1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide an overview of the Pay Code Access Groups functionality.

It is intended for use by HR Administrators that manage the listings of Pay codes available to managers and employees when entering leave requests, absences and timesheets.

This guide includes:

- Pay Code Access Groups explained.
- How to access and create Pay Code Groups.
- How to assign Pay Codes Groups to Managers and Employees.
- How to configure Managers and Employees to have access to the correct codes.

1.2. What's new for version 28!

- In portal, Managers absence and timesheet entries can be linked to pay code groups assigned at employee level. The Manager input is reflective of pay code groups assigned to the employee and/or the employee appointment combination.
- Managers can be granted access to additional pay codes within the group that are marked as *manager only*.

1.3. About Pay Code Groups

Pay Code Groups can be used to tailor the list of pay codes returned to employee and managers when inputting and viewing data.

1.3.1. Employees

By default, all Pay Codes are returned to employees in the data entry *Timesheet Input* and *Leave Request* screens.

- Pay code lists can be tailored to selective pay codes through the use of Pay Code Groups.
- Pay Code Groups can be assigned to the employee and or the employees' appointment.

For further information on this see [Section 3](#)

1.3.2. Managers and Administrators

In the screens listed below, all Pay Codes are returned to managers and administrators by default. As required, pay code lists which are available can be tailored to selective pay codes using Pay Code Groups. For managers and administrators, the pay code grouping is assigned at Manager username/organisation role level , work groups level or the employees record. This last option is new for v28. For further information [see above](#).

Manager and Administrator input applies to the following screens:

- Timesheet Input
- Absence Details
- Time Exceptions
- Record Absence Details (back-office)
- Maintain hours (back-office)

For further information please see [Section 4](#)

