1. Overview

1.1. Purpose of the Guide

This document provides guidance on how to configure *Employee Offboarding* on CorePortal. This includes:

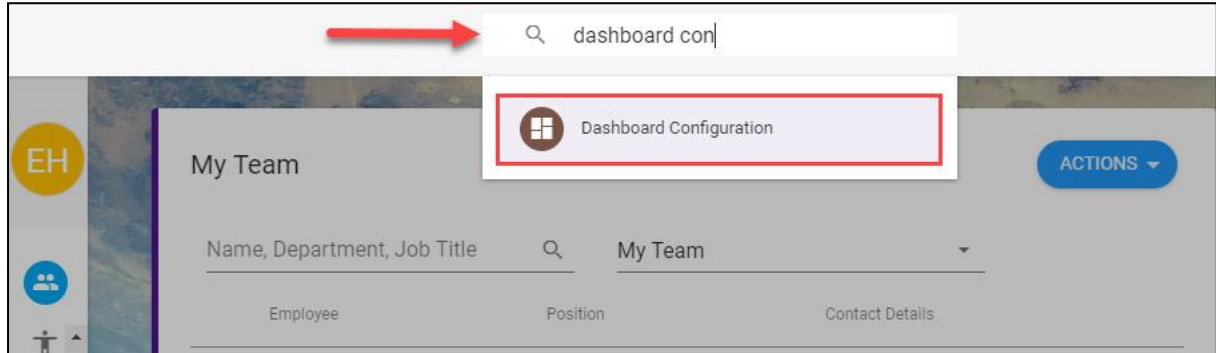

- The *Social Hub Configuration* widget.
- How to configure each element of the *Social Hub* including Checklists, Pages etc.
- Configuring the *Social Hub* dashboard / landing page.
- Reporting on *Employee Offboarding* via CoreInsight.
- User Access to *Employee Offboarding* for employees, managers and administrators.

 **Note:** The corresponding document *Employee Offboarding: How to Use - User Guide* provides end user training for how to use Employee Offboarding via the Social Hub dashboard.

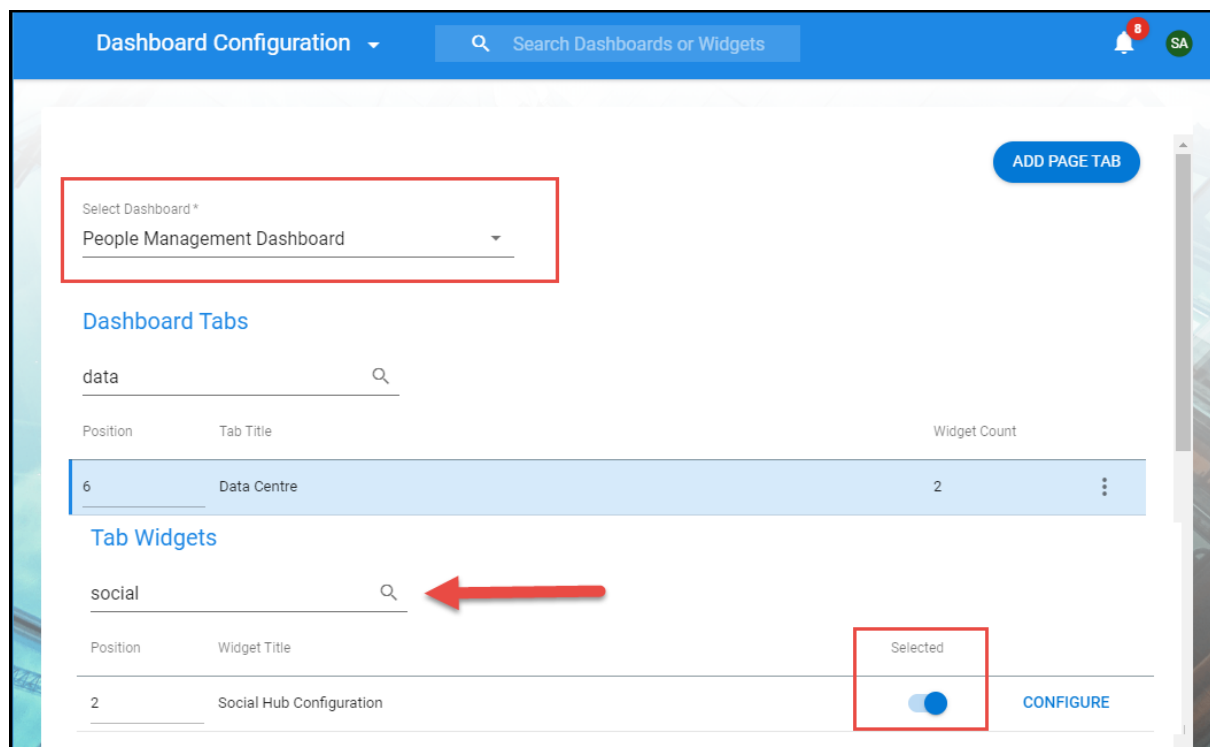

2. Employee Offboarding Configuration Widget

To enable to *Social Offboarding Configuration* widget:

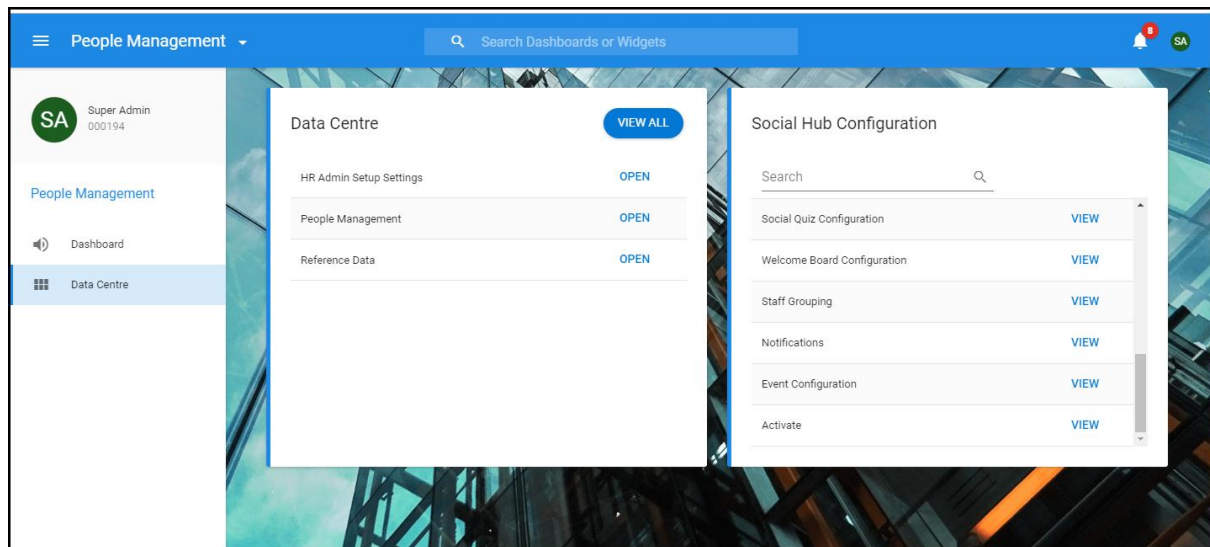

1. Quick jump to **Dashboard Configuration**.

2. Select "People Management Dashboard" from the *Select Dashboard* drop-down list.
3. Select the applicable tab you require the widget to appear on.
In this example, the widget is required to appear on the *Data Centre* tab.
4. Search the available *Tab Widgets* section for "social".
5. Ensure the *Social Hub Configuration* widget is **Selected**.

6. The *Social Hub Configuration* widget now displays on your applicable dashboard.

3. Switch on Employee Offboarding

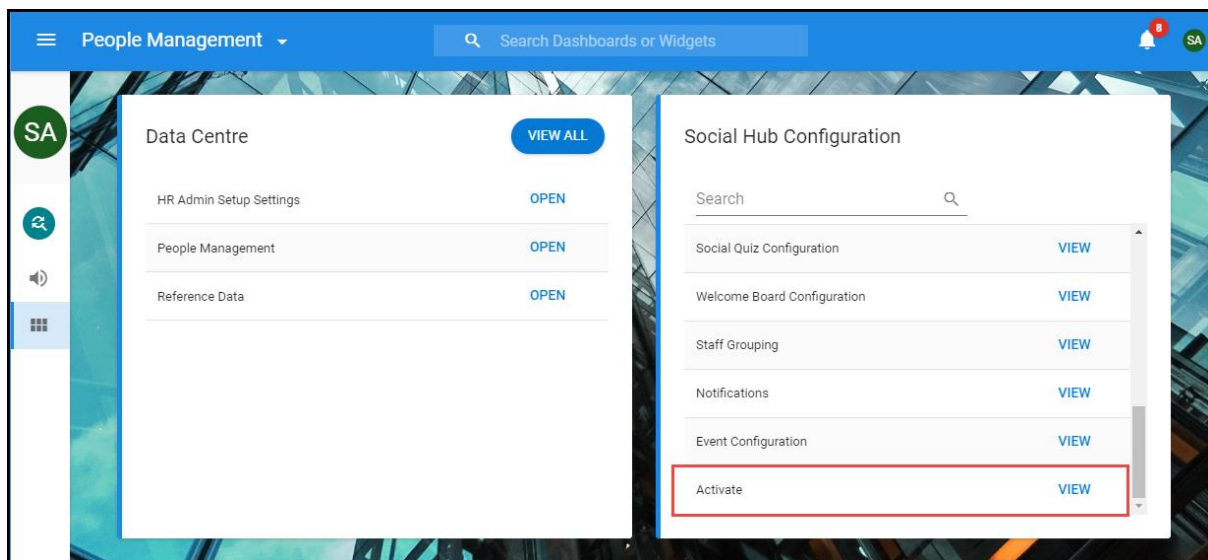

Note:

- There is only one option available when enabling Employee Offboarding called the Enable option.
- This is to be used when you are setting up offboarding for the first time on CoreHR.

To enable *Employee Offboarding*:

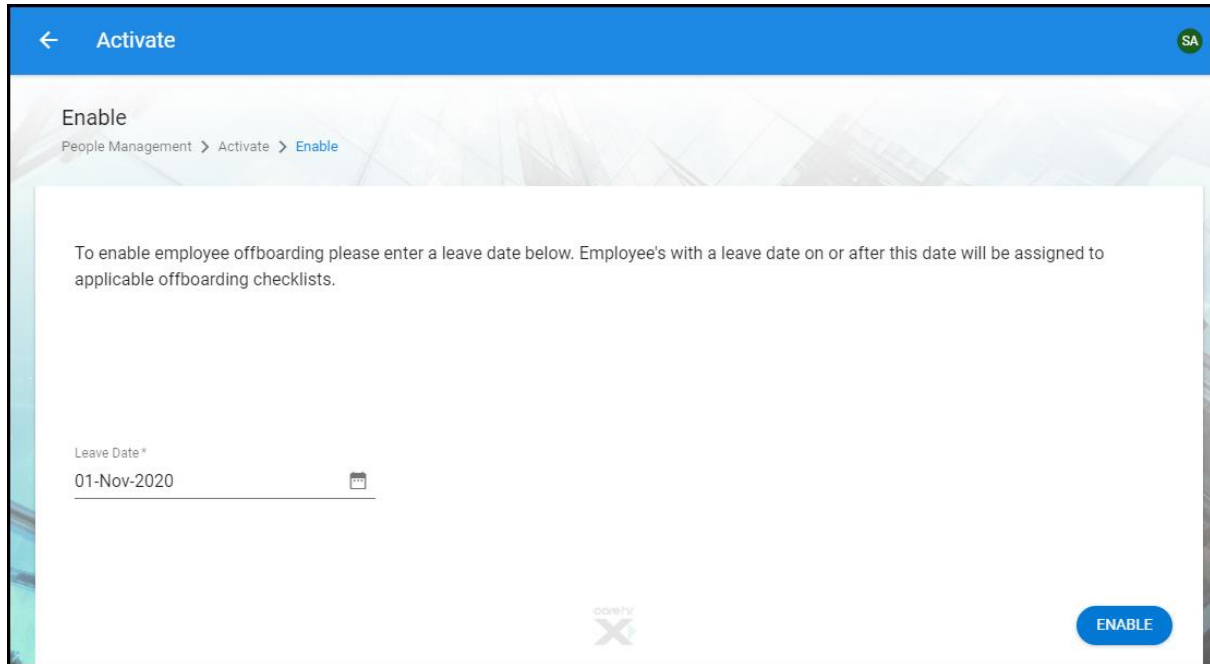

1. Quick jump to the *Social Hub Configuration* widget.
2. Click the **View** button adjacent to the Activate label.

3. On the *Offboarding* section, click the **Enable** button.

The *Enable Offboarding* screen displays.

