1. Overview

1.1. Purpose of the Guide

The purpose of this guide is to introduce the Work Groups landing page and its affiliated screens. The Work Group configuration screen is now available via Portal on the *WFM Admin Dashboard* and replaces the back office *Work Group Configuration* Screen.

This guide aims to show you through the menu options and webservice used to configure the screens on the system.

Work Grou...	Description	Company	Holiday Schemes	Shift Types	Timesheets	Calendar	Label	Active People	Active
1	Default Workgro...	Default Company	Public Holiday S...	35hrs - 7 Hrs Mt...	Live Timesheets	Weekly		48	☒
A1	Branch Office 2	Default Company	Public & Univers...		Live Timesheets	Monthly		9	☒
BOK	Brian - University	Default Company	University Holid...	35hrs - 7 Hrs Mt...	Live Timesheets	Weekly		48	☒
CEO	Ceo	Default Company	Company Holid...	37.5 Hrs - 7.50 ...	Live Timesheets	Monthly		5	☒
FIMU	Finance	Default Company	Company Holid...	37sot	Live Timesheets	Monthly		7	☒
FIN1	Accounts	Default Company	Company Holid...	37sot	Live Timesheets	Monthly		34	☒

1.2. Screens

As well as going through the Work Groups landing page, this guide covers the following screens.

For Further information on these see [Section 3 Screens and Tabs](#)

- General Parameters
- Payment Rules
- Default Payroll Hours
- Group Codes
- Trigger Points
- Extra Hours Recoding
- Absence Contract Days
- Advanced Config

2. How to Use Workgroups

2.1. Configuring Workgroup screen

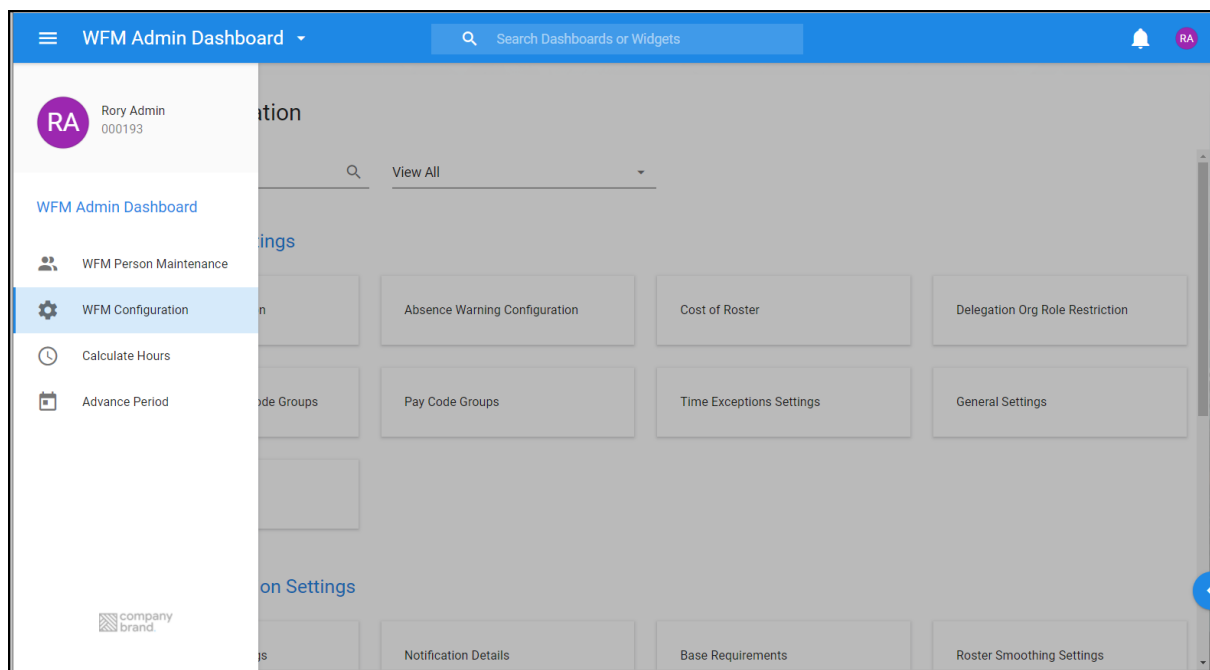

There is a default configuration menu option which allows you to configure all of the screens once it is activated. This means you do not need to individually turn on the other menus.

Screens	Menu Option
Workgroups	workgroup_config_access

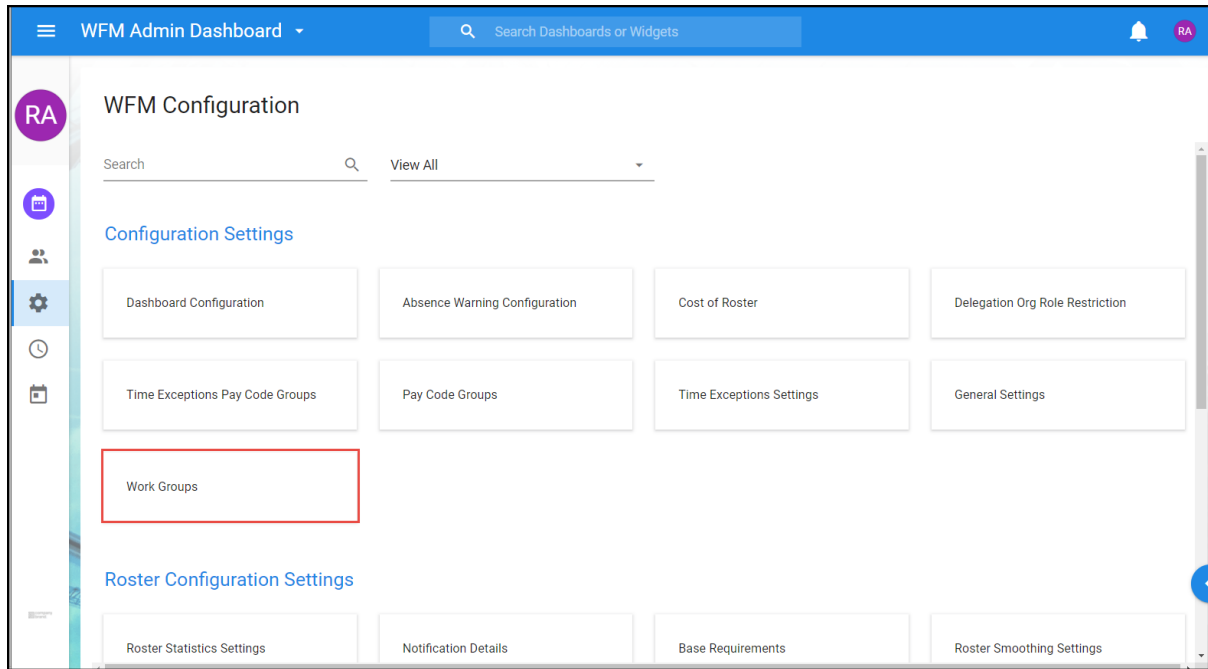

2.2. Accessing the Work Group Screen

To access the workgroup screen:

1. Quick jump to the *WFM Admin Dashboard*
2. Select **WFM Configuration**

3. Select **Work Groups**.

4. You are directed to the *Work Group Landing Page*.

The following menu options and webservice should be activated in order for you to gain access to the steps above.