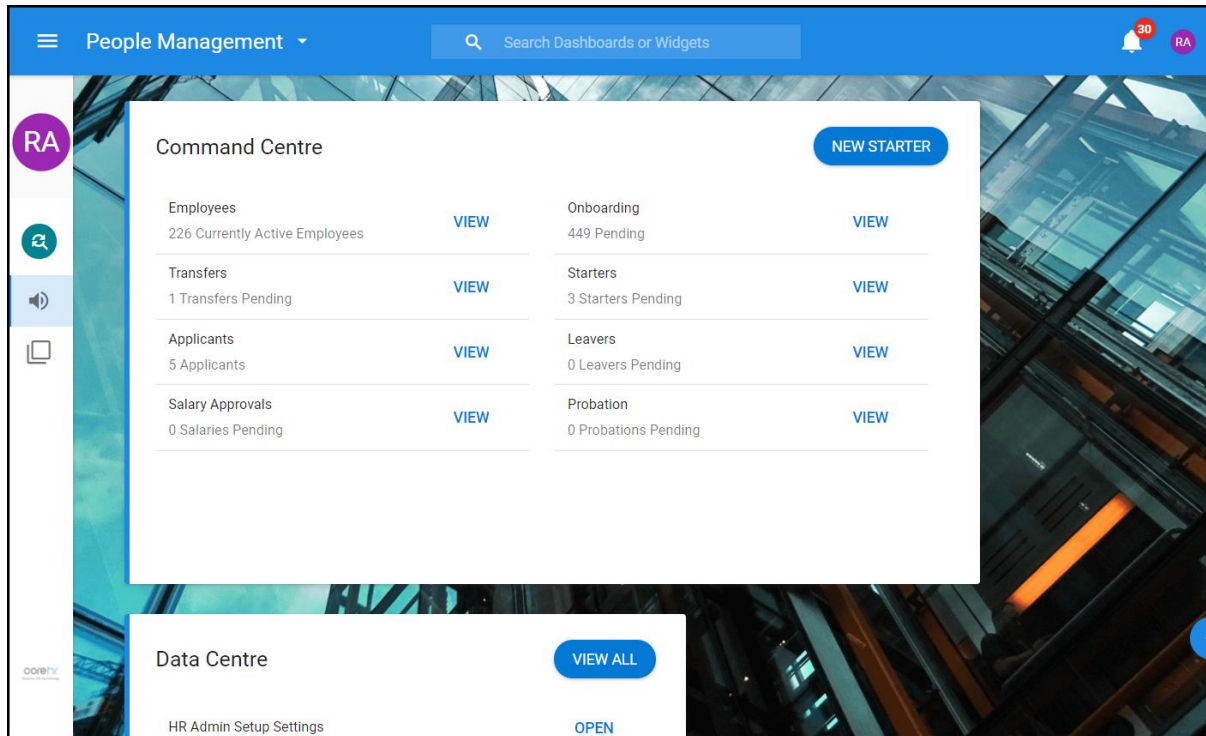

2. Pay Code Groups

2.1. How to access Pay Codes Screens

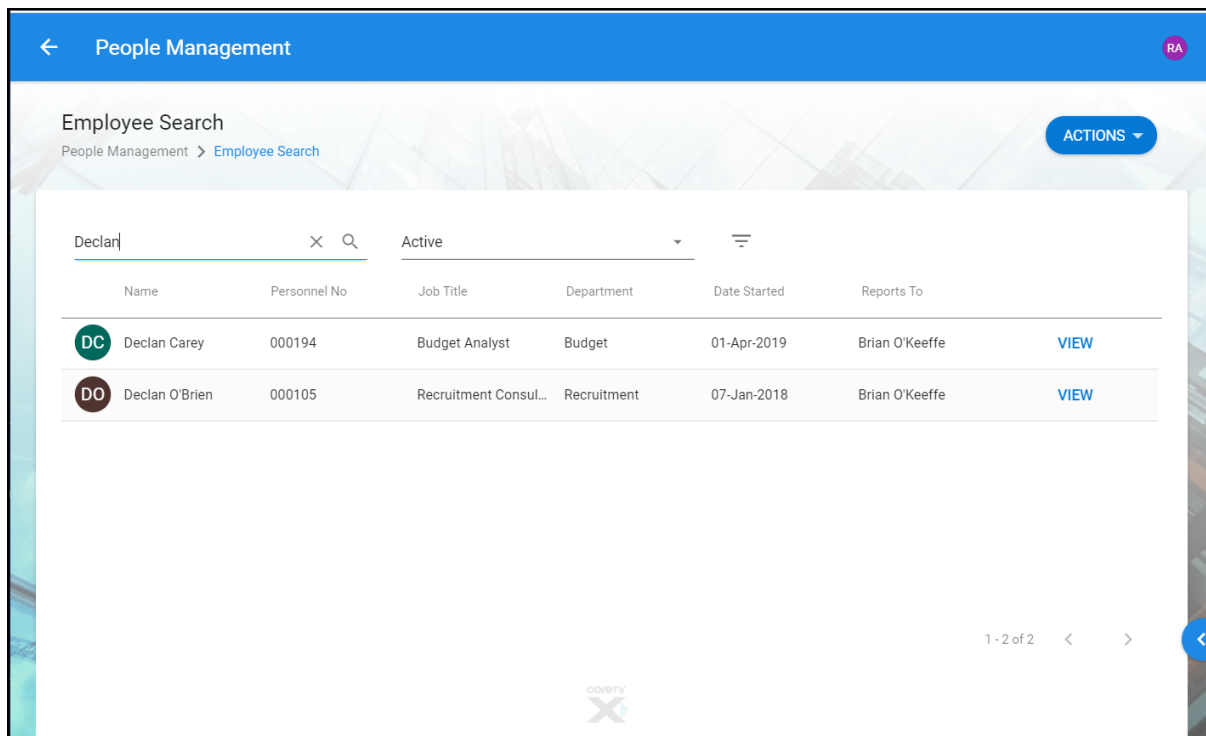

*Personal Pay code screens are accessed either via the *Manage Pay Code* Screen or by using the *WFM Data Configuration Centre*.*