4. Enter the *Leave Date*

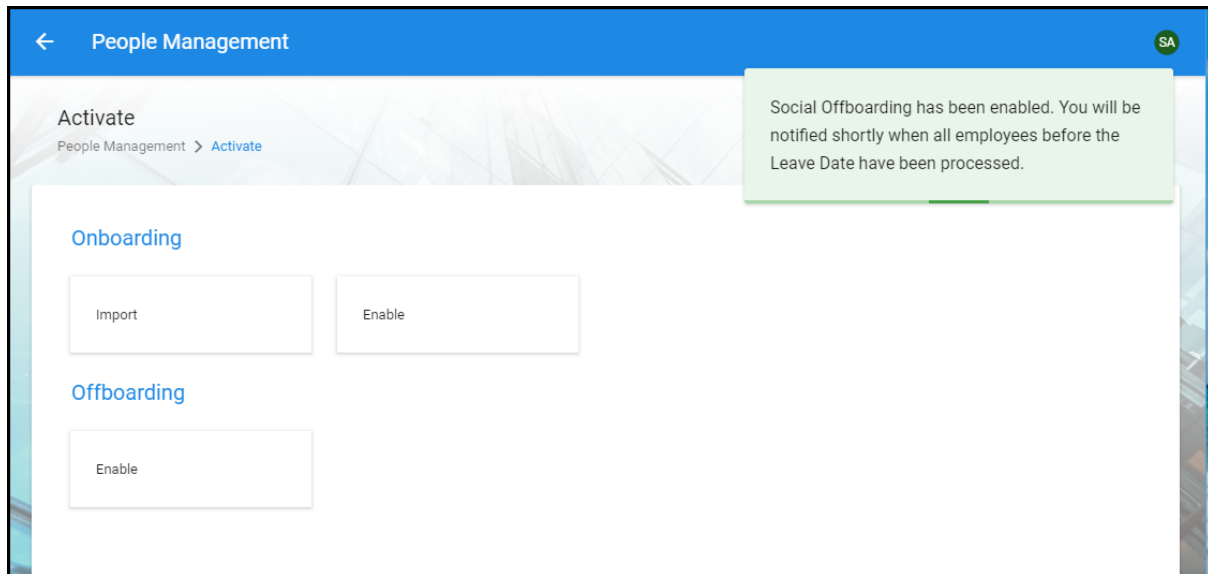

The screenshot shows a web interface for configuring employee offboarding. At the top, there is a blue header bar with a back arrow, the text 'Activate', and a user profile icon labeled 'SA'. Below the header, the page title 'Enable' is displayed, followed by a breadcrumb trail: 'People Management > Activate > Enable'. The main content area contains a text block stating: 'To enable employee offboarding please enter a leave date below. Employee's with a leave date on or after this date will be assigned to applicable offboarding checklists.' Below this text is a form field labeled 'Leave Date *' with the date '01-Nov-2020' entered and a calendar icon to its right. At the bottom right of the form, there is a blue button labeled 'ENABLE'. A small 'corehr' logo is visible in the bottom center of the page.

Note

- As part of the *Employee Offboarding* activation, it is mandatory to provide a *Leave Date*.
- Employees with a leave date on or after this date will be assigned to applicable offboarding checklists.
- These items may be global or match their restriction criteria.

5. An on-screen progress bar displays a message notifying you that Employee Offboarding has been enabled.

Note:

- On completion of this configuration, employee offboarding is now enabled for users.
- Tasks assigned to employees will be driven from the rules defined at the checklist item level.

4. Offboarding Checklists

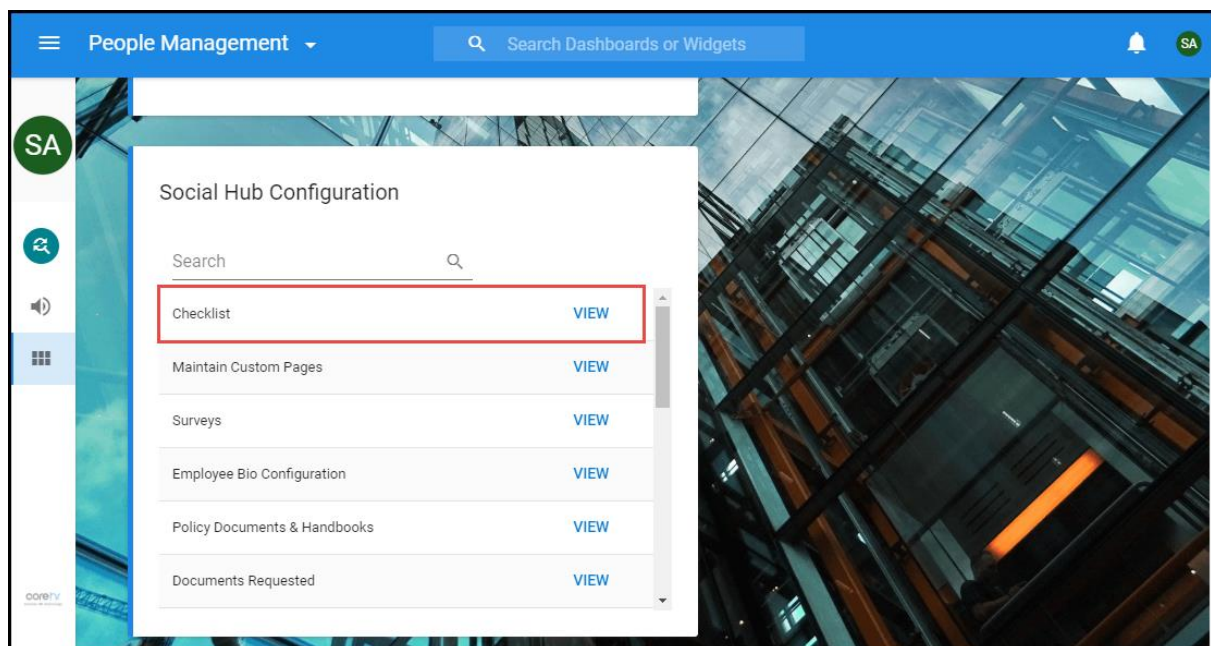

4.1. Add Offboarding Items - Screen Overview

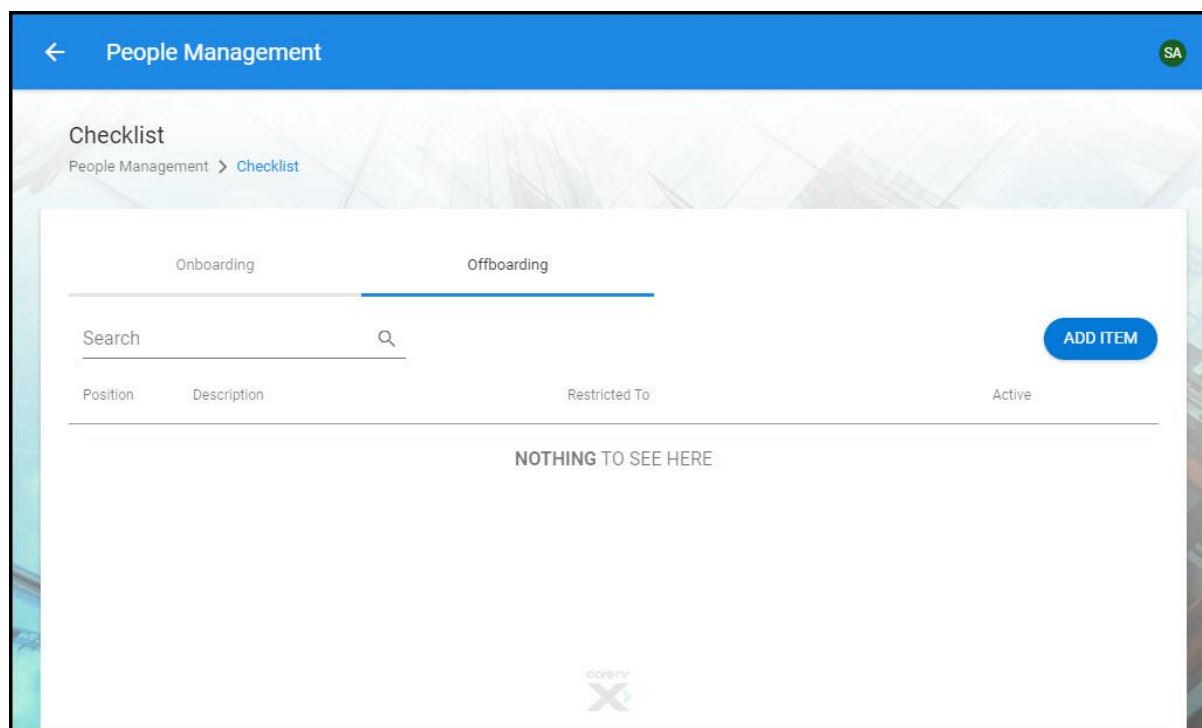

Note:

- Checklist items can be assigned X days before the employee's Date Left.
- Checklist items can be assigned by criteria group, allowing HR to define different tasks for employees in different parts of the organisation, for permanent/temporary staff etc.

1. To access the Checklist configuration screen, go to the *People Management Dashboard* and select the *Data Centre* tab.
2. On the Social Hub Configuration widget, click the corresponding **View** button adjacent to the Checklist label.

3. Within the Checklist screen, select the Offboarding tab to add and amend existing items on the checklist.

4. Click on the **Add Item** button to create a new Item to be added onto the Offboarding Checklists for Leavers.

The below screenshot and table provide an overview of the *Add Offboarding Item* screen and what can be seen within it.

Checklist SA

Add Offboarding Item
 People Management > Checklist > [Add Offboarding Item](#)

Item Type* Offboarding Item* Title

Days Before Leave Date *
 30

Optional Information

SAVE

Screen Field	Overview
Item Type	When creating a new checklist item, you must select the <i>Item Type</i>. The list below outlines the item types available to choose from: • Input items • Custom pages • User defined items • Policies • Documents requested • Employee Documents • Surveys See section 4.1.1 Item Types for further detail on each option.
Offboarding Item	Items available in the Offboarding Item drop-down list are dependent on the item that has been selected in the Item Type drop-down list. See section 4.1.1 Item Types for further detail.

Screen Field	Overview
Title	You must give each checklist item a specific title. This title appears for the employee when they view the item in their Tasks Outstanding list on the <i>Social Hub</i> .
Days before Leave Date	You can indicate whether each checklist item should be made available at a specific time before the employee's leave date. For example, a Leaving Survey might be made available to an employee 7 days before they are due to leave. - By default, this is set to '30'. This means this item is available 30 days prior to them leaving the company. - If you set this to '1', the checklist item is accessible to the employee on the day before they leave. - The purpose of this feature is to make confidential information only accessible on the lead up to an employee's last day, but also to provide a more tailored offboarding experience where certain checks can be made available in week 1, week 2, etc.  Note: If an end date restriction is in place, then the checklist item will be available for the user to see, but it's not accessible. - You can enter any number up to 999. - It is important to consider when using this feature that checklist items should be ordered correctly and must be placed before any checklist items that do not have this restriction.
Optional Information	This field allows you to add more detail to explain the nature of the task to the employee. This can aid completion or inform the employee why certain information is being requested.

4.1.1. Item Types

The below screenshot and table provide an overview of items types on the *Add Offboarding Item* screen.

Item Type	Overview
Input Items	If the <i>Item Type</i> is <i>Input Items</i>, then the below options are available from the Offboarding Item drop-down list. • Upload profile photo • Update next of kin • Update address • Update equal opportunity • Update bank details • Update bio Note: If data already exists that has been populated by an employee previously, in the scenario of an employee leaving the business or if already populated by HR, the employee can review and update this information accordingly.

Item Type	Overview
Custom Pages	If the <i>Item Type</i> is Custom Pages, any custom pages created are available for the user to select to be part of the checklist. Pages can be assigned to employees to consume additional content created for them as part of their leaver journey.
User Defined Forms	If the <i>Item Type</i> is (UDF) User Defined Items, the employee can complete the form to add a new UDF against their HR record. If this UDF type already exists against the employee record, the last created UDF record of this type is loaded. This information is displayed to the employee to update. This uses 'employee' type UDFs only.
Policies	If the <i>Item Type</i> is Policies, any policy documents or employee handbooks that have been uploaded into the system are available to add to the checklist.
Documents Requested	If the <i>Item Type</i> is Documents Requested, employees can upload relevant documents to add to their employee record. If a document already existed in their employee file, it will display to the employee, to select from. If required employees can upload a newer version of the document requested, or if the existing document is up to date, then they can simply mark the task as complete. This process does not create a new user defined form record. ...