Menu Options

Task	Menu Option
Work groups Configuration	WFM Configuration > Configuration Settings > Work Group Config

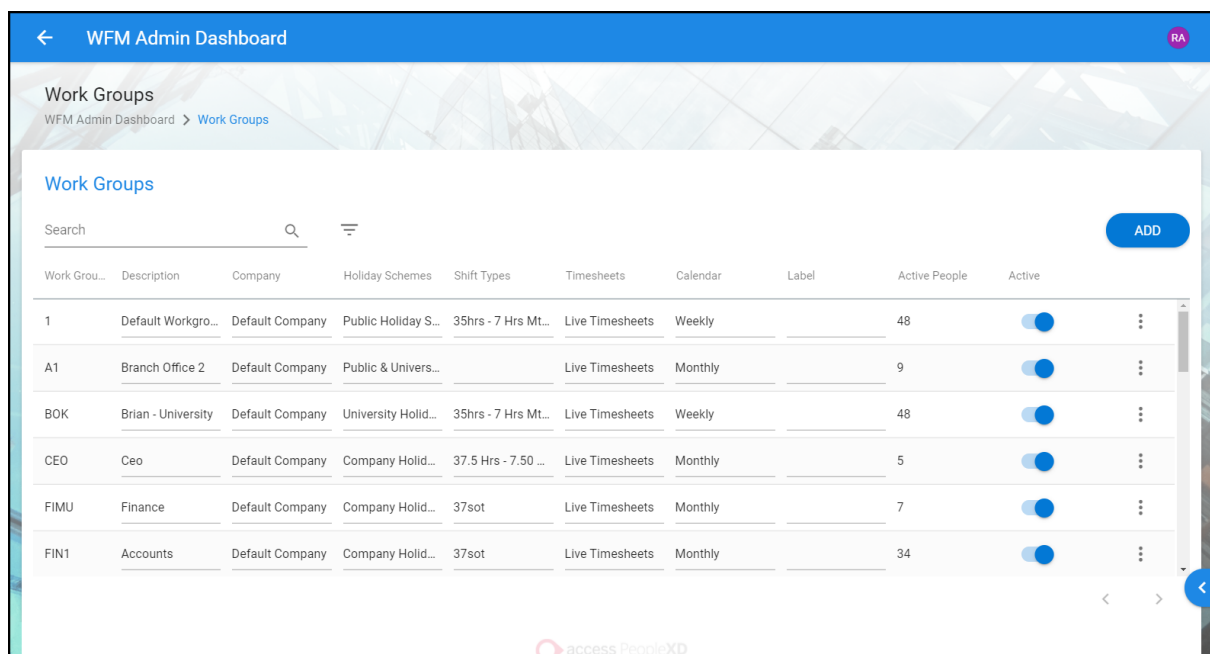

Webservices

Setting	Webservice
Update Settings	Roster > Update settings workgroup
Get Settings	Roster > Get settings workgroup
Create Settings	Roster > Create settings workgroup

2.3. The Work Group Landing page

When you access the *Work Groups* screen, the first page you see is the Work group landing page. When the screen displays, you see a grid displaying all active Work Groups. The work group grid can be quickly searched by entering free text. You can also use the filter to restrict the list based on key fields attached to the work group.

You can drill into the Work Group to view, update or delete additional details relating to the Work Group configuration.

Work Group...	Description	Company	Holiday Schemes	Shift Types	Timesheets	Calendar	Label	Active People	Active
1	Default Workgro...	Default Company	Public Holiday S...	35hrs - 7 Hrs Mt...	Live Timesheets	Weekly		48	☒
A1	Branch Office 2	Default Company	Public & Univers...		Live Timesheets	Monthly		9	☒
BOK	Brian - University	Default Company	University Holid...	35hrs - 7 Hrs Mt...	Live Timesheets	Weekly		48	☒
CEO	Ceo	Default Company	Company Holid...	37.5 Hrs - 7.50 ...	Live Timesheets	Monthly		5	☒
FIMU	Finance	Default Company	Company Holid...	37sot	Live Timesheets	Monthly		7	☒
FIN1	Accounts	Default Company	Company Holid...	37sot	Live Timesheets	Monthly		34	☒

Note:

A free text label has been added to the Work Group Screen which allows you to gather Work Groups by free text to facilitate their searches. Labels are updated on the summary grid of the *Work Group Details Screen* under **General Parameters**

The *Work Group Landing* page displays the following fields:

Field	Notes
Work Group Code	The code linked to specific Work group. This field is non editable.
Work Group Name	The name of the Work group. This can be edited directly from the grid
Company	The specific company associated with the work group. This can be directly edited from the grid
Holiday Scheme	This can be directly edited from the grid
Shift Type	This can be directly edited from the grid
Timesheets	Timesheets associated with the work group. This can be directly edited from the grid
Calendar	This can be directly edited from the grid
Label	The free text label which is directly updated from the grid. This gathers work groups together to facilitate searches.
Active People	Number of active employees in the Work Group.
Active Indicator	By default, any new or existing Work Groups with no status will be marked as active.

2.3.1. How to Search and Filter

There is a search facility on the top of the screen which allows you to quickly find the work group you are looking for. The filter allows you to search by code, description or label.

You can filter the work groups returned from the search by:

- Company, Holiday Scheme
- Calendar
- Shift Type
- Timesheets

- Active Indicator
- No Active People

Filter Work Groups

Companies	Holiday Scheme
Shift Type	Calendar
Label	Timesheets
Active	No Active People ☐

RESETAPPLY

Click **Apply** to filter the results.

2.3.2. How to Mark a Workgroup Inactive

You can mark a Work Group as Inactive when it is no longer in use. This can only be done when there are no active employees assigned.