2.1.1. Accessing Pay Code Groups/Manage Pay Code Group screen

1. Quick Jump to *People Management*.

2. Go to Employees and Select **View** having chosen the specific Employee.

3. Click **Pay Code Access Group** in the left-hand column.

Employee Search

3. Assigning Pay Code Groups for Employees

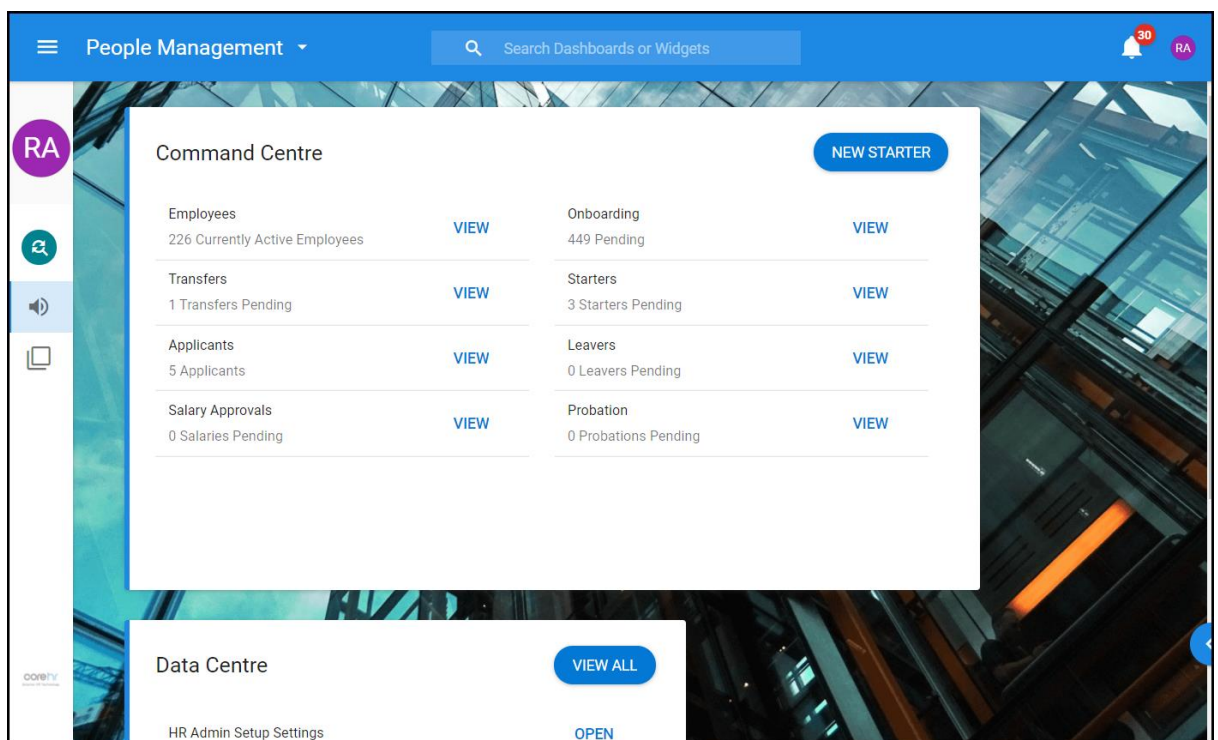

3.1. Employee Level.

Pay Code Groups can be assigned at person level or appointment level.

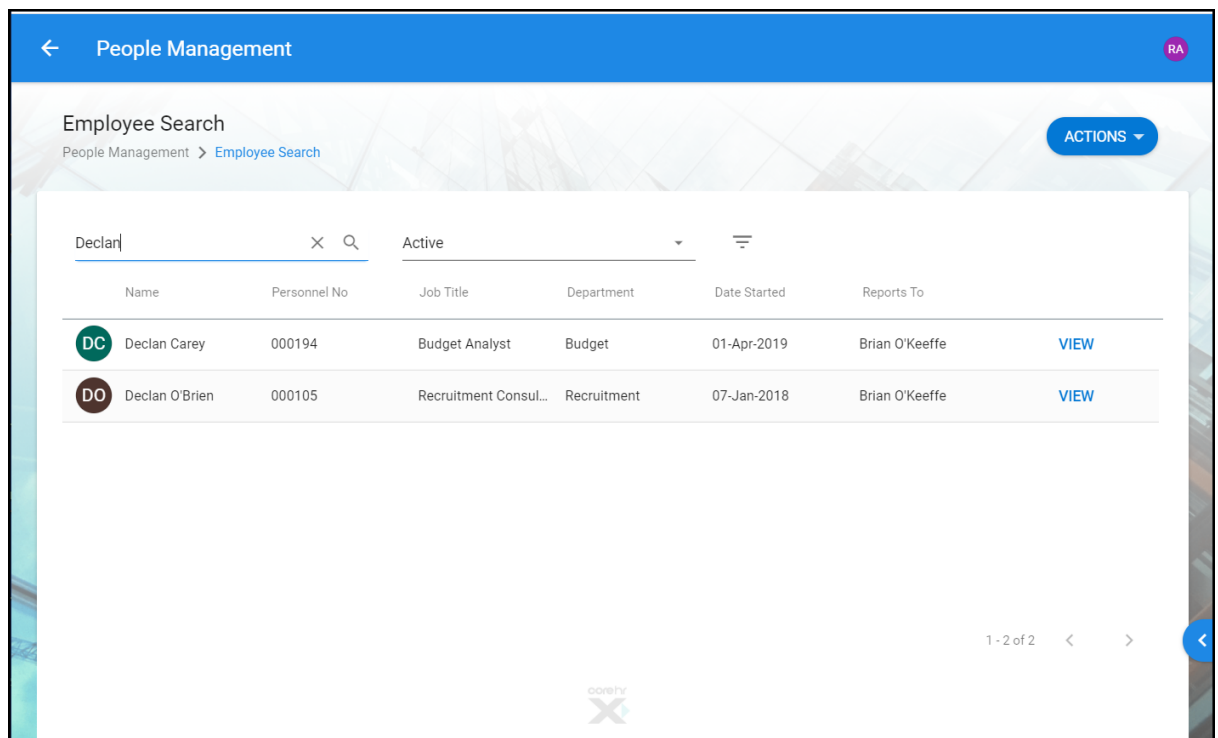

3.1.1. By Person & Appointment

To access the screen:

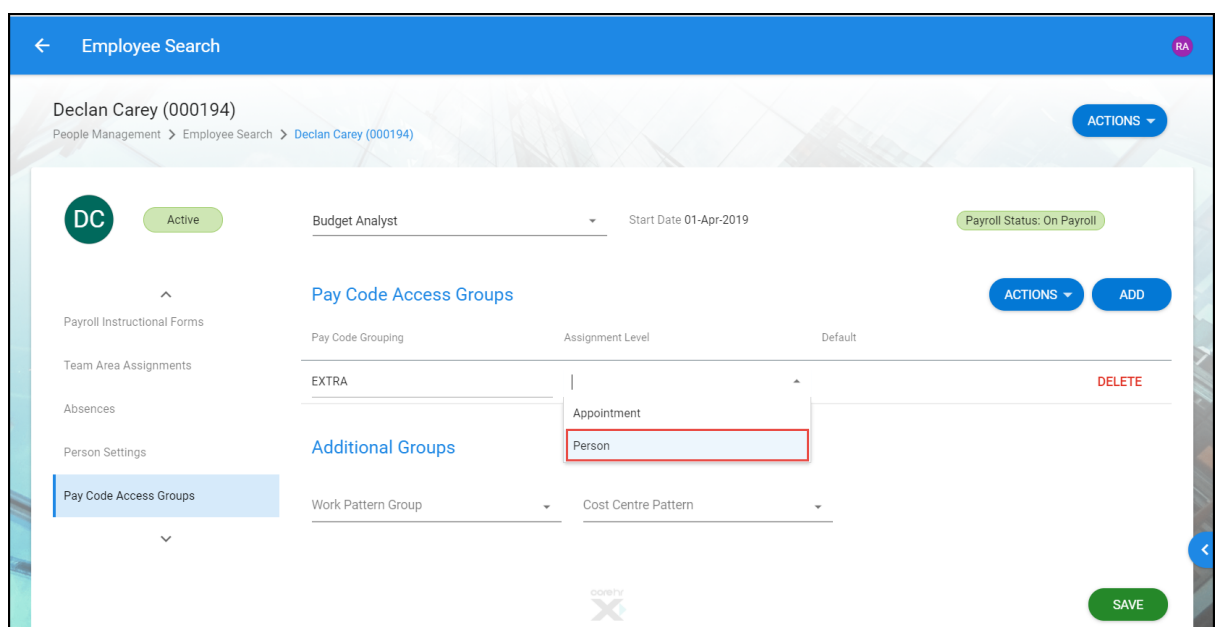

1. Quick jump to *Command Centre* widget on the *People Management* screen.

2. Go to **Employees** using the search facility and find relevant employees.
3. Select **View**.

4. Scroll down to **Pay Code Access Groups** on the left-hand column which displays the Pay Code Assignment Screen.

5. Click **Add**. Select the **Pay Code Access Group**.

6. Select the desired assignment level column i.e. Person or Appointment. Groupings assigned at the *Person* level will be for all the employee's Appointments unless a grouping is assigned to an Appointment. Groupings assigned at the appointment level override the Person Level for the Appointment being viewed.
7. Upon saving, the default indicator will update to Y to indicate which is the default grouping used for the person or person/appointment combination.