**Note:**

Checklists should be configured with global items present first, which every employee should have completed during their time in your organisation. This minimises the creation of duplicate checklist items assigned to diverse groups.

4.2. Create / Maintain a Checklist Item

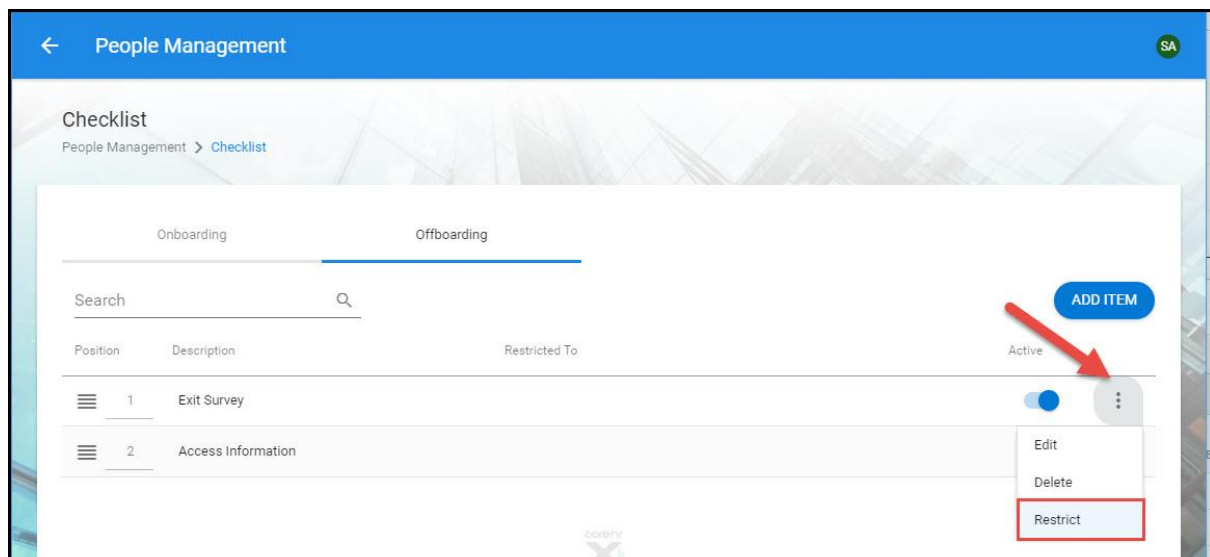

Further guidance on how to create a checklist item is captured within the *Employee Onboarding: How to Configure - User Guide*. This includes

- Input Item
- Custom Page Item
- UDF Item
- Policies Item
- Documents Requested Item
- Employee Documents
- Surveys

4.3. Restrict Checklist Items

To restrict a checklist item:

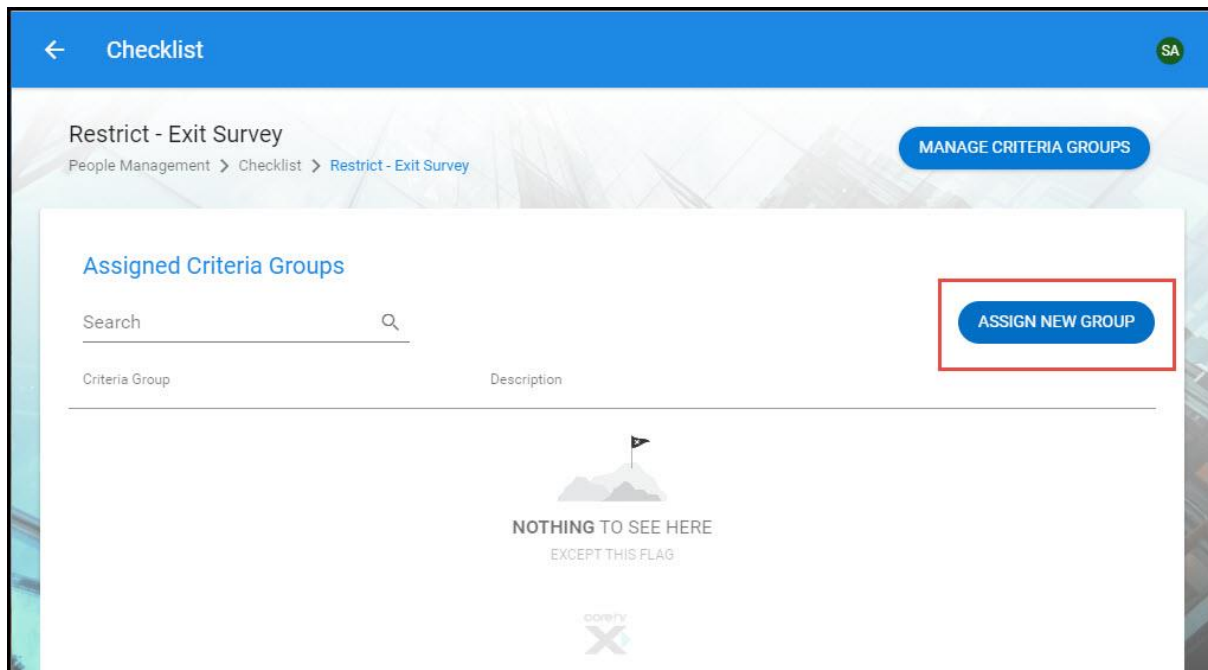

1. Quick jump to the *Social Hub Configuration widget*.
2. Select **View Offboarding Checklist**.
3. Click the  button on the applicable offboarding item.
4. Select **Restrict**.

The *Restrict* screen displays, for the checklist item.

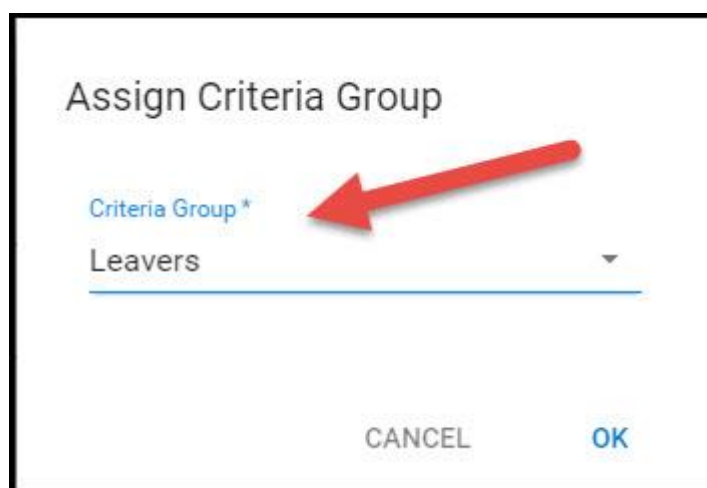

Currently there are no *Criteria Groups* assigned to the Checklist Item, therefore, no restrictions.

5. Select **Assign New Group**.

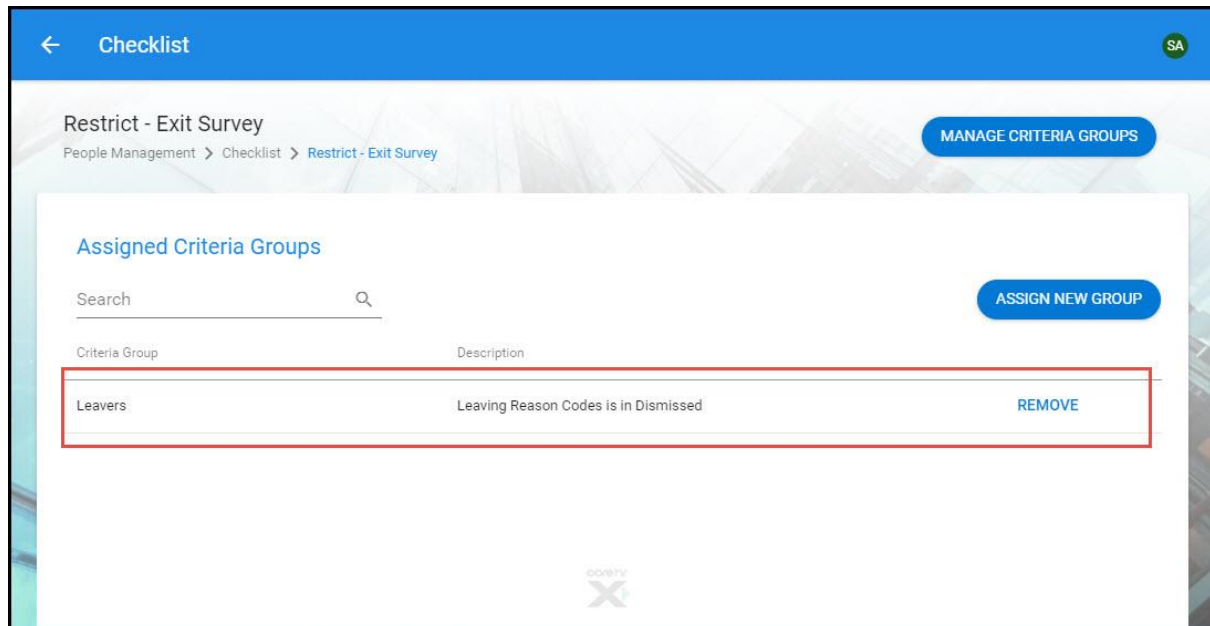

The *Assign Criteria Group* pop-up displays.

6. Select the applicable *Criteria Group* from the drop-down list.
7. Click **OK**.

Employee Offboarding: How to Configure - User Guide

The *Checklist Item* is now restricted to only be available to employees within the applicable *Criteria Group*. This process can be repeated to add multiple *Criteria Groups*.

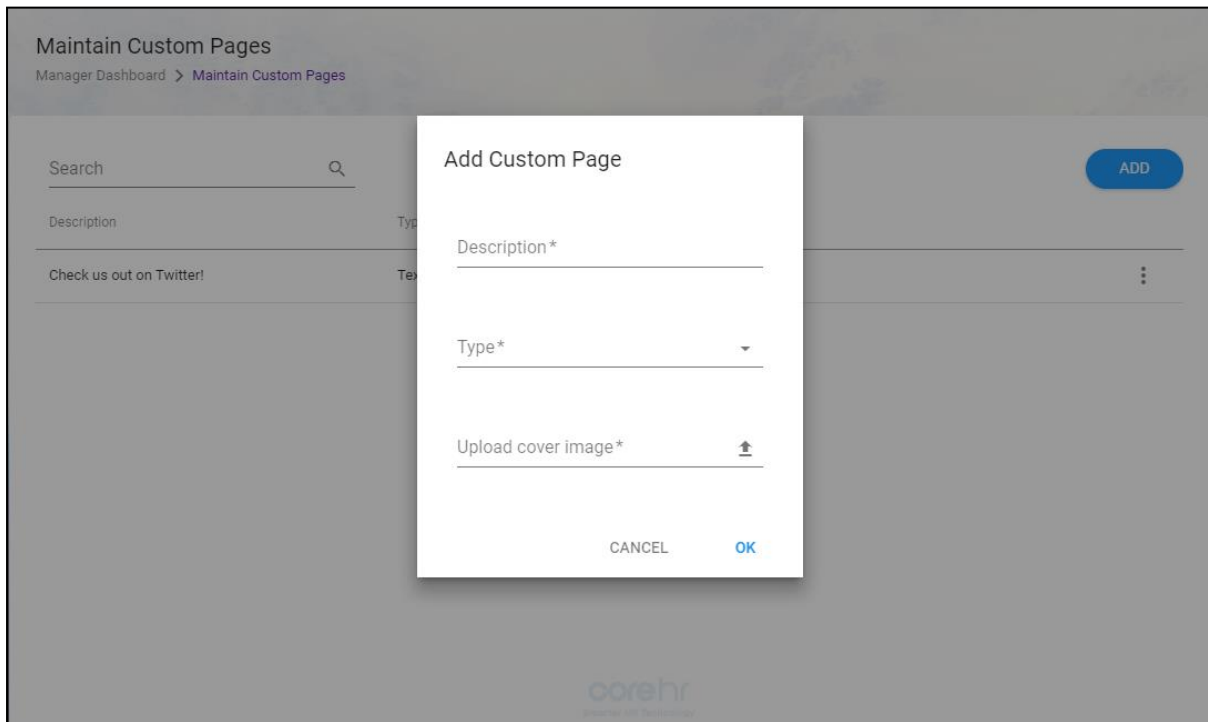

See [7. Staff Grouping section](#) for guidance on how to create criteria groups.