Once inactive the work group no longer displays on the dropdown list of available work groups. The Work Group screen is filtered only to display active Work Groups so in order to view Inactive Work groups, users can toggle the Active Indicator on the Filter seen in the screen shot above. Alternatively, there is a column on the main landing page which defaults to Active where you can change the toggle to Inactive.

2.3.3. How to add a new Workgroup

As well as the existing work groups which appear on the landing page when configured, you can add a new workgroup to the list.

When adding a new work group, there are mandatory fields which need to be completed before the work group can be added.

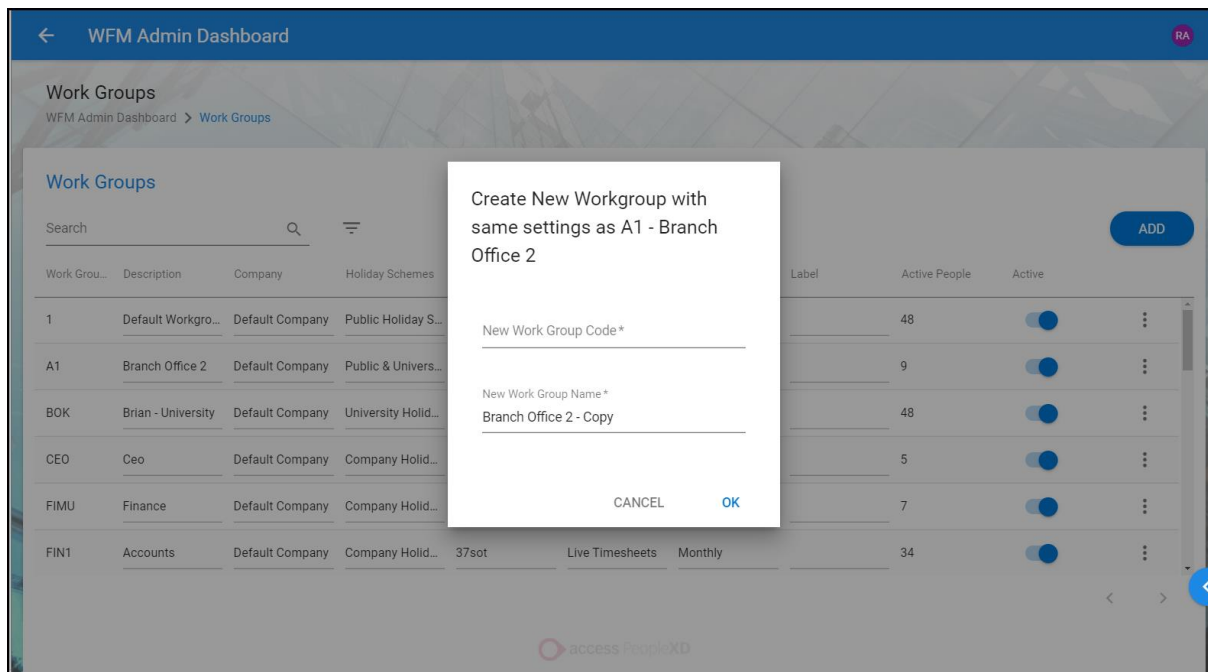

To Add a new Work Group:

1. Click the **Add** button on the top right-hand side of the screen.
2. Fill in the fields in the pop-up screen.
3. You must fill in the following:
 - Work Group Code
 - Work Group Description
 - Holiday Scheme
 - Company
 - Shift Type
 - Timesheet – Live or test
 - Calculate
 - Pay Frequency
 - Calculate Default Hours
 - Generate Timesheets
 - Active
4. Click **Ok**
5. Click **Save**
6. The details of the Work Group display and can be updated as required.

2.3.4. How to Copy a Workgroup

To Copy a Work Group:

1. Select **Copy** from the  option available on the right of the screen.
2. Select the work group whose setting should be copied.

3. A pop up appears which you can use to copy the work group. This allows you to update the new code and description.
4. Once copied, all the new settings will be copied over to the newly created work group.

Webservice Options

The webservice option below is needed to set up the process:

Task	Menu Option
Create Settings	Roster > Create settings workgroup copy

2.3.5. How to Delete a Workgroup

Work groups can be deleted on this screen. It is important to check that the work group you are deleting has no employees or underlying tables assigned to it.

To Delete a Work Group:

1. Select **Delete** from the  menu.
2. Once deleted, the work group no longer displays.

**Note:**

On deletion the system validates to ensure that no personnel are assigned to the work group being deleted.

Webservice Required:

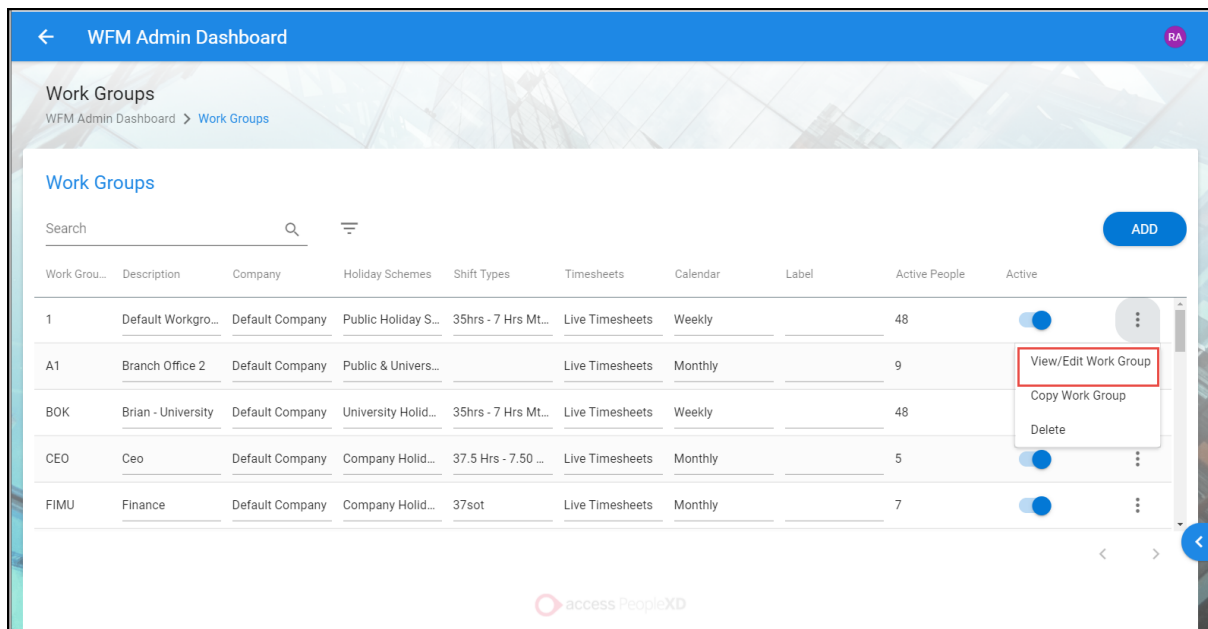

Task	Webservice
Delete Settings	Roster > Delete settings workgroup

3. Workgroup Screens and Tabs

When you drill in to a work group from the landing page, you can customise and configure it in regard to both *General Parameters* as well as more specific features such as pay codes and default payroll hours.