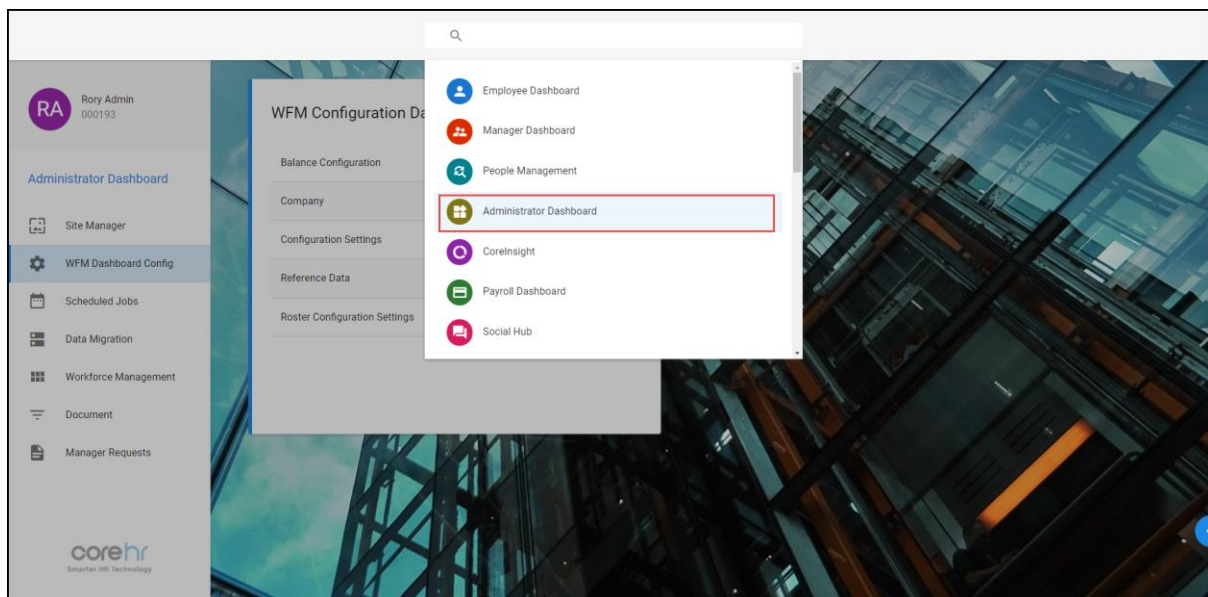

Note: At the employee level, multiple pay code groups can be assigned

3.1.2. Link Employee Leave Requests to their Pay Code Group

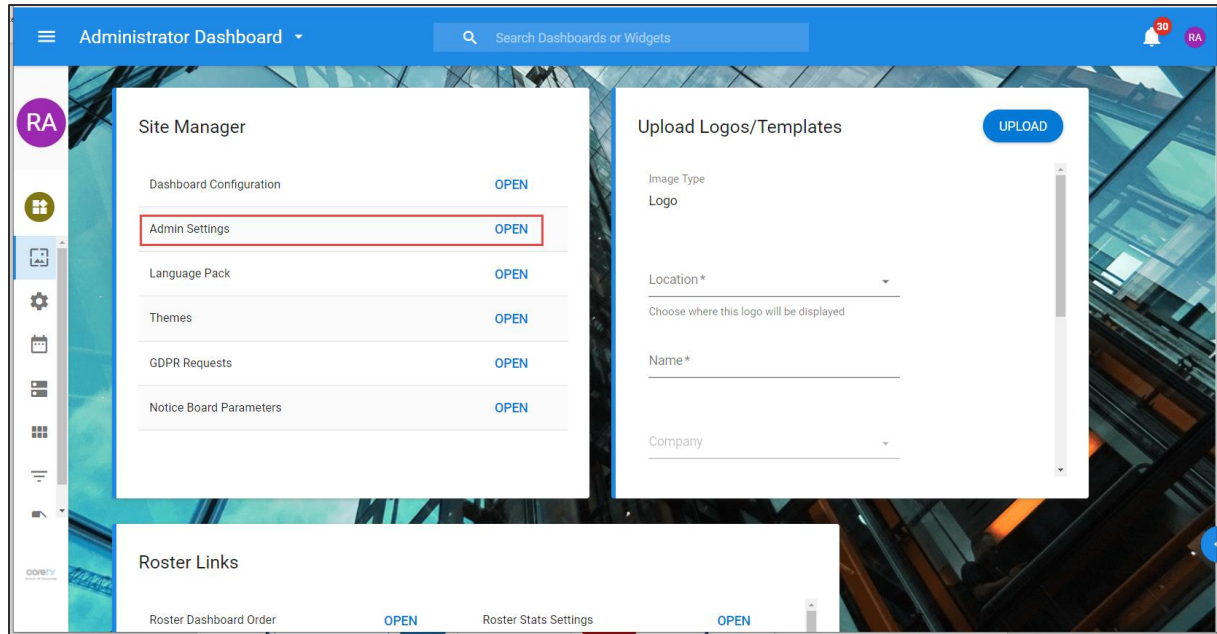

If you wish to limit leave requests, this is controlled by a CorePortal parameter. This step is optional.

To update the parameter, complete the following:

1. Quick Jump to *Administrator Dashboard*.

2. Select **Admin Settings**.

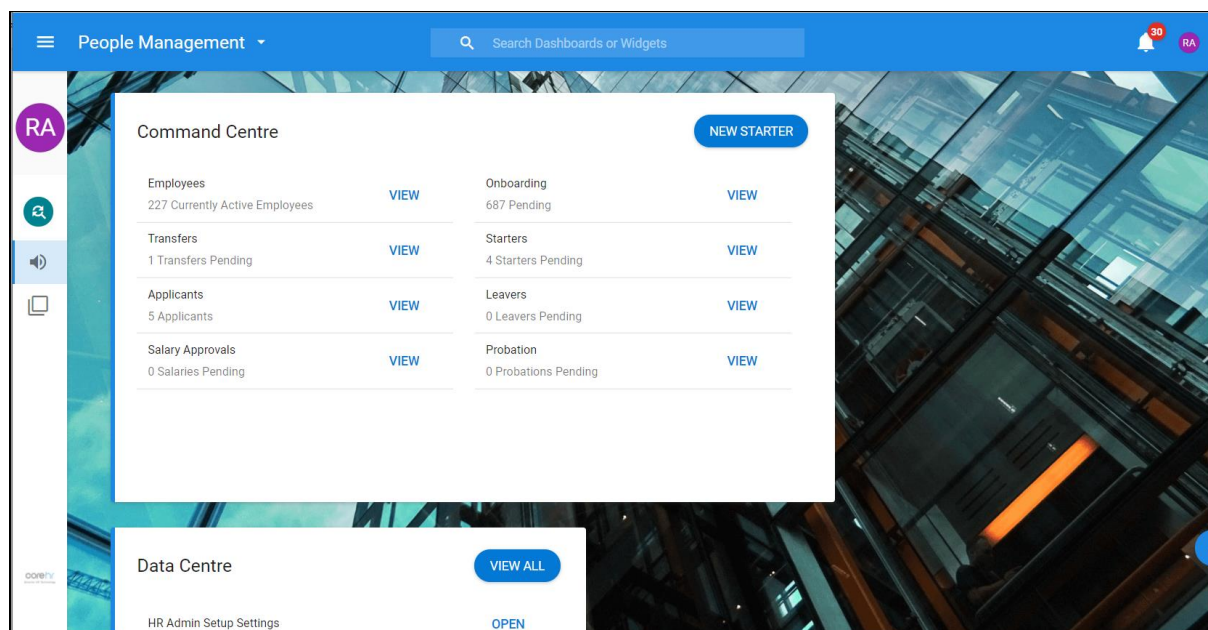

:

In CorePortal Parameters, search for Personalised Pay Code groups with the parameter code called **ct_lr_personalised_codes**