5. Custom Pages

5.1. Add Custom Page - Screen Overview

Employee offboarding provides the ability to create custom content pages which can then be added to the main *Social Hub* dashboard or can be added as a checklist item for an employee to review and complete.

The below screenshot and table provide an overview of the *Add Custom Page* screen.

Fields available on the *Add Custom Page* screen are listed below. These are all mandatory fields.

Screen Field	Explanation
Description	You must enter a description for the page. This description is visible on the employee <i>Tasks Outstanding</i> list, and the <i>Social Hub</i> dashboard, if applicable.
Type	You must select a page type. See the 5.1.1 Custom Page Types table for further information on the types of custom pages that can be added.
Upload cover image	You must upload a cover image for the page. This cover image displays on the <i>Social Hub</i> landing page, if applicable.

5.1.1. Custom Page Types

Page Type	Explanation
Text	General text can be added to this page.
Video	Embedded video links can be displayed on this page, along with general text.  Note 1: You must specify the specific embedded link, for example: Incorrect Link: 'https://www.youtube.com/watch?v=ABC' Correct Link: 'https://www.youtube.com/embed/ABC' The embedded link may differ depending on where the content is being referenced from, the above links are used for providing an example only.  Note 2: - This requires configuration to work, you must consult with your organisations own Security/IT team before configuring. For example, sites that do not violate internal policies. This will determine the external video content that can be displayed inside the CoreHR application. - A link may navigate to a whitelisted site, however, the site itself may have its own security restrictions blocking content from being displayed in other applications. CoreHR does not have control over this.
Map	This provides a google map address lookup, to display on an embedded map page. Drop pins can be added to the map, along with adding general text to the page.
Link	This provides external links on a page. The employee can navigate to external resources. General text can be added to this page.

Image

Numerous images can be added to this page, along with general text. Employees can then view these images upon selection. A title must be added to each image uploaded.

5.2. Create / Maintain a Custom Page

Further guidance on how to create and maintain a custom page is captured within the *Employee Onboarding: How to Configure - User Guide*. This includes

- Link Pages
- Text Pages
- Video Pages
- Map Pages
- Image Pages

5.3. Restrict Custom Pages

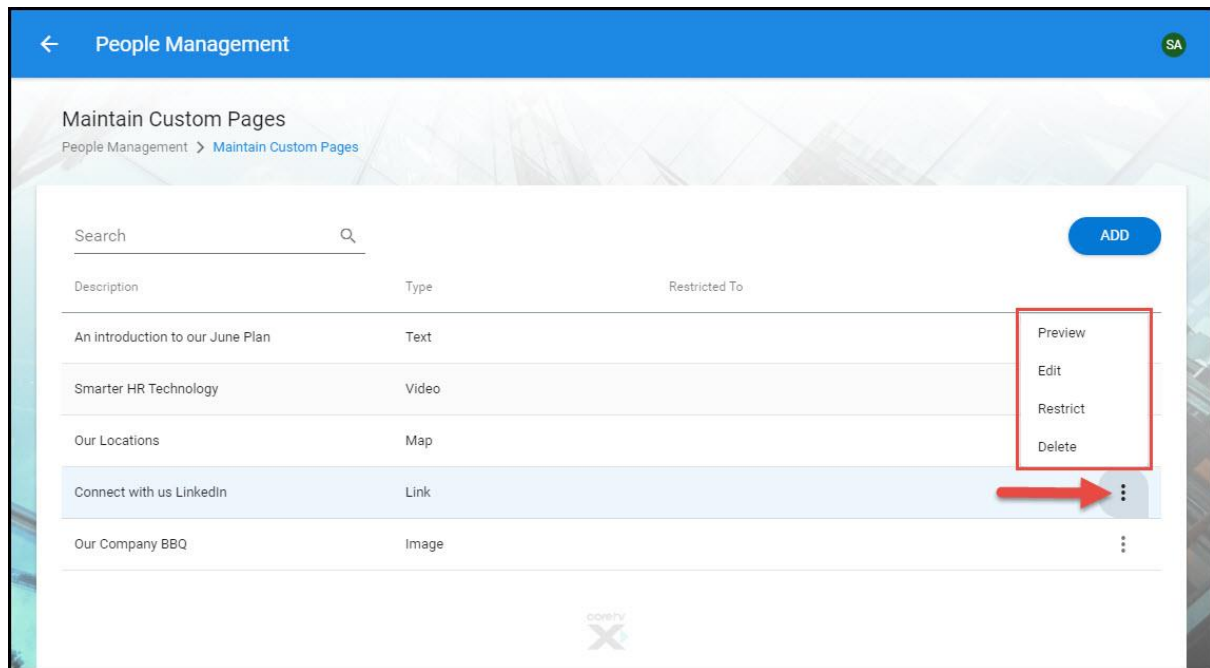

It is possible to define restriction rules to add to *Custom Pages*.

- If added to the *Social Hub* dashboard, the *Custom Page* only displays to users who reside within the *Criteria Groups* it is restricted to.
- If the *Custom Page* does not have restriction rules applied, then it is available to all employees to view, provided it is added to the *Social Hub* dashboard.
- If added as part of a checklist item, then the restriction applied here automatically applies to the checklist.

To restrict a custom page:

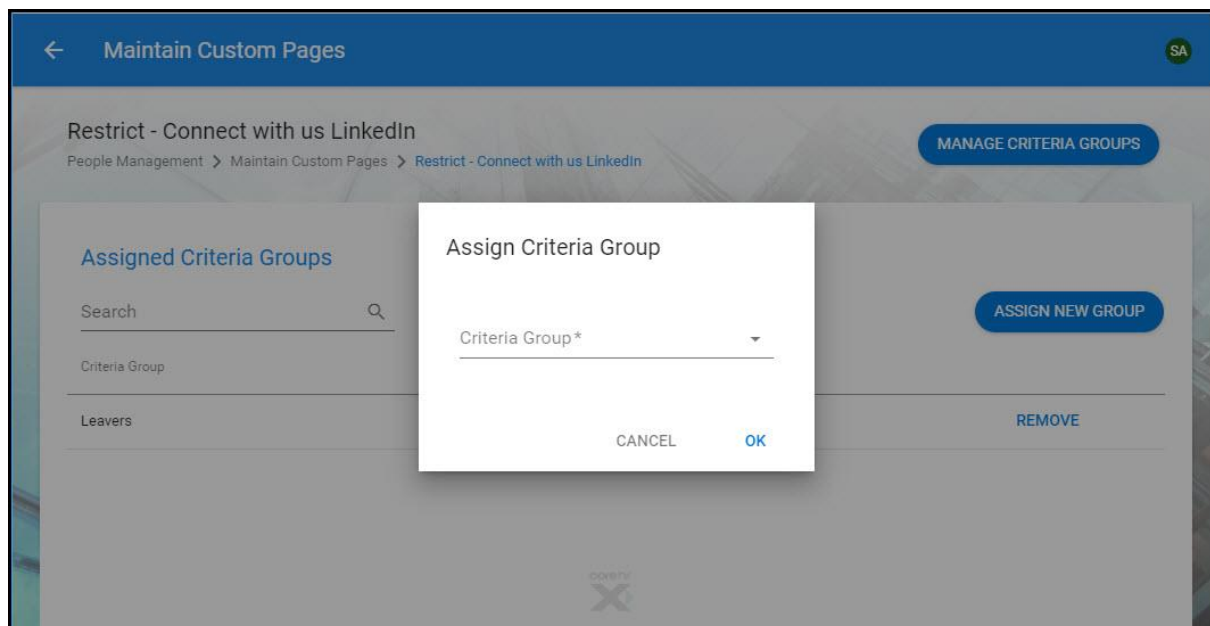

1. Quick jump to the *Social Hub Configuration widget*.
2. Select **View Maintain Custom Pages**.
3. Click the  button on the applicable page.
4. Select **Restrict**.

Employee Offboarding: How to Configure - User Guide

The *Assigned Criteria Groups* screen displays.

5. Select **Assign New Group**.

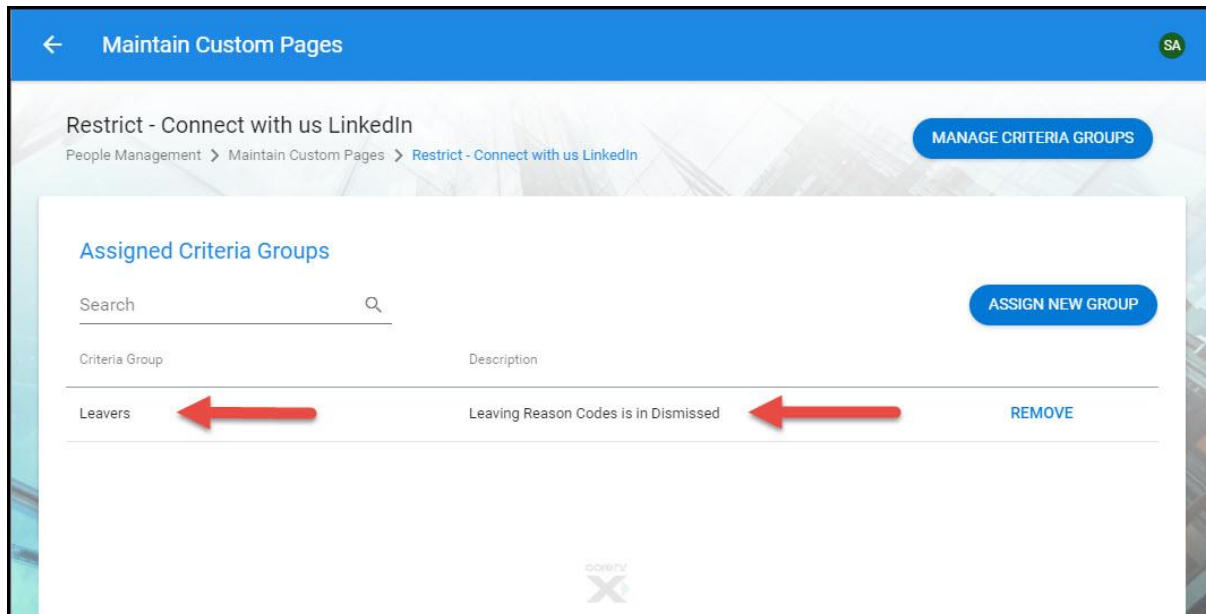

The *Assign New Criteria Group* pop-up displays.

6. Select the applicable *Criteria Group* from the drop-down list.
7. Click **OK**.

Employee Offboarding: How to Configure - User Guide

The *Custom Page* is now restricted to only be available to employees within the applicable *Criteria Group*. This process can be repeated to add multiple *Criteria Groups*.

See [Staff Grouping](#) for guidance on how to create criteria groups.

6. Policy Documents and Handbooks

The *Policy Documents and Handbooks* area allows you to maintain the various documents that should be reviewed by a leaver as part of a checklist item. For example:

- Leaver Policies
- Leaver Handbooks

Note:

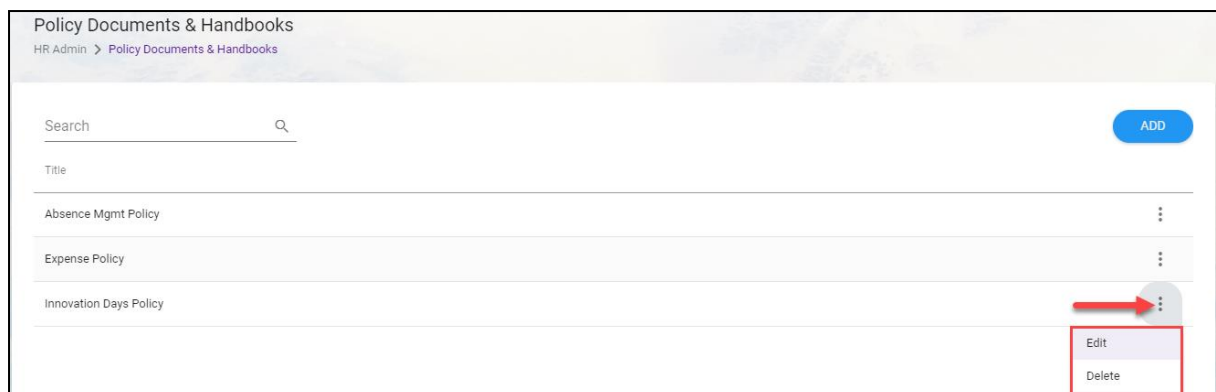

If a checklist item has been released with documents, and has been completed by employees, attaching another document to the item within the *Add Policy* area will not re-release the checklist item for review.