To access the drill down screens to customise the Work group :

1. Click the **View/Edit Work Group** button on the landing page.

2. This brings you directly to the *Work Group* screen.

Here you see the following tabs on the left-hand side of the page:

- [General Parameters](#)
- [Payment Rules](#)
- [Default Payroll Hours](#)
- [Group Codes](#)
- [Trigger Points](#)
- [Extra Hours Recoding](#)
- [Absence Contract Days](#)
- [Advanced Configuration](#)

3.1. General Parameters

The *General Parameters* screen features the default parameters which control the Workgroups. Here you can decide the shifts which the employee works and whether hours need to be signed off.

The screenshot displays the 'Default Workgroup' configuration interface. On the left, a sidebar lists various settings: General Parameters, Payment Rules, Default Payroll Hours, Group Codes, Trigger Points, Extra Hours Recoding, and Absence Contract Days. The 'General Parameters' section is active, showing the following fields:

- Current Work Group ***: Default Workgroup
- Work Group Code ***: 1
- Work Group Name ***: Default Workgroup
- Company ***: Default Company
- Holiday Scheme ***: Public Holiday Scheme 2
- Shift Type ***: 35hrs - 7 Hrs Mtwtf
- Label**: (empty field)
- Active**: Toggle switch (currently on)
- Generate Timesheet**: Toggle switch (currently on)

A 'SAVE' button is located at the bottom right of the form. The 'access PeopleXD' logo is visible at the bottom center.

The table below details the fields on the *General Parameters* screen:

Field	Notes
Work Group Code	The code to identify the Work group
Work Group Name	The name of the workgroup
Public Holiday	Public Holiday entitlements
Shift Type	The Shift type which has been worked
Company	The name of the company
Label	This allows you to label the Shift to facilitate searches.
Active Indicator	This indicates if the field is active or not
Generate Timesheet Indicator	This toggle indicates whether there are associated timesheets generated with the work group.
Default OT Code	Over time code
Timesheets	Live, Basic or ASCII
Balance Interface	Allow you to choose Balance Interface.

Pay Frequency	Frequency of pay i.e., Weekly, fortnightly or monthly.
Sign Off Not Required for Payroll	Allows you to specify if the payroll needs to be signed off.
Calculation	Pay calculation
Minimum for Hours	Minimum number of hours calculated.
Calculate Default Hours	This lets you choose how to calculate default hours.
Working Time Group	Working Time Group can be chosen.
Calculate Clockings	Choose Option on the toggle.
MGR Rollback	The number of weeks previous to the current open period which a manager can update employee hours.
EMP Rollback	The number of weeks previous to the current open period which an employee can update their own hours.
Allow Generation of Default Clocks	Choose option on the toggle.
User Defined Calendar Group	Choose the option on the toggle.
Roster Calculation Method	Choose how the roster calculated
Deduct Absence Retail Calculation	Choose the option on the toggle
Run Nightly Planned Costs	Choose Nightly Planned Costs on the toggle.
Team Scheduler Timesheet Template	Which template is being used e.g. Manager or employee.

5. Click **OK**
6. In the example below we see that two hours overtime have been successfully added to the tab.

Under the *Advanced Options* section you have toggles for the following:

- Check Holidays for Default Payments
- Default Timesheets for Non-Payment Groups
- Apply Hold Period to Default Payments.

The following webservice options need to be switched on to display the screen:

Task	Webservice
Create Settings	Roster > Create settings workgroup defaultpayments
Delete Settings	Roster > Delete settings workgroup defaultpayments
Get Settings	Roster > Get settings workgroup defaultpayments
Update Settings	Roster > Update settings workgroup defaultpayments

3.2.2. Basic Salary Rules

The *Basic Salary Rules* tab lets you assign default payment rules to a Work Group. These allow you to customise according to specific workgroups.

The screen is split in to:

- Basic/Salary Rule
- Day Order Parameters
- Advanced Salary Rule

The screenshot shows the 'Basic/Salary Rule' configuration page within the 'Default Workgroup' section. The page has a blue header with a back arrow and 'Work Groups' text. Below the header, the breadcrumb path is 'WFM Admin Dashboard > Work Groups > Default Workgroup'. A dropdown menu for 'Current Work Group' is set to 'Default Workgroup'. A search bar is present. On the left, a sidebar lists 'General Parameters' and 'Payment Rules' (which is highlighted). The main content area has tabs for 'Default Payments', 'Basic/Salary Rule' (active), 'Timesheet Threshold Balance', and 'Medical S'. Under the 'Basic/Salary Rule' tab, there are sections for 'Basic/Salary Rule' and 'Day Order Parameters'. The 'Basic/Salary Rule' section includes three toggle switches: 'Basic Rule Group', 'Salary Rule Group', and 'Exclude Rest Days from Basic Rule'. Below these are three dropdown menus: 'Basic/Salary Threshold Hours', 'Basic Overflow Pattern', and 'Basic Underflow Pattern'. The 'Day Order Parameters' section includes two dropdown menus: 'Day Order Basic Rule' (set to 'Default to Company') and 'Day Order Threshold Override'. At the bottom right is a green 'SAVE' button. The 'access PeopleXD' logo is at the bottom center.