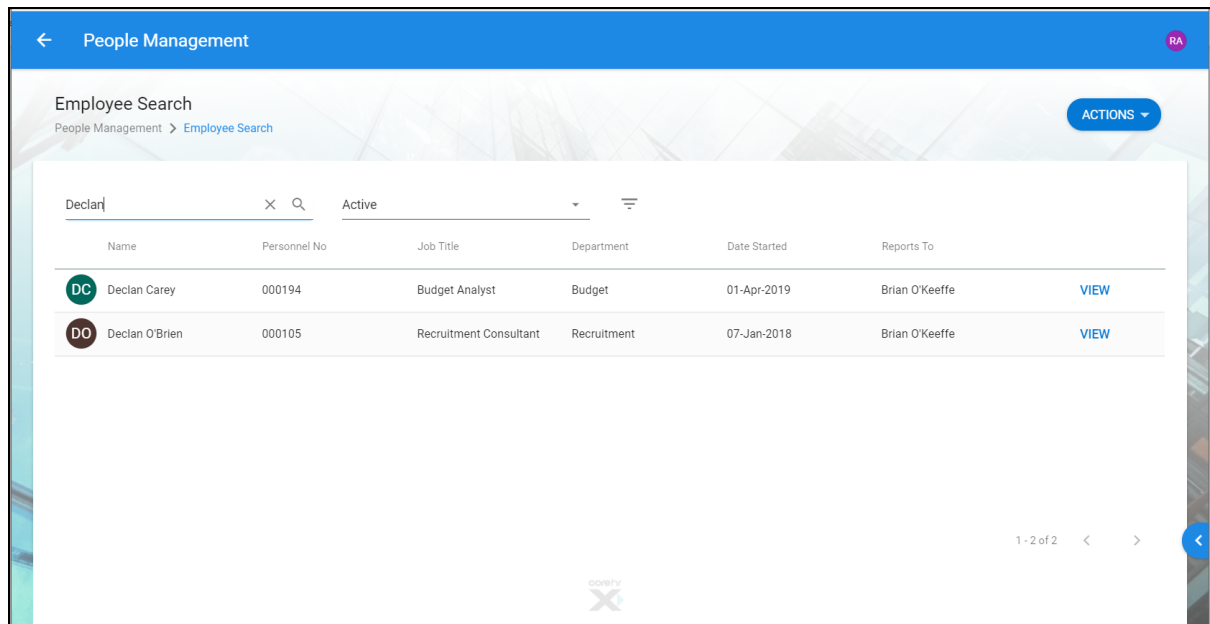

3. Click **Edit**.
4. Update the parameter with the required value:
 - a. Set to **Y** to limit the leave request which the employee can see.
 - b. Set to **N** to ensure the code is not limited.
5. Click **OK** to save.
6. The Parameter successfully updates.