Example scenarios:

- If employees reviewed the checklist item in their *Completed* list, the updated document displays.
- If employees are still to complete the checklist item in their *Tasks Outstanding* list, the updated document displays.

Therefore, the correct process to follow, to ensure that all employees will review the updated documents, is to create a new checklist item.

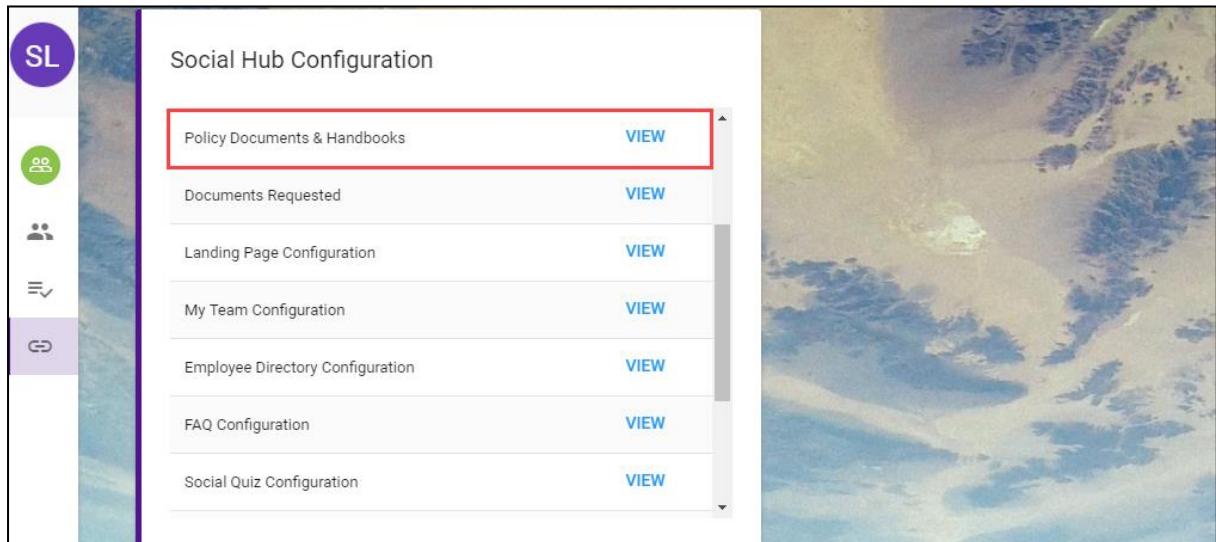

The *Policy Documents & Handbooks* screen lists all documents that have been uploaded to the system. It is possible to: add new, edit, or delete existing documents.

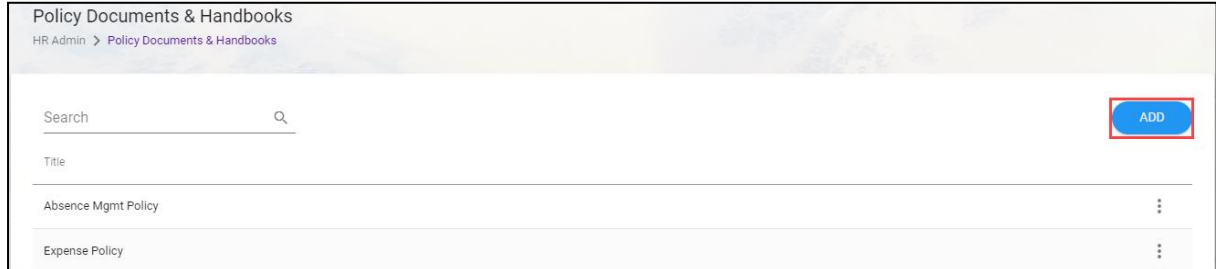

6.1. Add Policy Documents and Handbooks

To add a new policy document or handbook:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View** *Policy Documents & Handbooks*.

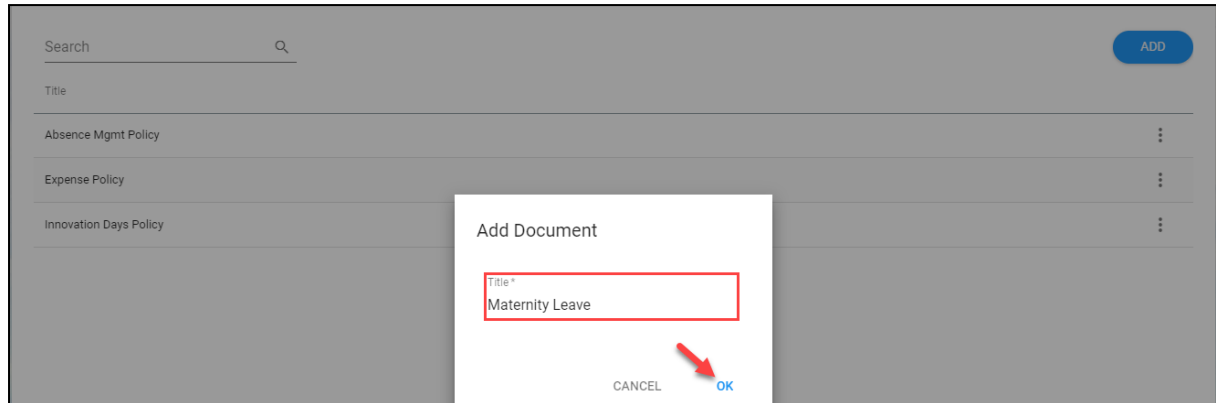

3. Click **Add**.

An *Add Document* pop-up displays.

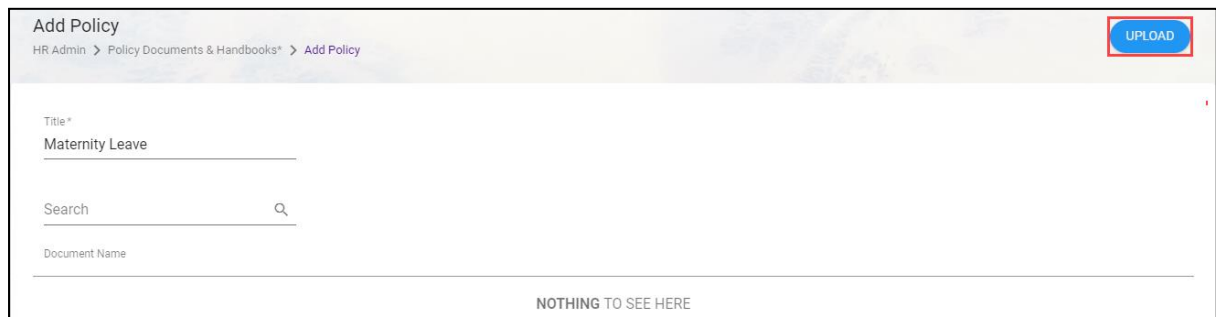

4. Enter a document *Title*.
5. Select **OK**.

Employee Offboarding: How to Configure - User Guide

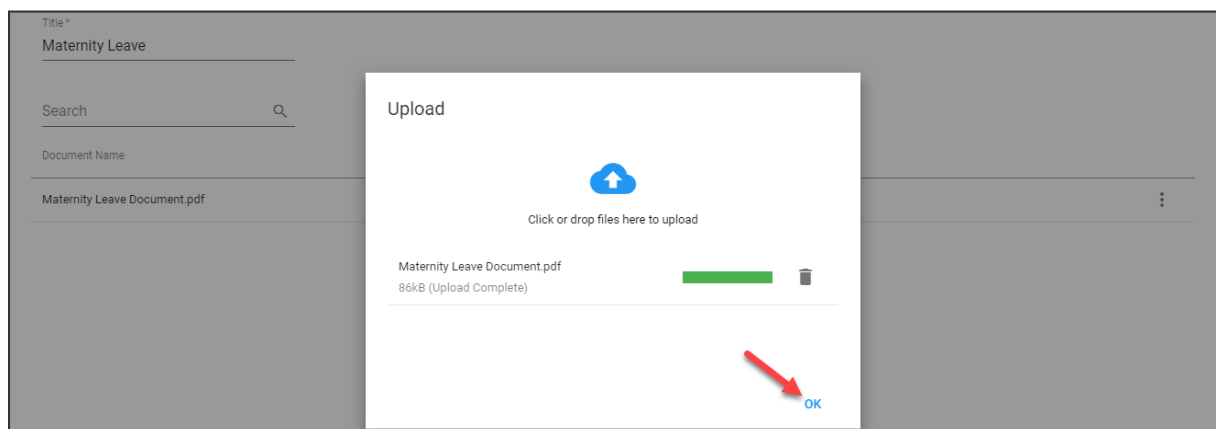

The *Add Policy* screen displays.

6. Select **Upload**.

7. Upload the applicable file.

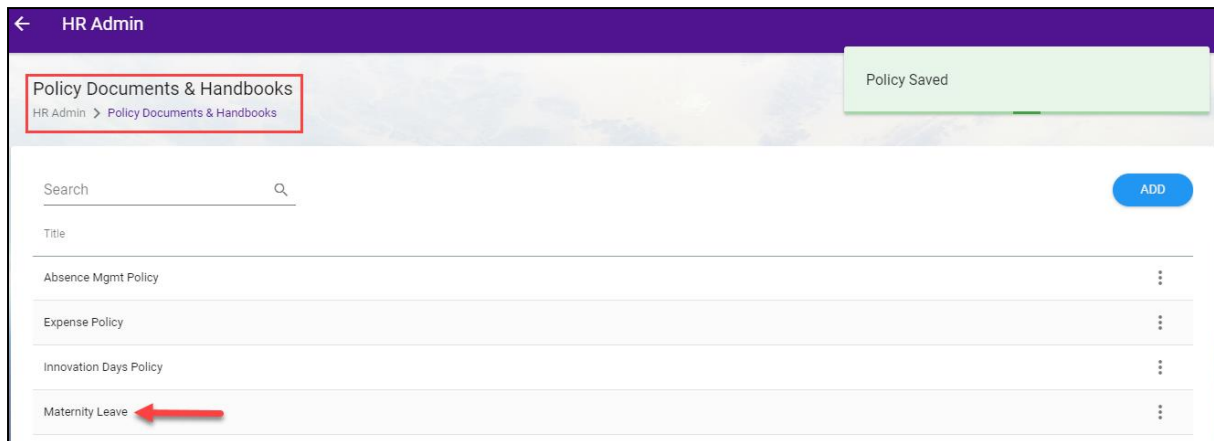

8. Select **OK**.

You are returned to the *Policy Documents & Handbooks* screen.

The uploaded document has been saved successfully.

Employee Offboarding: How to Configure - User Guide

The screenshot displays the HR Admin interface. At the top, a purple header bar contains a back arrow and the text "HR Admin". Below this, a green notification box states "Policy Saved". The main content area has a light blue background with a search bar and a blue "ADD" button. A table lists policy documents, with "Maternity Leave" highlighted by a red arrow. The breadcrumb "HR Admin > Policy Documents & Handbooks" is visible in the top left of the content area.

HR Admin

Policy Documents & Handbooks

HR Admin > Policy Documents & Handbooks

Search

ADD

Title

Absence Mgmt Policy	⋮
Expense Policy	⋮
Innovation Days Policy	⋮
Maternity Leave	⋮

7. Documents Requested

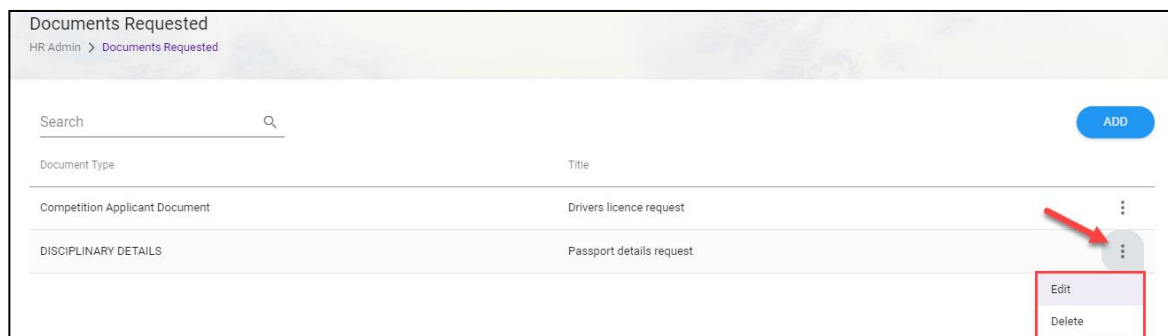

The documents requested area allows you to maintain the various documents that are requested from employees as part of checklist items. Document types are added by selecting a document from the standard list of document types reference data.