Advanced Salary Rule

The screenshot shows the 'Advanced Salary Rule' configuration page within the 'Default Workgroup' section. The page has a blue header with a back arrow and 'Work Groups' text. Below the header, the breadcrumb path is 'WFM Admin Dashboard > Work Groups > Default Workgroup'. A dropdown menu for 'Current Work Group' is set to 'Default Workgroup'. A search bar is present. On the left, a sidebar lists 'General Parameters' and 'Payment Rules' (which is highlighted). The main content area has tabs for 'Default Payments', 'Basic/Salary Rule', 'Timesheet Threshold Balance', and 'Medical S'. Under the 'Advanced Salary Rule' tab, there are sections for 'Advanced Salary Rule' and 'Day Order Parameters'. The 'Advanced Salary Rule' section includes two dropdown menus: 'Basic Pay Code Group' and 'On Call Pay Pattern'. Below these are three toggle switches: 'Apply Quota Payments', 'Apply Underflow/Equality Rules', and 'Run Default Rule'. The 'Day Order Parameters' section includes three dropdown menus: 'Quota Deduction Pay Code Group', 'Quota Deduction Daily Divisor 1', and 'Quota Deduction Minimum Days'. At the bottom right is a green 'SAVE' button. The 'access PeopleXD' logo is at the bottom center.

The tab is controlled by the following menu options:

Task	Webservice
Create Settings	Roster > Create settings workgroup defaultpayments
Delete Settings	Roster > Delete settings workgroup defaultpayments
Get Settings	Roster > Get settings workgroup defaultpayments
Update Settings	Roster > Update settings workgroup defaultpayments

3.2.3. Time Threshold Balance

The Timesheet Threshold Balance tab allows you to configure the Timesheet Threshold values against the Work Group. This screen also includes:

- Threshold Hours Value
- Threshold Impacting Pay Code Group
- Threshold Balance Code
- Threshold Excess Payroll Contract Pay Code

The tab is controlled by the following menu options:

Parameter	Menu Option
Balance Params	Roster > Get balanceparams

3.2.4. Medical Salary rule

The *Medical Salary Rule* screen controls rules relating to the Medical Salary Rules such as On Call rules and In House Pay Codes.

Note:

Please check with your consultant before configuring Medical Salary Rule for your work group.

This tab can be switched off using the following menu option:

Setting	Menu Option
Medical Salary Rule	WFM Configuration > Configuration Settings > Work Group Config - Medical Salary Rule

The following menu options need to be switched on to configure the Medical Salary Rule:

Setting	Menu Option
Medical Salary Rule	WFM Configuration > Configuration Settings > Work Group Config - Medical Salary Rule
Work Pattern	Roster > Get workpattern.

3.3. Default Payroll Hours

The *Default Payroll Hours* screen allows you to define the default hours that should be sent to payroll if applicable.

The screen includes fields such as:

- Payroll Pay Code
- Description
- Payroll Default Hours
- Holidays Only
- Holiday Pay Method

The screenshot displays the 'Default Payroll Hours' configuration interface. On the left, a sidebar lists navigation items: Payment Rules, Default Payroll Hours (selected), Group Codes, Trigger Points, Extra Hours Recoding, Absence Contract Days, and Advanced Config. The main content area is titled 'Default Payroll Hours' and includes the following fields:

- Current Work Group ***: A dropdown menu set to 'Default Workgroup'.
- Search**: A search bar with a magnifying glass icon.
- Payroll Pay Code**: A dropdown menu.
- Description**: A text input field.
- Payroll Default Hours**: A dropdown menu.
- Payroll Default Units**: A dropdown menu.
- Holidays Only**: A toggle switch, currently turned off.
- Holiday Pay Method**: A dropdown menu.

At the bottom right, there is a green 'SAVE' button. The 'access PeopleXD' logo is visible at the bottom center.

The following web services need to be switched on to configure default hours.

Task	Webservice
Get Settings	Roster > Get settings workgroup defaulthours
Create Settings	Roster > Create settings workgroup defaulthours

Update Settings	Roster > Update settings workgroup defaulthours
Delete Settings	Roster > Delete settings workgroup defaulthours

3.4. Group Codes

The *Group Codes* screen allows you to attach a group code to the Work Group.

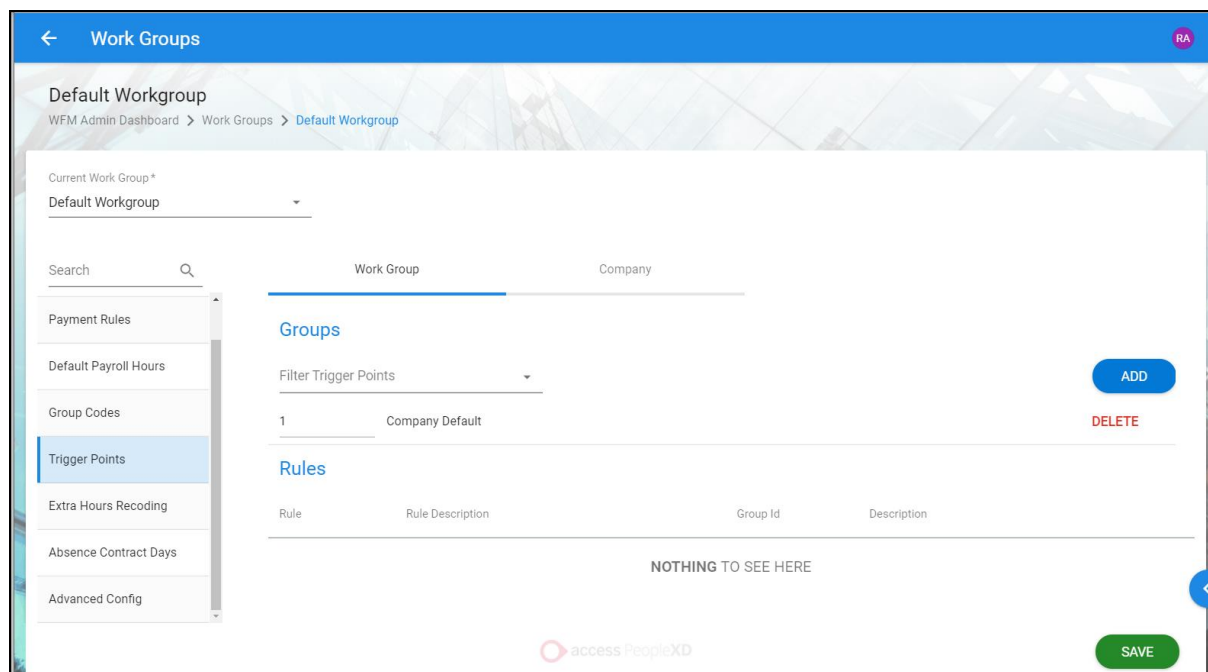

The screenshot displays the 'Group Codes' configuration screen. On the left, a sidebar lists various settings, with 'Group Codes' currently selected. The main content area features a search bar and four dropdown menus for configuration: 'Group Non-Payroll Code', 'Personalised Payroll Group' (which is set to 'Maintain Hours Screen - Daily Totals'), 'Cost Centre Pattern', and 'Work Pattern Group'. At the bottom right, there is a green 'SAVE' button. The top of the screen shows the 'Work Groups' header and a breadcrumb trail: 'WFM Admin Dashboard > Work Groups > Default Workgroup'.