3.1.3. Deletion of Pay Code Group Assignments

1. Quick jump to *People Management*.

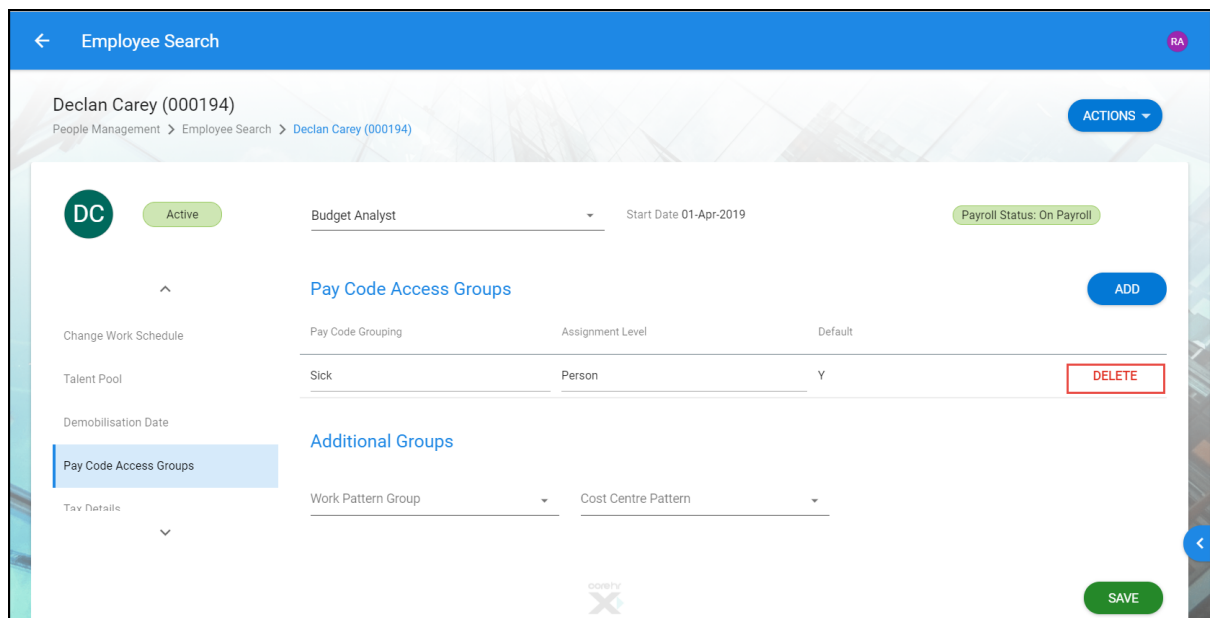

2. In command centre click **View** after the Employees section.

3. Search for the relevant employee.

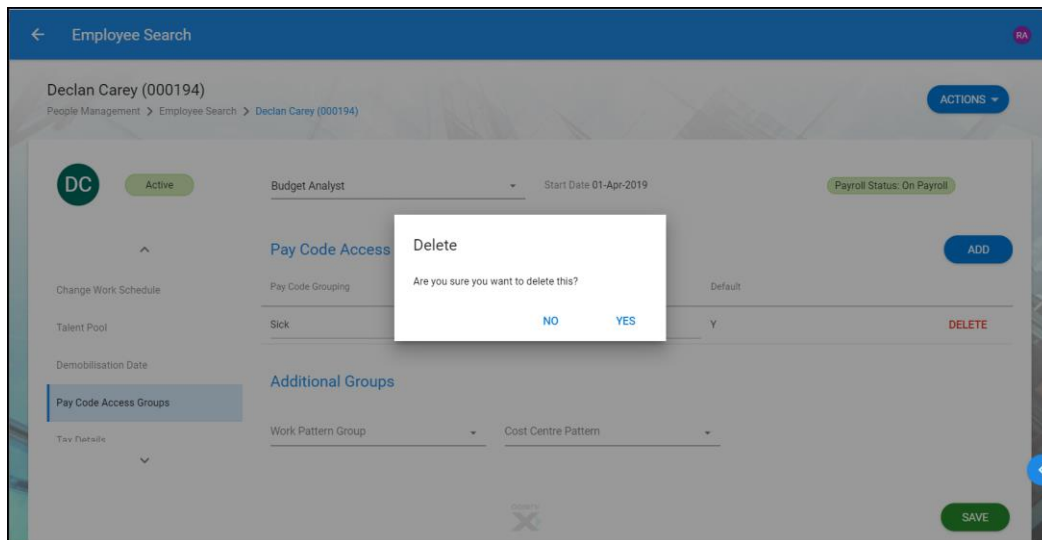

4. Click **View**.

5. You see the Pay Groups which they have access to listed under Pay Code Grouping and Appointment Level.

6. Click **Delete**.

7. You will then receive a warning.
8. Select **Yes**.

9. Click **Save**

4. Assigning Pay Code Groups to Managers and Admin

In both Timesheet Entry and Absence Entry, the Pay codes lists which return to manager and employees can be limited through use of pay codes groups. Pay code groups are assigned to Managers either by System users or Work Groups. In these cases, the system user level configuration takes precedence over the work groups level.

The default manager configuration is:

1. No Pay Code Grouping applied

- In this case there are no limits applied and all pay codes are returned.

2. System User Level/Organisational Role

- Pay Code groups which are assigned at System User/Organisational roles level take precedence over the Work Groups.
- Within site settings, the *Manager Before Org Roles Access* decides if an Organisation role or Username take precedence.

 **Note:** The setting *Manager Before Org Roles Access* setting applies to all indicators set within System Users > Access Privileges section.

3. Employees Work Group

- The personalised groups assigned to an employee's work group dictates codes. As an example, If a manager has employees in various work groups, the list of pay codes available will also vary.

V28 Enhancements:

Managers Portal Absence Entry and *Timesheet Entry* link to the pay code groups assigned at the employee level.

- If the configuration is set, this **overrides** the three examples above i.e, the pay codes listed are dictated by the groups assigned to the employee records.
- If an employee has no pay code grouping assigned, the system defaults back to whichever one of the options explained above is set as the default.

 **Note:** Linking Manager Input to Employee Pay Code Groups only applies to Portal Screens.

4.1. Username / Organisational Role Level

The username field supports username or organisation roles entry e.g. Line Manager.

Where it is applied at system user level, the manager or administrator entry is restricted to the grouping that is assigned to their username or organisational role. This applies to the following screens:

- *Portal Timesheet Input & Absence Entry.*
- *Back-Office Maintain Hours & Record Absence Details*

The screenshot shows the 'System Users' configuration window. At the top, there are fields for 'Access Type' (Manager Self Service), 'Username' (7266000057), 'Company' (7266, T&A Company), and 'Person' (7266000057, Matthew Aarden). There are checkboxes for 'Active' and 'Visually Impaired', and a 'Generate Timesheets' dropdown set to 'No'. On the right, a 'Select Detail' menu is open, showing 'Access Details', 'Access Privileges' (highlighted), 'Roster Privileges', and 'Form Options'. Below this is the 'Access Privileges' section, which contains a grid of checkboxes for various permissions. At the bottom left, there are fields for 'Pay Code' and 'Access Group', which are highlighted with a red box. At the bottom right, there is a 'Display LOV Columns' section with radio buttons for 'As Is', 'Code - Description', and 'Description - Code'.

To configure, complete the following steps:

1. Connect to the Back Office.
2. Navigate to System Users. Here you see the menu option location is Core time > System Params> System Users >
3. Enter the Username or Organisation roles name.
4. Select **Access Privileges** within **Selection Details** on the right-hand side of the screen.
5. Enter the required Pay Code Access Group located on the bottom left of the screen

Note: Advanced configuration supports a precedence order. You can have the order of username overriding organisational role or the other way around.

4.2. Work Group Level

Where Pay Code Groups are recorded at work group level, the manager's available pay codes list is based on groupings assigned at the employees work group.