Note:

- If a document requested is deleted from the *Documents Requested* screen, it will affect the employee's ability to complete their remaining checklist items that contain this document.
- When the employee is completing a checklist item that is linked to one of these documents, the system displays any existing documents of this same type, that are already loaded against the employee record.

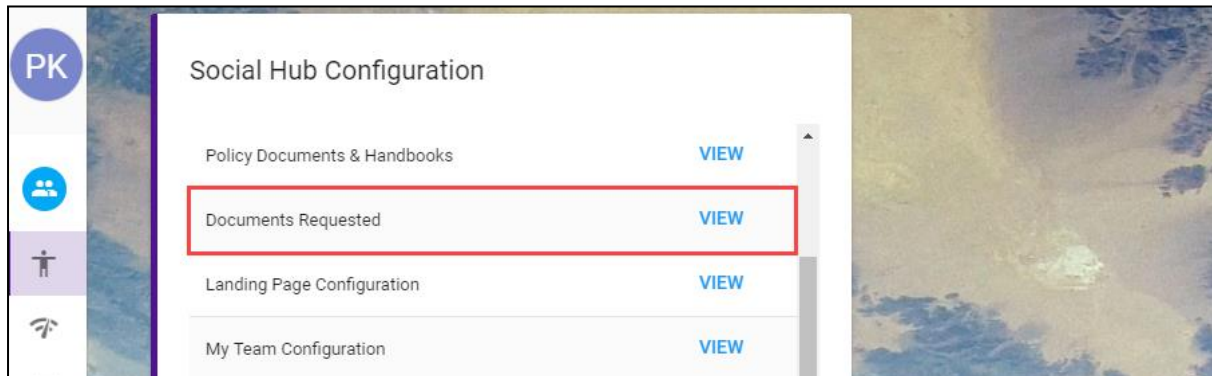

The *Documents Requested* screen lists all document types that have been set up on the system. It is possible to: add new, edit, or delete existing documents.

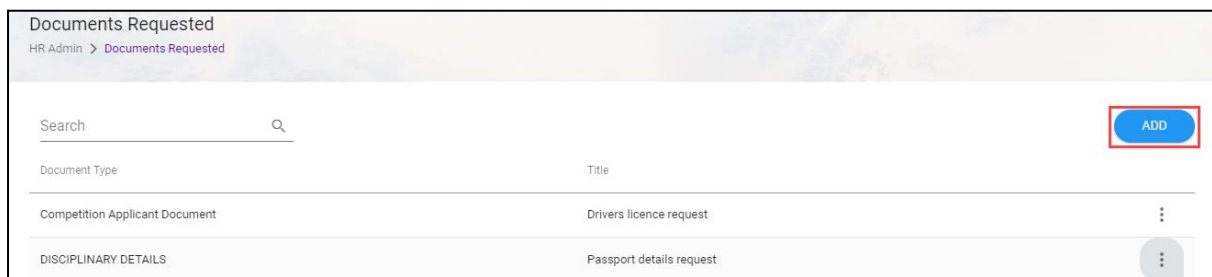

7.1. Add Documents Requested

To add a new policy document or handbook:

1. Quick jump to the *Social Hub Configuration widget*.
2. Select **View Policy Documents & Handbooks**.

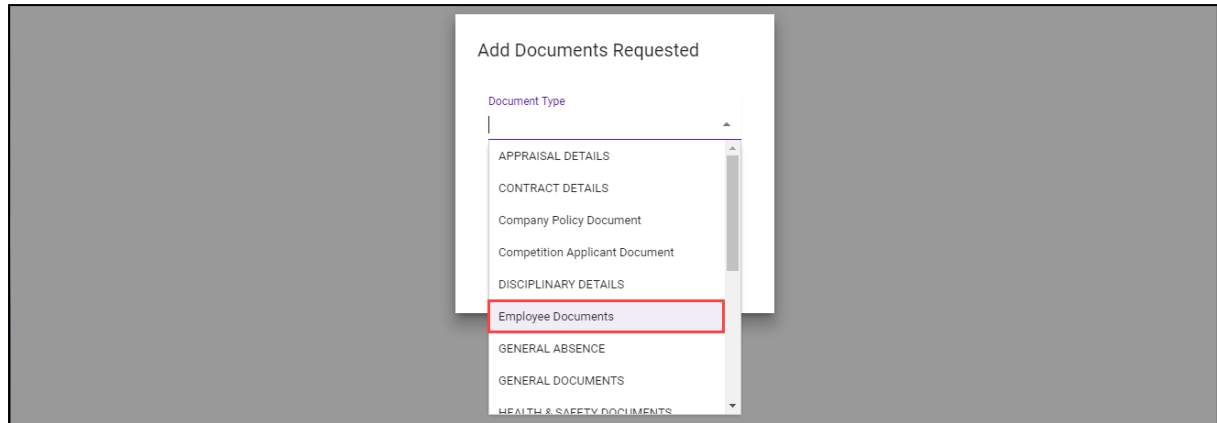

3. Select **Add**.

The *Add Documents Requested* pop-up displays.

4. Select the type of document you are requesting from the *Document Type* drop-down list.
In this example, we are requesting the employee to submit a copy of their passport, therefore the document type selected from the standard list of document types reference data is 'Employee Documents'.

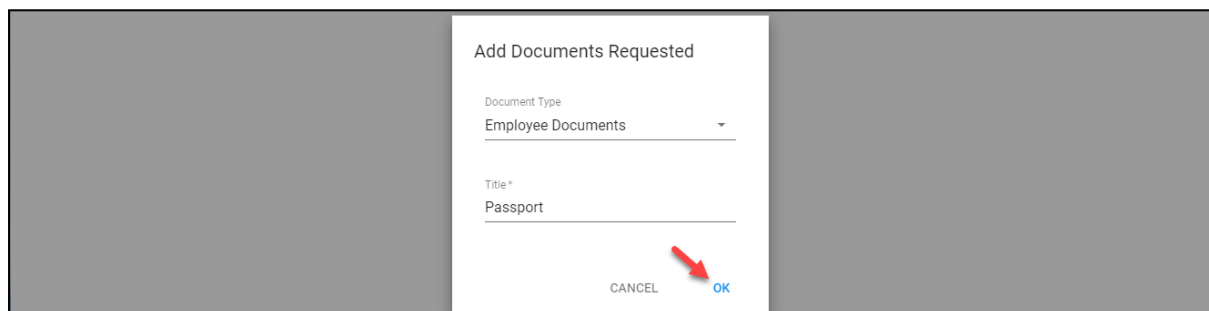

Employee Offboarding: How to Configure - User Guide

5. Enter a *Title* for the document.

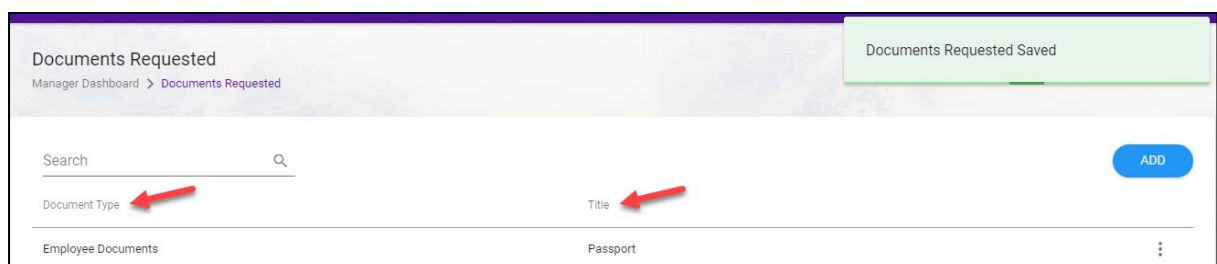

This is the name of the document requested that is displayed to the employee, on their checklist item.

6. Select **OK**.

The *Documents Requested* screen displays.

In this example, we can now see the *Document Type* and *Title* has been added to the list.

8. Employee Offboarding Dashboard (Landing Page)

Content pages, and their position, that display on the *Employee Offboarding* dashboard landing page are added within the *Landing Page Configuration* screen. The below types of pages can be added to the *Landing Page*:

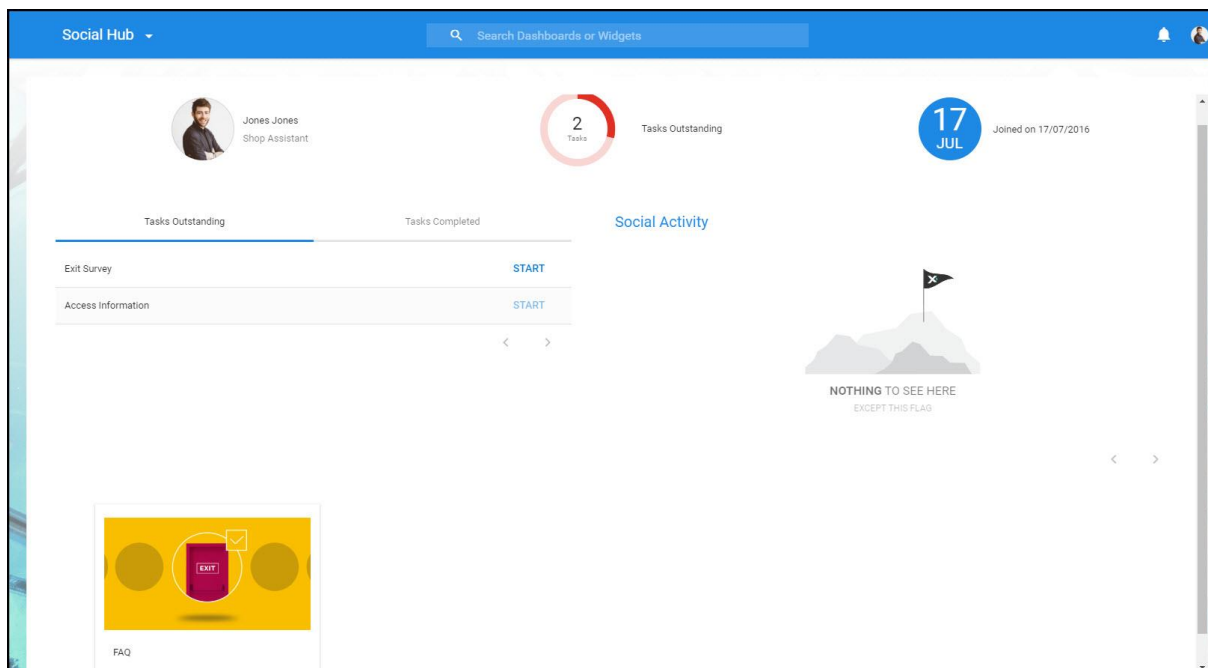

- Custom pages
- System pages

Note:

- Landing page content specific to leavers can be created in the standard way and can be made available specifically to leavers by using a restriction rule based on leaving reasons.
- Leaving reasons can also be utilised for the purposes of omitting staff from the offboarding process in specific scenarios e.g. involuntary resignation.

An example of the *Landing Page*, with added *System Pages* for a Leaver is shown in the below screenshot.

 **Note:** For further information on how to configure items on the Social Hub Landing Page, refer to the *Employee Onboarding v28: How to Configure - User Guide* document.