The following fields are available on the screen:

- Group Non Payroll Codes
- Personalised Pay Code Group
- Cost Centre Pattern
- Work Pattern Group

3.5. Trigger Points

The *Trigger Points* screen allows you to assign Trigger Points at a Work Group and Company level. This company tab shows you which of the overriding triggers are applied at a company level. You can see this under the Company tab. There is a further facility to see the individual rules attached to a Trigger Point Group.

The following webservices need to be switched on to configure Trigger Points:

Task	Webservice
Create Settings	Roster > Create settings workgroup triggerpoint groups
Delete Settings	Roster > Delete settings workgroup triggerpoint groups
Update Settings	Roster > Update settings workgroup triggerpoint groups

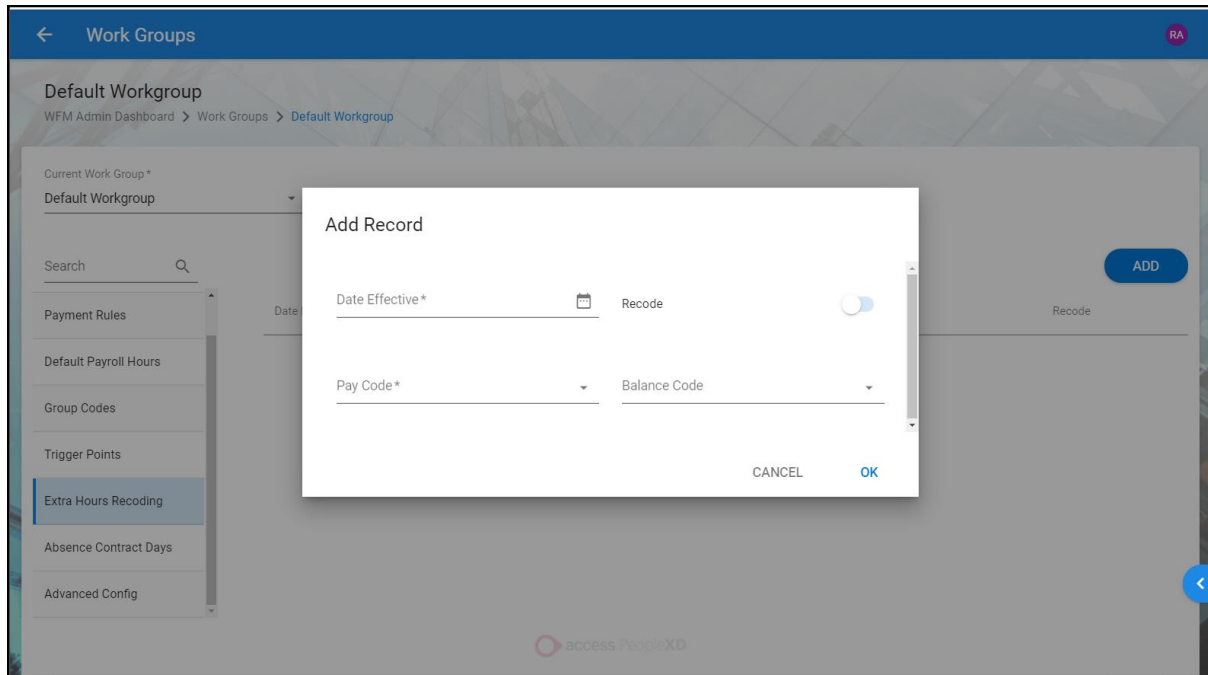

Get Settings	Roster > Get settings workgroup triggerpoint groups
Get Settings Rules	Roster > Get settings workgroup triggerpoint rules
Get Settings	Roster > Get settings triggerpoint groups

3.6. Extra Hours Recoding

Extra Hours Recoding allows you to assign rules relating to extra hours recoding to the work group.

To add a record to the screen, complete the following steps:

1. Click the **Add** button on the right-hand side of the screen.
2. Fill in **Date Effective**, **Paycode** and **Balance Code**.
3. Click **OK**.
4. The record displays.

The following webservice need to be switched on to configure the screen:

Task	Webservice
Create Settings	Roster > Create settings person recoding
Delete Settings	Roster > Delete settings person recoding
Update Settings	Roster > Update settings person recoding
Get Settings	Roster > Get settings person recoding

3.7. Absence Contract Days

Absence Contract Days allows you to override the default Roster Contract Work Days at a Work Group Level. These days can then be picked up as part of the Unrostered Bookings and override the company settings.

Note:

The screen will only be displayed if the Unrostered Booking functionality is switched on in the Control Parameters assigned against the company. See the parameter in the table below.

Screen	Parameter
Unrostered Booking	ct_param.allow_contracted_work_days = 'Y'

3.8. Advanced Configuration

This is a landing page that holds a number of advanced configuration options that can be assigned to a Work Group.

The screen is broken out into the following 5 tabs:

- [Absences](#)
- [Sign Off Hours](#)

- [Stand By Hours](#)
- [Advanced Options](#)
- [Additional Config](#)

3.8.1. Absences

The Absences tab divides into the following configuration fields relating to Absence:

- Default Days Holidays
- Apply Default Hours for Absence
- Outage Scheme
- Bradford Factor Rules
- Absence Category Code
- Pay Holidays Default Hours Only
- Generate Occupational Absence (T&A only site)

The screenshot displays the 'Work Groups' configuration page in the WFM Admin Dashboard. The 'Default Workgroup' is selected. The 'Absences' tab is active, showing various configuration fields. A left-hand menu lists other configuration areas: Payment Rules, Default Payroll Hours, Group Codes, Trigger Points, Extra Hours Recoding, Absence Contract Days, and Advanced Config (which is highlighted). The 'Absences' tab contains the following fields:

- Default Days Holiday:** A dropdown menu.
- Apply Default Hours For Absence:** A toggle switch, currently turned on.
- Outage Scheme:** A dropdown menu.
- Bradford Factor Rule:** A dropdown menu.
- Absence Category Code:** A dropdown menu.
- Pay Holidays at Default Hours Only:** A toggle switch, currently turned on.
- Generate Occupational Absences:** A toggle switch, currently turned off.