The screenshot shows the WFM v28 configuration interface. The 'General Details' section includes fields for Work Group (BR01), Company (7266), Holiday Scheme (PH01), Shift Type (REST), and Default OT Pay Code. The 'Group Codes' section includes fields for Non-Payroll Code, Personalised Pay Code Group (highlighted with a red box), Cost Centre Pattern, and Work Pattern Group. A 'Select Details' dropdown menu is also visible on the right.

Example:

A manager inputs data for employee 001. The list of codes returned is based on the ABC group codes assigned to the employee work group. This comprises of Basic, Commission and Extra Hours.

Employee	Employee's Work Group	Pay Code Group	Pay Codes in the group
001	Sales	ABC	Basic, Commission, Extra hours
002	Prod	XYZ	Basic, Overtime1.5, Overtime 2.0

4.2.1. Configuration

1. Connect to the Back Office
2. .
Navigate to *Work Groups*. The menu option location is Core time > Params> System Params > Work Groups.
3. Enter the Work Group code and select **Group Codes** within the Selection Details on the right-hand side of the screen.
4. Enter the required Pay Code Access Group in the **Personalised Pay Code Group** field.

4.3. Limit Manager Input to Employee's Pay Code Groups

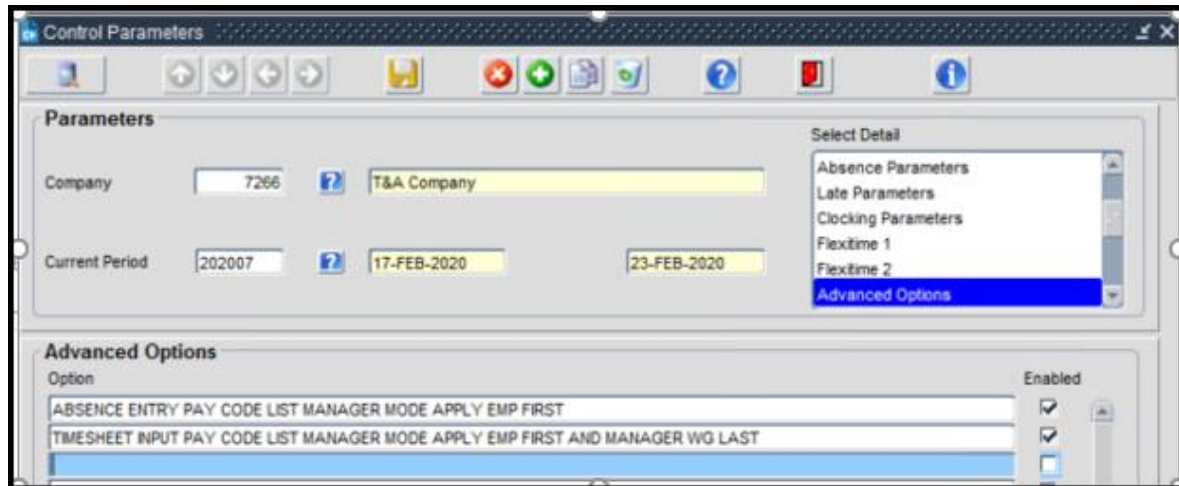

Through advance configuration, portals Timesheet Input and Absence entry screens can be linked to the Employee's Pay Code grouping. In addition:

- Managers can now enter additional pay codes such as sickness, which are for **manager use only**. This is supported by a new indicator setting.

4.3.1. Step One: Switch on Advanced Options

To link a Managers Absence Entry and/or Timesheet Input to the pay code groups attached to Employees, please complete the following steps:

Option	Parameter
Absence Entry	ABSENCE ENTRY PAY CODE LIST MANAGER MODE APPLY EMP FIRST
Timesheet Input	TIMESHEET INPUT PAY CODE LIST MANAGER MODE APPLY EMP FIRST AND MANAGER WG LAST

1. Connect to the Back Office.
2. Navigate to Control Parameters. The menu option location is Core time > Params> System Params > Reference A-C > Control Parameters.
3. Enter the company number and within the Selection Details on the right-hand side of the screen.
4. Scroll down and click on **Advanced Options**.
5. In the Advanced Options section at the bottom of the screen, scroll down and click on **Advanced Options**.
6. If entries exist, click the + button located at top of the screen. This will input a new blank line. Enter the following text in uppercase letters.
7. ABSENCE ENTRY PAY CODE LIST MANAGER MODE APPLY EMP FIRST
8. TIMESHEET INPUT PAY CODE LIST MANAGER MODE APPLY EMP FIRST AND MANAGER WG LAST.

4.3.2. Step Two: Decide which codes are for Manager Only Input

On the Pay Code Table there is a column which indicates which Pay code is considered **Manager Only**

- On the Pay code table, a new MANAGER_ONLY column is available to indicate which pay codes are intended for Manager only input.

- To identify Manager only pay codes, contact an XD consultant with a list of Pay Code numbers and names
- Managers Input can be linked/restricted to pay code groups that are assigned to Employees.
- Pay codes marked as *Manager Only* which are assigned to employee's pay code groups are not returned to Employees.

Note:

Pay Code Groups assigned at Employee or Employee/Appointment level limit pay codes returned to the Employees.

To create Pay Code Groups, see [Section 2](#).

4.3.3. Step Three: Assign the Pay Code Groups
