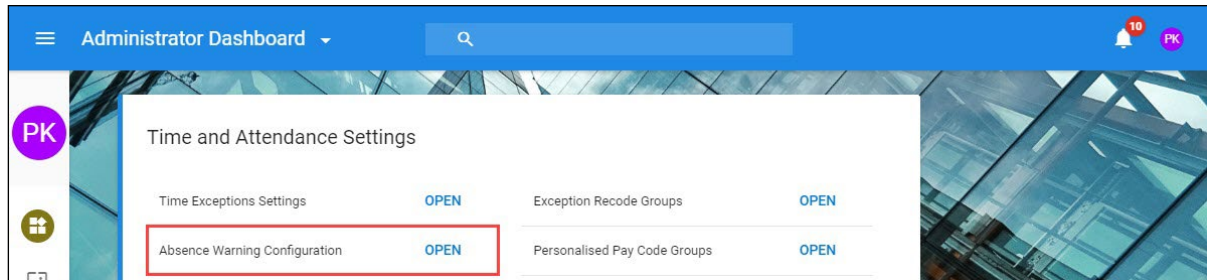

- This feature provides a warning to the approver only, to be taken into consideration. However, does not prevent the approver from approving/rejecting the *Leave Request*.
- Warnings for 'Sick' absence are only displayed when it is submitted for manager approval, not when it is directly entered on the employee record. This means that the warnings are only triggered if the absence request goes through an approval process. Therefore, warnings are not triggered if absence is directly entered for the employee without approvals.

For further information on general *Leave Requests*, view [Leave Requests & Absence](#) user guide on CoreHR University.

2. Overlapping Warnings Configuration

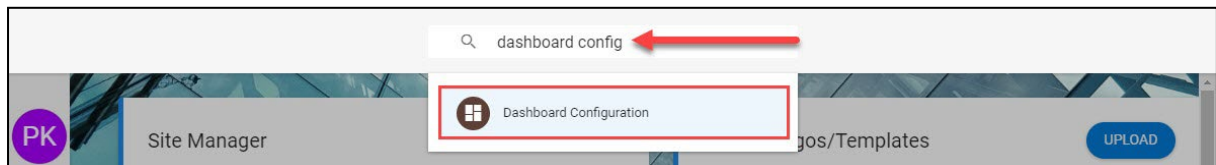

2.1. Dashboard Configuration

The *Absence Warning Configuration* screen is available via the *Time and Attendance Settings* widget shown below. By selecting *Absence Warning Configuration*, a pop-up screen displays where warnings are configurable.