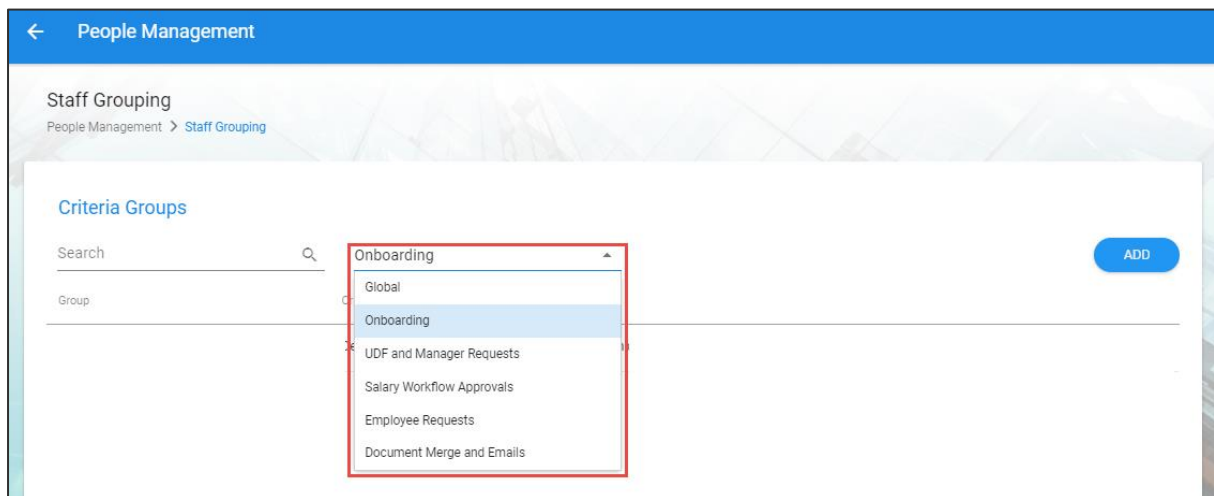

9. Staff Grouping

The *Staff Grouping* screen allows you to create and manage all *Criteria Groups* used within the *People Management* product. These area groups are listed below:

- Onboarding / Offboarding
- UDFs
- Salary Workflow Approvals
- Employee Requests
- Letters
- Global

It is possible to create *Global - Criteria Groups*, that can be used across all the areas listed above, therefore, creating separate groups for each area is not needed.

The below screenshot shows the *Staff Grouping* screen and grouping areas available from this screen.

By creating *Criteria Groups* within *Employee onboarding*, this then allows you to restrict any applicable items to only be visible to specified *Criteria Groups* within Onboarding and Offboarding. Items that can be restricted are listed below:

- Checklist items
- Custom pages
- System pages

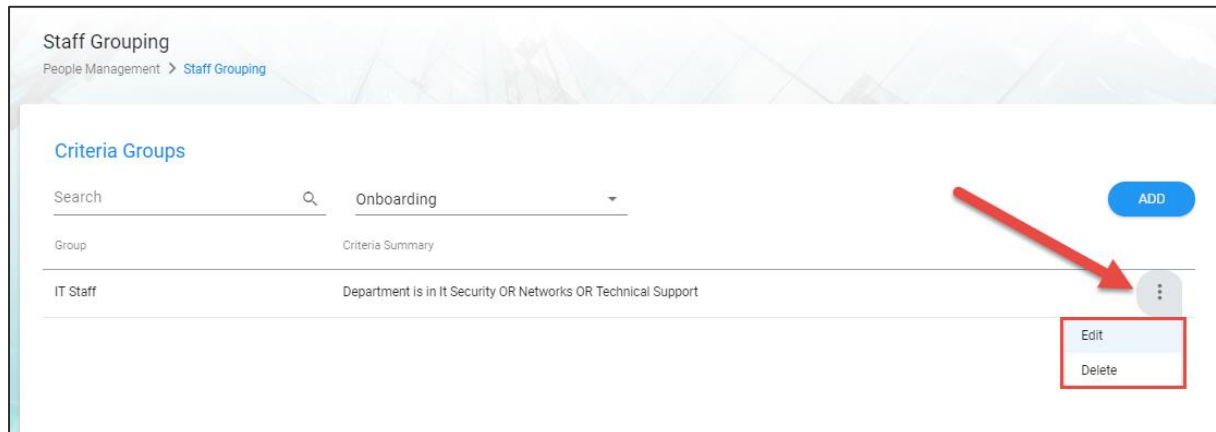

- Welcome board cards

Note:

When restricting Employee Offboarding content such as checklist items, pages, and welcome board cards to certain groups of employees, the *Criteria Groups* available to choose from in the applicable drop-down lists are drawn from a combined list of the following group areas:

- Onboarding (including Offboarding)
- Global

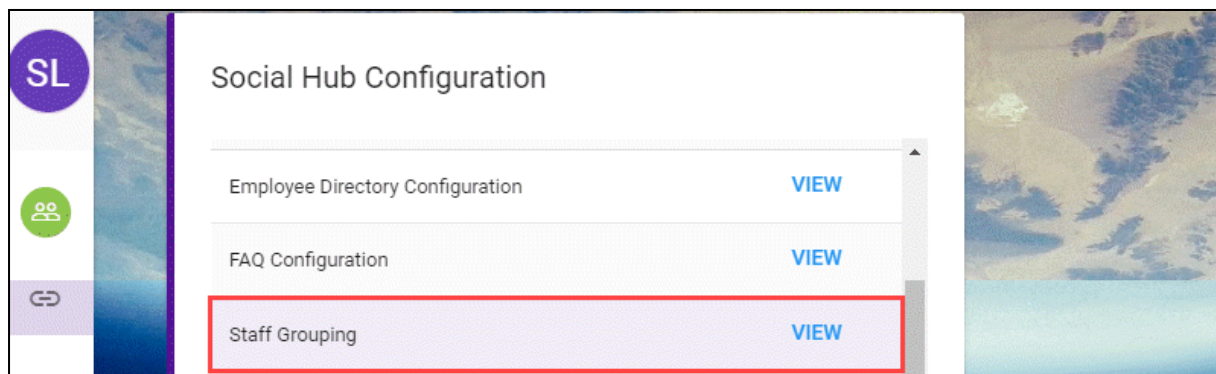

The *Staff Grouping* screen lists all *Criteria Groups* that have been set up on the system. The below screenshot shows that there is one *Criteria Group* added for the 'Onboarding' area, including offboarding. From this screen, it is possible to add new, edit, or delete existing *Criteria Groups*.

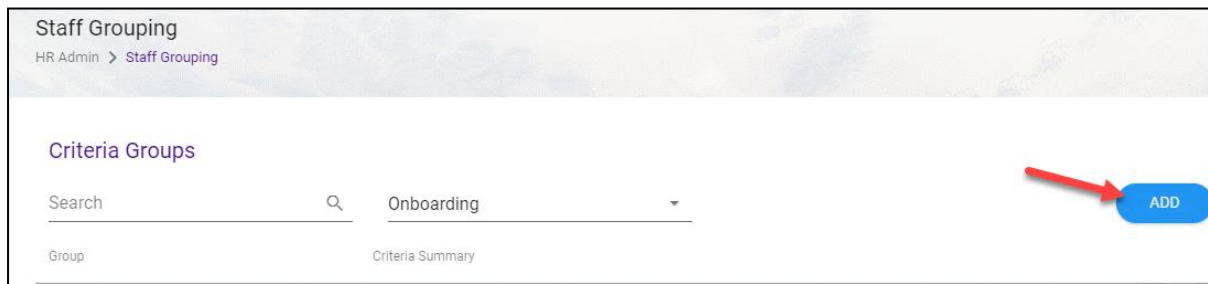

9.1. Creating Criteria Groups

To create a criteria group:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View Staff Grouping**.

3. Click **Add**.

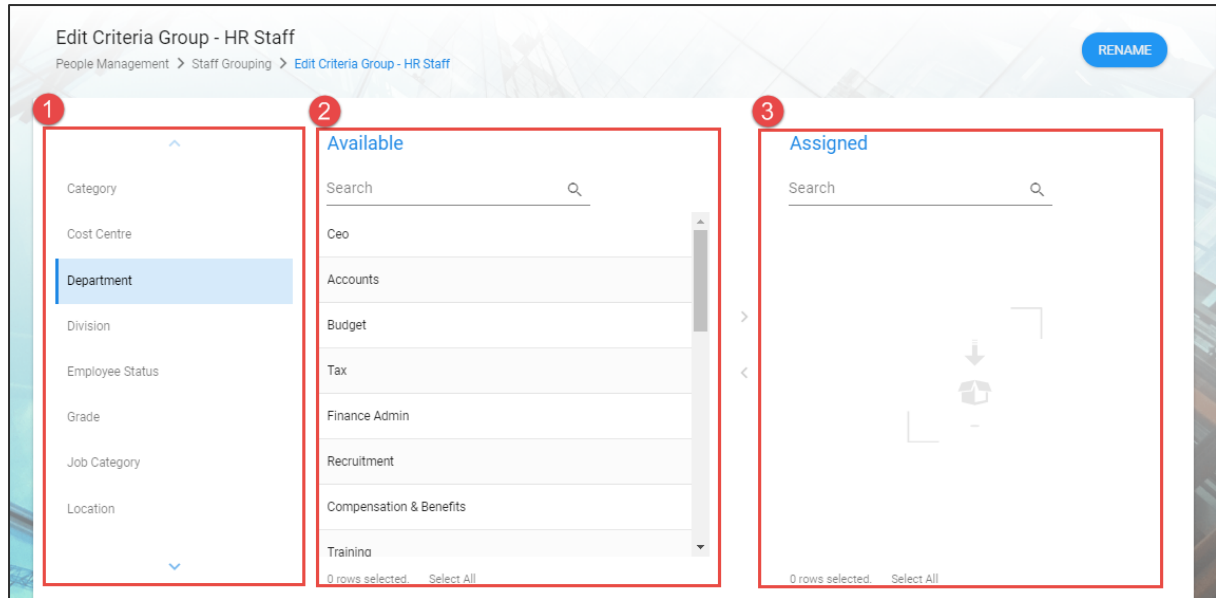

The *Edit Criteria Group* screen displays.

Screen Overview:

Criteria Groups are made up of employees who hold the same specified attributes on their contracts.

For example:

- Select the applicable contract attribute type in 'Section 1' of the screen below.
In this example, the 'Department' attribute is selected.
- 'Section 2' of the screen then populates with all available options for this attribute.
In this example, all 'Departments' within the organisation are listed.
- Next, select the applicable 'Departments' from the *Available* list and add them to the *Assigned* list (Section 3).
In this example, all employees who hold the assigned Department on their contract are then present on the *Criteria Group*.

4. Select the applicable **contract attribute** from the list.

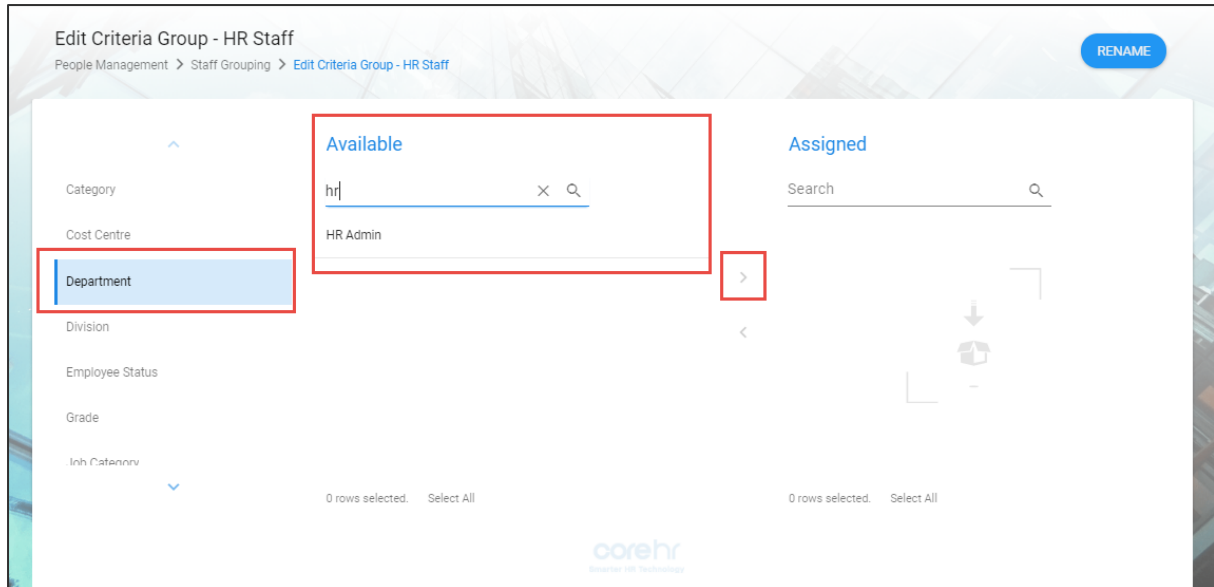

In this example, for the 'HR Staff' *Criteria Group*, all employees who have the following attributes are required to be part of this group.

- a. Work within a 'HR' department.
- b. Are 'Permanent' employees.