A 'SAVE' button is located at the bottom right of the configuration area. The 'access PeopleXD' logo is visible at the bottom center.

3.8.2. Sign Off Hours

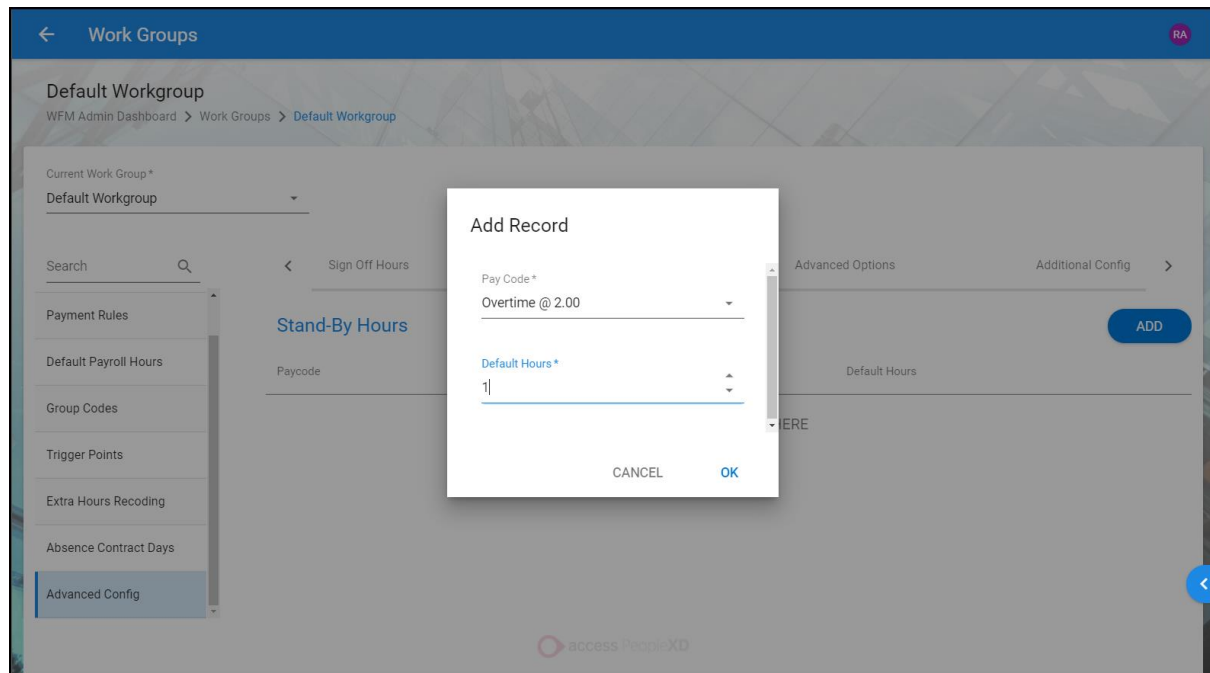

This tab relates to Sign Off Hours options and has the following fields available:

- Confirm Unapproved Hours
- Check Sign Off Hours Versus
- Contract Hours Sign Off Check

The screenshot shows the 'Sign Off Hours' configuration screen within the 'Work Groups' section. The page has a blue header with a back arrow and 'Work Groups' text. Below the header, the breadcrumb trail is 'WFM Admin Dashboard > Work Groups > Default Workgroup'. The main content area is titled 'Default Workgroup' and includes a dropdown for 'Current Work Group *' set to 'Default Workgroup'. A search bar is present. On the left, a sidebar menu lists various configuration options, with 'Advanced Config' selected. The main content area has tabs for 'Absences', 'Sign Off Hours' (which is active), 'Stand-By Hours', and 'Advanced Options'. Under the 'Sign Off Hours' tab, there are three settings: 'Confirm Unapproved Hours' with a toggle switch, 'Check Sign Off Hours Versus' with a dropdown menu, and 'Contract Hours Sign Off Check' with a dropdown menu. The 'access PeopleXD' logo is at the bottom center, and a green 'SAVE' button is at the bottom right.

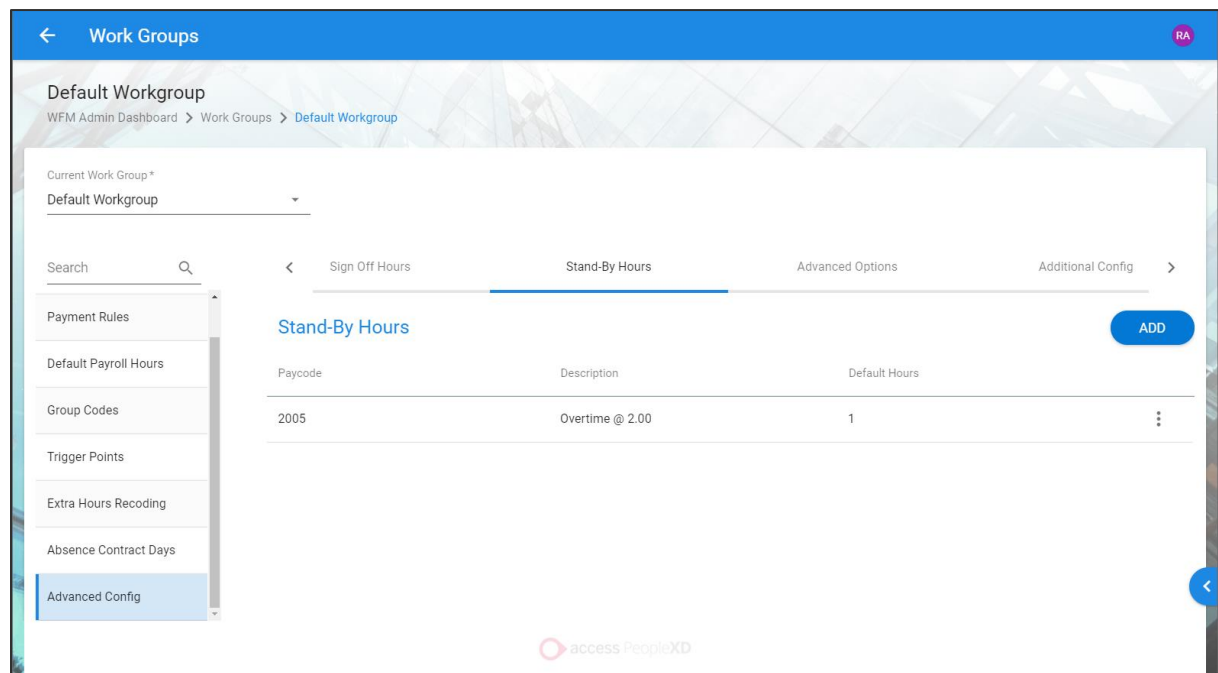

3.8.3. Standby Hours

The Standby Hours screen tab lets you add details for Stand By Hours against a Work Group. You can record the hours by adding the relevant Pay Code.