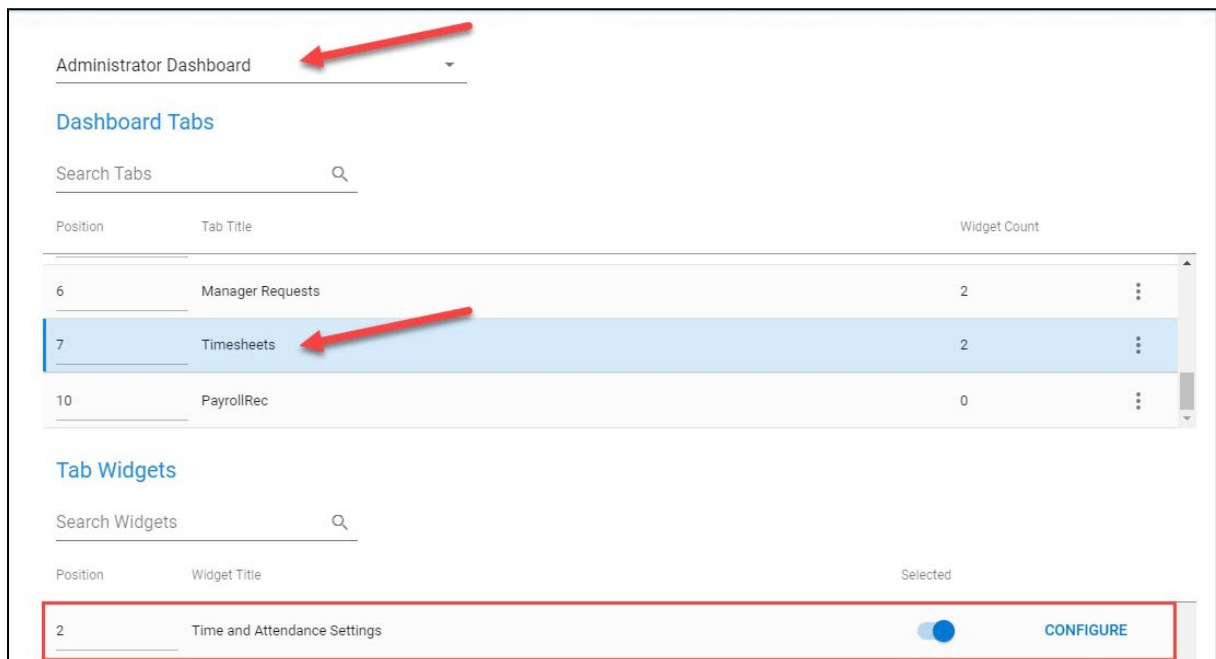

To make this available, add the *Time and Attendance Settings* widget to the applicable dashboard. To add this widget:

1. Quick Jump to Dashboard Configuration.

2. Select *Administrator Dashboard*.
3. Select the required tab.
4. Ensure the *Time and Attendance Settings* widget is **Selected**, as highlighted below.

2.2. Security Configuration

To ensure you have access to the *Time and Attendance Settings* widget, and the *Absence Warnings Configuration* option, add the below required *Menu Options* to the applicable *Menu Profile*.

Menu Option	Access to
CorePortal – Time and Attendance Settings	Time and Attendance Settings Widget
Absence Warning Configuration	Absence Warning Configuration Tile/Screen

2.3. Warnings Configuration

The *Absence Warnings Configuration* screen provides the option to enable/disable warnings based on a number of overlapping request scenarios. Configuration here is applied to all users, not single user profiles, therefore this is a global setting.

To configure warnings from the *Absence Warning Configuration* screen:

1. Quick Jump to the *Time and Attendance Settings* widget.
2. Click **Open** on *Absence Warning Configuration*.

The *Absence Warning Configuration* screen displays.

SAVE

The below table details each indicator on the *Absence Warning Configuration* screen.

Warnings when overlapping with requests		
1	Overlaps with a rejected request	This indicator switches ON/OFF <i>Rejected Request Overlap</i> warnings. Approvers will be warned if any type of leave requested had been rejected previously for the dates.
2	Different absence type/pay code	If this indicator is ON, a warning is only displayed if there is an overlapping rejected request for a different <i>Leave Type (Pay Code)</i> to the leave request currently under review. If this parameter is switched ON, the above parameter 1 must also be switched ON.
3	Absence Types/Pay Codes	This indicator controls if this warning applies to all <i>Leave Types (Pay Codes)</i> or only a specified list of <i>Leave Types</i>. The drop-down lists <i>Personalised Pay Code Groups</i>. - If this field is left blank, this warning applies to all <i>Leave Types</i>. - If a <i>Personalised Pay Code Group</i> is specified, then the warning only applies to requests for <i>Leave Types</i> within the group. Examples If a <i>Personalised Pay Code Group</i> is selected, only containing 'Annual Leave' and 'Innovation Day' <i>Leave Types</i> then: Example 1: If an employee requests 'Annual Leave', the approver is warned if it overlaps any instance of team leave (regardless of <i>Pay Code</i>). Example 2: If an employee requests 'Sick Leave', then the approver is not warned if it overlaps any instance of team leave.
Overlaps with a team absence-unactioned request		
4	Absence overlap	If this is ON, a warning is displayed if there is an overlapping absence request with the employee's colleagues booked absence.
5	Unactioned Request overlap	If this is ON, a warning is displayed if there is an overlapping absence request with the employee's colleagues. Regardless of the colleague's absence already being approved or not.