Therefore, the 'Department' attribute is selected.

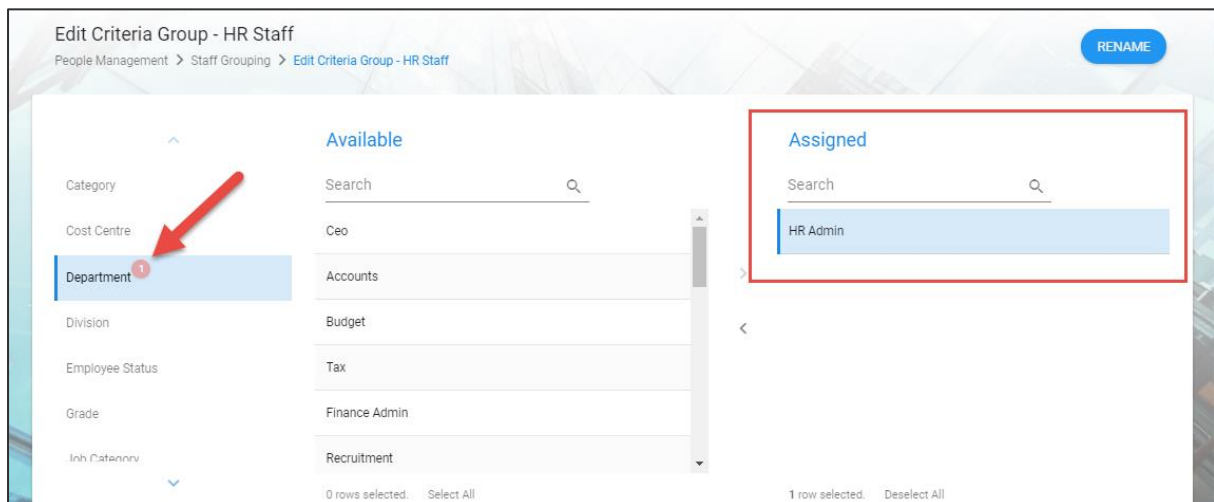

5. Click to highlight the applicable items within the *Available* list.
6. Select the  button to move the items into the *Assigned* list.

Employee Offboarding: How to Configure - User Guide

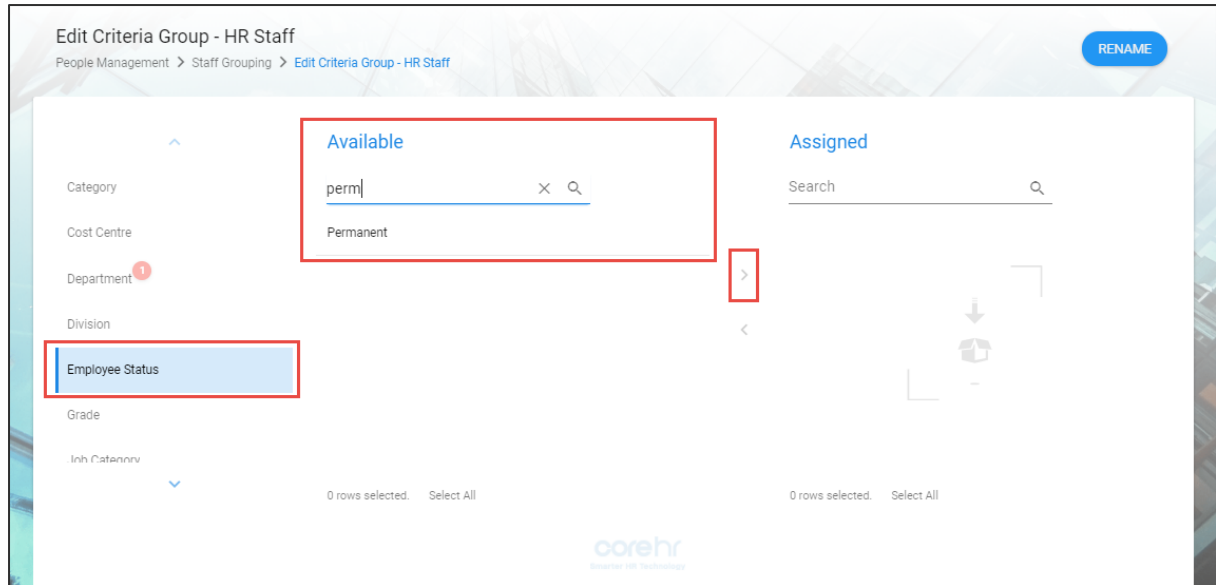

The required departments are now assigned to the *Criteria Group*.

The 'Department' attribute now has a tag attached to it. This indicates the number of departments that have been assigned to the *Criteria Group*.

7. Next, the 'Employment Status' attribute is selected.
8. Click to highlight the applicable items within the *Available* list.
9. Select the  button to move the items into the *Assigned* list.

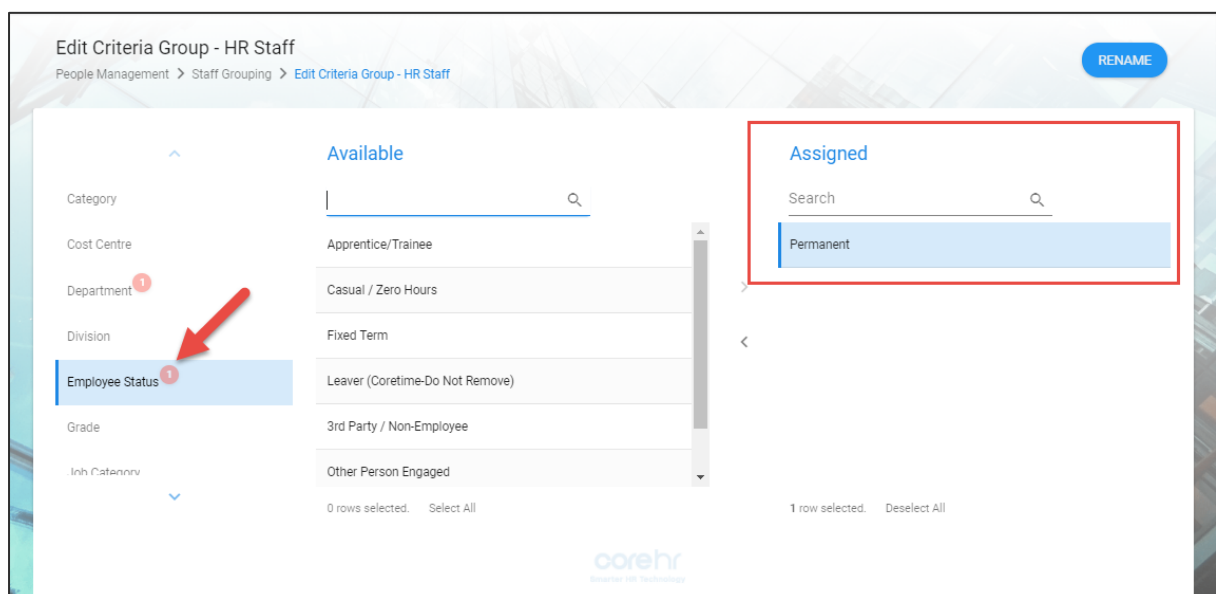

Employee Offboarding: How to Configure - User Guide

The required employment status is now assigned to the *Criteria Group*.

The 'Employment Status' attribute now has a tag attached to it. This indicates the number of employment statuses that have been assigned to the *Criteria Group*.

This screen saves automatically.

By returning to the *Staff Group* screen, the Criteria Group is added to the system. This screen details a *Criteria Summary* of the group for quick reference.

This Criteria Group can now be used for:

- Restrictions on onboarding & offboarding content.

Employee Offboarding: How to Configure - User Guide

- The *My Team Configuration* screen.

10. User Access to Employee Offboarding

10.1. Default Security Menu Profiles

Access to *Employee Offboarding* is controlled by *Security Menu Profiles*.

CoreHR provide 3 default pre-configured *Menu Profiles* that are applicable to the 3 general user types for Employee offboarding.

User Type	Menu Profile	Description
Administrator	OFFBOARD_ADMIN	Has access to offboarding progress menu options for the <i>Command Centre > Offboarding</i> screen Has access to all configuration screens i.e. <i>Employee Offboarding Configuration</i> widget and Content Security Policy screen.
Manager	OFFBOARD_MGR	Has access to offboarding progress menu options for the <i>My Team > Employee offboarding</i> screen No access to configuration.
Employee	OFFBOARD_EMP	Access to the <i>Social Hub</i> dashboard only. No access to configuration or progress screens.

 **Note:** CoreHR recommends that you use these default menu profiles to manage user access to *Employee Offboarding*.

10.1.1. Offboard Admin

Within the above default Menu Profile, the below *Menu Options* have been enabled by default.

Menu Option	Description
PEOPLE_MANAGEMENT_MENU.SOCIAL_ONBOARDING	Enables Social Onboarding & Offboarding
SOCIAL_ONBOARDING_MENU.SOCIAL_ACTIVITY	Social activity
SOCIAL_ONBOARDING_MENU.TEAM_CHART	Team chart
SOCIAL_ONBOARDING_MENU.SUGGESTIONS	Suggestions
SOCIAL_ONBOARDING_MENU.ADD_TEAM_PAGE	Add team page
SOCIAL_ONBOARDING_MENU.DELETE_TEAM_PAGE	Delete team page
SOCIAL_ONBOARDING_MENU.EDIT_TEAM_PAGE	Edit team page
SOCIAL_ONBOARDING_MENU.EDIT_TEAM_DESCRIPTION	Edit team description
SOCIAL_ONBOARDING_MENU.PROFILE_BIO	Profile bio
COMMAND_CENTRE_MENU.OFFBOARDING_PROCESS	Offboarding process
SOCIAL_ONBOARDING_MENU.CONFIG	Config

10.1.2. Offboard MGR

Within the above default Menu Profile, the below *Menu Options* have been enabled by default.

Menu Option	Description
PEOPLE_MANAGEMENT_MENU.SOCIAL_ONBOARDING	Enables Social Onboarding & Offboarding
SOCIAL_ONBOARDING_MENU.SOCIAL_ACTIVITY	Social activity
SOCIAL_ONBOARDING_MENU.TEAM_CHART	Team chart
SOCIAL_ONBOARDING_MENU.SUGGESTIONS	Suggestions
SOCIAL_ONBOARDING_MENU.ADD_TEAM_PAGE	Add team page
SOCIAL_ONBOARDING_MENU.DELETE_TEAM_PAGE	Delete team page
SOCIAL_ONBOARDING_MENU.EDIT_TEAM_PAGE	Edit team page
SOCIAL_ONBOARDING_MENU.EDIT_TEAM_DESCRIPTION	Edit team description
SOCIAL_ONBOARDING_MENU.PROFILE_BIO	Profile bio

MAIN_MENU.MSS_OFFBOARDING_PROGRESS	Access to Offboarding process on Manager Dashboard
Coreportal - MSS - Offboarding Progress	Access to Offboarding process on Manager Dashboard

10.1.3. Offboard_EMP

Within the above default Menu Profile, the below *Menu Options* have been enabled by default.

Menu Option	Description
PEOPLE_MANAGEMENT_MENU.SOCIAL_ONBOARDING	Enables Social Onboarding & Offboarding
SOCIAL_ONBOARDING_MENU.SOCIAL_ACTIVITY	Social activity
SOCIAL_ONBOARDING_MENU.TEAM_CHART	Team chart
SOCIAL_ONBOARDING_MENU.SUGGESTIONS	Suggestions
SOCIAL_ONBOARDING_MENU.ADD_TEAM_PAGE	Add team page
SOCIAL_ONBOARDING_MENU.DELETE_TEAM_PAGE	Delete team page
SOCIAL_ONBOARDING_MENU.EDIT_TEAM_PAGE	Edit team page
SOCIAL_ONBOARDING_MENU.EDIT_TEAM_DESCRIPTION	Edit team description
SOCIAL_ONBOARDING_MENU.PROFILE_BIO	Profile bio
MAIN_MENU.MSS_OFFBOARDING_PROGRESS	Access to Offboarding process on Manager Dashboard
Coreportal - MSS - Offboarding Progress	Access to Offboarding process on Manager Dashboard

10.2. Web Service Modules

The following web service modules need to be enabled for Offboarding profiles:

- SOCIAL
- PROFILE
- OFFBOARDING
- DOCUMENT
- USERDEFINEDFIELD
- ORG
- PEOPLE
- REFDATA
- CUSTOMFORM