To add a record, complete the following:

1. Click the **Add** button on the right hand side of the screen.
2. Fill in the **Pay Code** from the drop down menu (this is a mandatory field)
3. Fill in **Default Hours**.
4. Click **OK**.
5. The record displays.

The following webservice are required to control the screen:

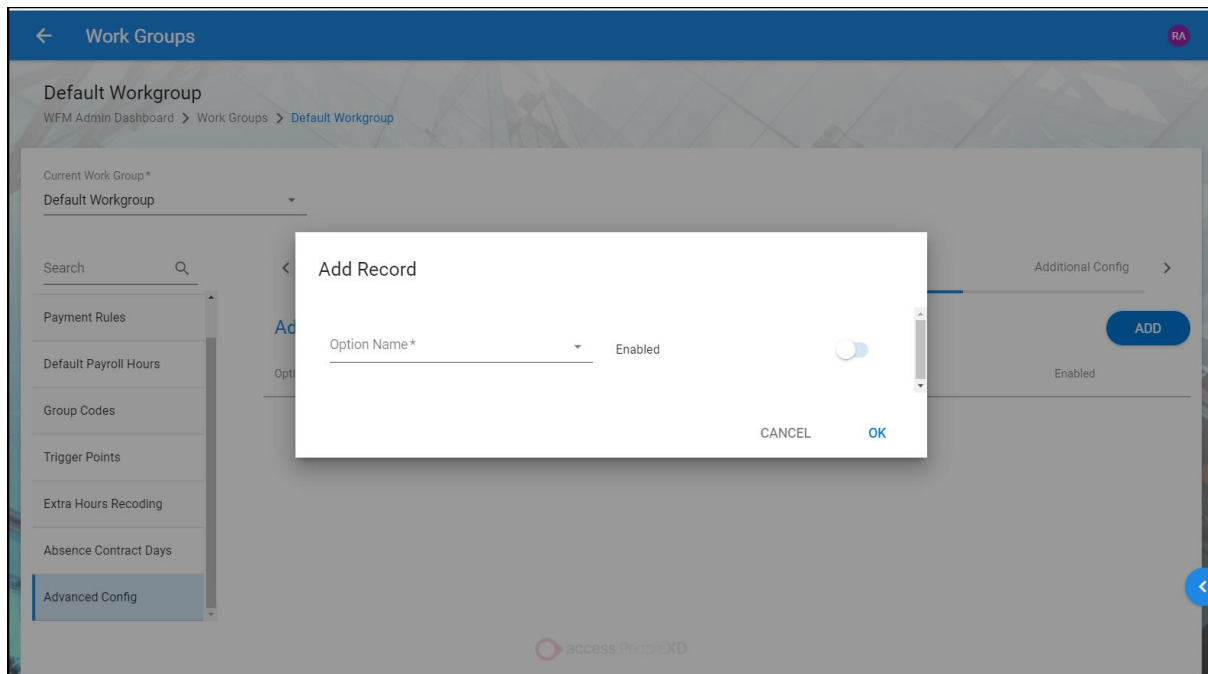

Task	Webservice
Create Settings	Roster > Create settings workgroup standby hours
Delete Settings	Roster > Delete settings workgroup standbyhours
Get Settings	Roster > Get settings workgroup standbyhours
Update Settings	Roster > Update settings workgroup standbyhours

3.8.4. Advanced Options

Provides users with the ability to control Advance Options against a Work Group if configured. These options are normally held at a company level.

To Add a Record under Advanced Options:

- Click **Add** at the top right hand corner of the page
- Enter the **Option Name**
- Click the **Enabled** toggle where applicable.

The following webservice options are required to control the *Advanced Options* screen:

Task	Webservice
Create Settings	Roster > Create settings workgroup advancedoptions
Delete Settings	Roster > Delete settings workgroup advancedoptions
Get Settings	Roster > Get settings advancedoptions
Get Settings Workgroup	Roster > Get settings workgroup advancedoptions
Update Settings Workgroup	Roster > Update settings workgroup advancedoptions

3.8.5. Additional Configuration

With the *Additional Configuration* tab, you can assign settings against a Work group.

The screen is broken out in to two sections:

- Clocking Update Parameters
- Additional Config

The screenshot shows the 'Work Groups' interface with the 'Additional Config' tab selected. The page title is 'Default Workgroup' with a breadcrumb trail: 'WFM Admin Dashboard > Work Groups > Default Workgroup'. A dropdown menu for 'Current Work Group' is set to 'Default Workgroup'. A search bar is present. On the left, a sidebar lists navigation options: 'Payment Rules', 'Default Payroll Hours', 'Group Codes', 'Trigger Points', 'Extra Hours Recoding', 'Absence Contract Days', and 'Advanced Config' (which is highlighted). The main content area has tabs for 'Sign Off Hours', 'Stand-By Hours', 'Advanced Options', and 'Additional Config' (which is active). Under 'Clocking Update Parameters', there are dropdowns for 'Business Absence' (set to 'Default To Company') and 'Flexi Overtime' (set to 'Default To Company'). Under 'Additional Config', there is a dropdown for 'Benzing Balance Group', a toggle for 'Display Pay Codes on Pers. Clocking' (which is turned on), a toggle for 'Apply Pay Code Adjustment' (which is turned off), a dropdown for 'Category' (set to 'TICK'), a dropdown for 'Call Out', and a dropdown for 'Planned Return To Work'. A 'SAVE' button is at the bottom right. The 'access PeopleXD' logo is at the bottom center.

Clocking Update Parameters

Under Clocking Update Parameters, you will find the following fields.

- Business Absence
- Flexi Overtime

Additional Config

Under *Additional Config*, you can control the following fields:

- Benzing Balance Group
- Display Pay Codes on Pers Clocking
- Apply Pay Code Adjustment

- Category
- Call Out
- Planned Return to Work
- Exclude Approve Hours Mail
- Exclude Sign Off Hours Mail
- Exclude Exceptions Mail
- Exclude Employee No Hours Mail