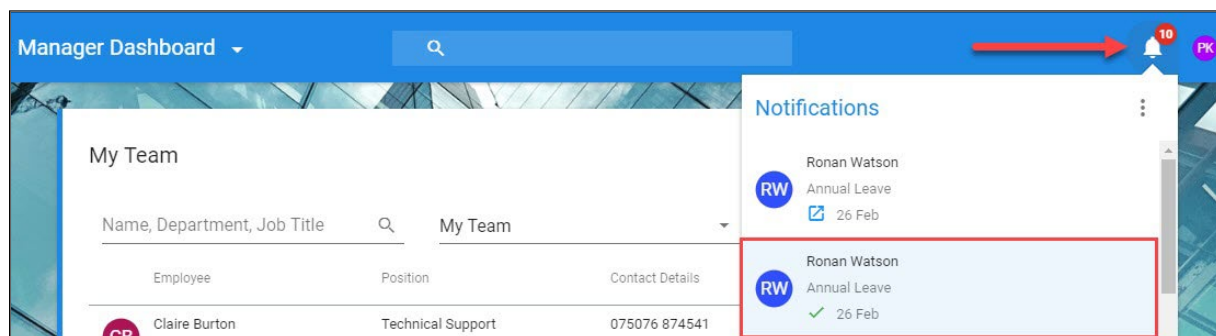

3. Viewing Overlapping Warnings

3.1. Accessing the My Approvals screen

Overlapping Warnings are displayed to the approver on the **Action** item, on the *My Approvals* screen.

To access the *My Approvals* screen:

1. Click the *Notification*  button.
2. Click on an *Action*  item.

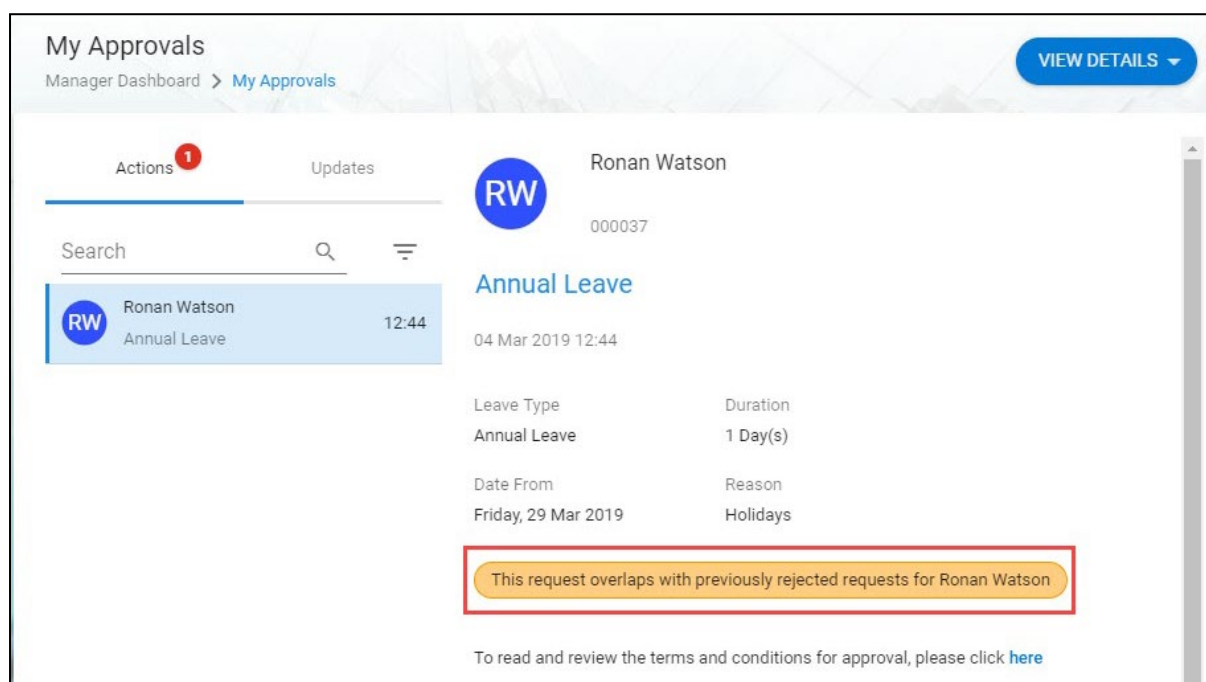

Note: It is also possible to access the My approvals screen from My Approvals Notifications widget. View the Leave Requests and Absences User Guide (Correct Link TBC) on CoreHR University for further information.

The *My Approvals* screen opens on that item within the **Actions** list

Allowing you to complete the required actions. For example: **Approve** and/or **Reject**.

Overlapping Warnings display here, if applicable to the *Leave Request*, as highlighted below.

Note: *Overlapping Warnings* for 'Sick' absence and previously rejected 'Annual Leave', are only displayed when leave is submitted for manager approval, not when it is directly entered on the employee record. This means that *Overlapping Warnings* are only triggered if the absence request goes through an approval process. Warnings are not triggered if absence is directly entered for the employee without approvals.

3.2. Overlapping Warning Examples

3.2.1. Rejected Request Overlap

In this scenario, an employee has submitted an 'annual leave' request for the same date as an earlier 'annual leave' request that was previously rejected.

- The employee previously submitted an 'annual leave' request for Friday 29th March. This was rejected by the manager.
- The employee has now submitted a new 'annual leave' request for Friday 29th March.
- On the *My Approvals* screen, a warning is displayed to confirm that the 'annual leave' request overlaps with an earlier rejected request. If the employee submitted a 'sick leave' request, the below warning would also display.

The screenshot shows the 'Manager Dashboard' interface. The 'My Approvals' section is active, displaying a list of requests. A request for 'Ronan Watson' for 'Annual Leave' is highlighted. The details for this request are shown on the right, including the leave type, duration, date from, and reason. A warning message is displayed, stating: 'This request overlaps with previously rejected requests for Ronan Watson'. Below the warning, there is a link to read and review the terms and conditions for approval, and a checkbox for confirmation.

3.2.2. Team Absence Overlap

In this scenario, an employee has submitted an 'annual leave' request for the same date as an 'annual leave' booked by another employee on their team.

- The employee submitted an 'annual leave' request for Friday 29th March.
- On the *My Approvals* screen, a warning is displayed to confirm that the 'annual leave' request overlaps with another team member's booked leave.

3.2.3. Team Request Overlap

In this scenario, an employee has submitted an 'annual leave' request for the same date as an 'annual leave' booked by another employee on their team.

- The employee submitted an 'annual leave' request for Friday 29th March.
- On the *My Approvals* screen, a warning is displayed to confirm that the 'annual leave' request overlaps with another team member's requested leave.

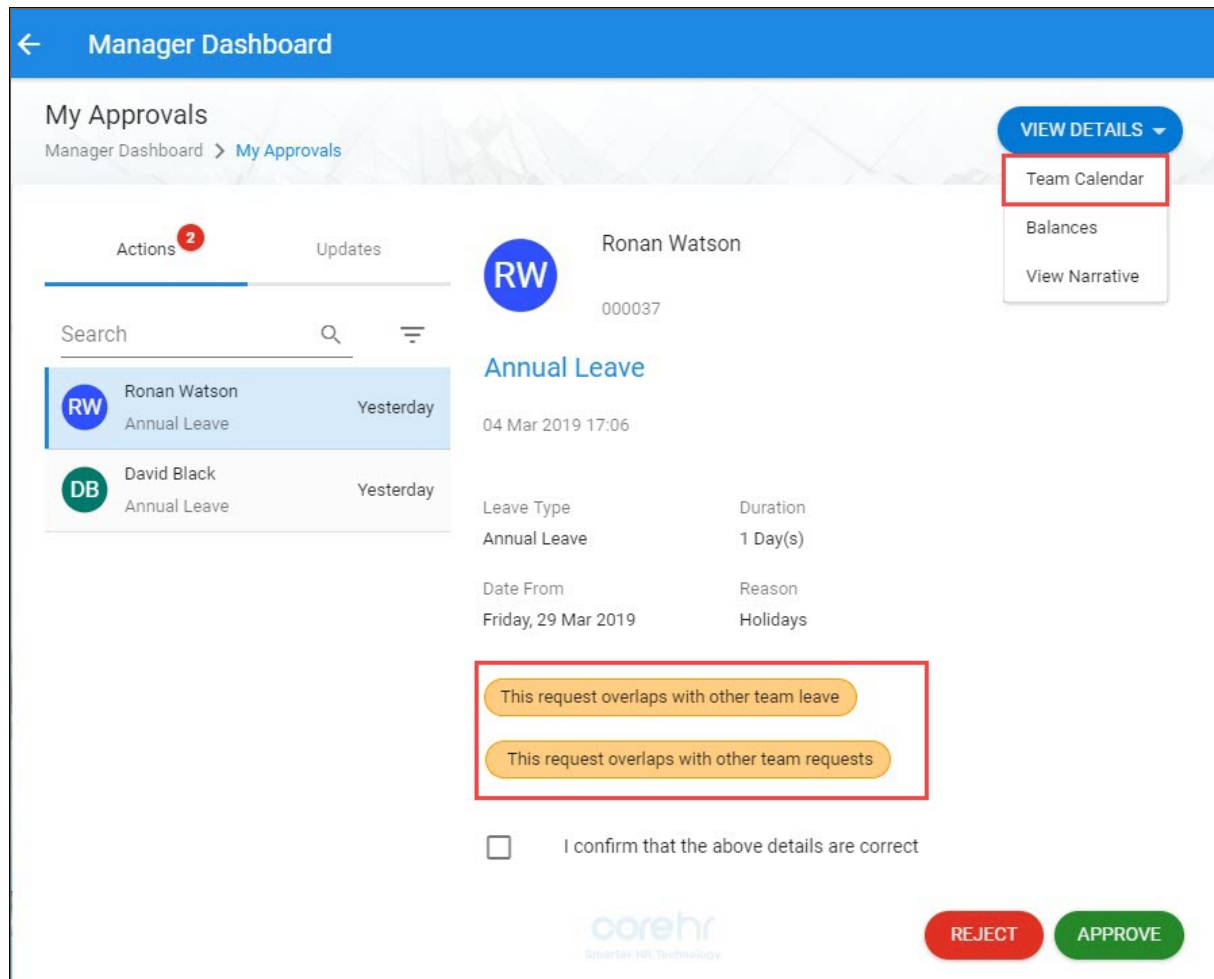

The screenshot shows the 'Manager Dashboard' with a 'My Approvals' section. On the left, there's a list of approvals for Ronan Watson (RW) and David Black (DB), both for 'Annual Leave' and marked as 'Yesterday'. The main area displays details for Ronan Watson's 'Annual Leave' request, submitted on 04 Mar 2019 at 17:06. The request is for 1 day(s) of Annual Leave, starting on Friday, 29 Mar 2019, for the reason of Holidays. A yellow warning box states 'This request overlaps with other team requests', with a red arrow pointing to it. Below the warning is a checkbox for 'I confirm that the above details are correct'. At the bottom right, there are 'REJECT' and 'APPROVE' buttons. A 'VIEW DETAILS' dropdown menu is open, showing 'Team Calendar', 'Balances', and 'View Narrative'.

Clicking on the **Team Calendar** button opens the *Team Calendar* screen. This screen shows the team schedule details of the absence that has been requested and/or booked by the other employees.

3.2.4. Team Absence & Request Overlap

In this scenario, an employee has submitted an 'annual leave' request for the same date as an 'annual leave' booked by another employee on their team.

- The employee submitted an 'annual leave' request for Friday 29th March.
- On the *My Approvals* screen, two warnings are displayed to confirm that the 'annual leave' request overlaps with team members requests/bookings.

Clicking on the **Team Calendar** button opens the *Team Calendar* screen. This screen shows the team schedule details of the absence that has been requested and/or booked by the other employees.

3.2.5. Rejected Request, Team Absence & Team Request Overlap

In this scenario, an employee has submitted an 'annual leave' request for the same date as an 'annual leave' request made, and 'annual leave' booked by other employees on their team.

- The employee submitted an 'annual leave' request for Friday 29th March.
- On the *My Approvals* screen, 3 warnings are displayed, indicating that this request overlaps with:
 - Another team member's request.
 - Another team member's booked leave.
 - A previously rejected request made by this employee.

REJECT **APPROVE**

Clicking on the **Team Calendar** button opens the *Team Calendar* screen. This screen shows the team schedule details of the absence that has been requested and/or booked by the other employees.

Note: The *Team Calendar* screen displays employees differently depending on whether the employee is a *Rostered* employee, or a *Time and Attendance* employee. The employees that appear on the screen are those that the manager is the leave approver for. This is driven off:

- Roster - Team Area access; **OR**
- Team Calendar - Org Role/Group access.

The *Team Calendar* only displays other employees who are in the same *Team Area* or *Org Role/Group* as the employee that has requested the leave. If the employee that has requested the leave is not in a *Team Area* or *Org Role/Group*, they are the only employee displayed.
