1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide guidance on how to configure the Recruitment module for PeopleXD users. PeopleXD users are broken down into the following groups:

1. Employees (i.e. internal applicants)
2. Managers
3. Recruitment administrators

This guide includes:

- What is configurable on the *Recruitment Dashboard* and how it is managed.
- A breakdown of default / standard security menu profiles that are available to be assigned to PeopleXD users.
- Advice on best practice configuration.

Note:

- This guide does not include:
 - Steps on how to create & amend menu profiles in the Security module.
 - Guidance on dashboard configuration, for the purpose of amending the dashboard tabs and widget layout .
 - Staff Request configuration.
- This guide also does not include the creation of Application Forms for applicants when applying for vacancies nor does it include the Careers Website configuration and design.

1.2. What is XD Recruitment?

Organisations require the right people, with the right skills in the right jobs at the right time. Recruitment is critical to this goal. To remain competitive in the area of recruitment, organisations must employ innovative recruitment approaches that match their strategic needs.

The XD Recruitment solution adopts a three tier approach of

1. Attract
2. Engage
3. Hire

This enables organisations to fulfil their recruitment requirements in a timely and cost efficient manner.

1.3. What is an Access Careers Website?

This is a feature of PeopleXD Recruitment where you can create a customised recruitment website for your own companies brand to be showcased to potential candidates and future employees. PeopleXD Recruitment is linked to your Career Website which means all applicants can apply via this website and then in turn be managed directly within PeopleXD.

By creating a vacancy profile within PeopleXD, it is immediately posted to your Careers Website with the exact configuration and details that you require potential candidates to apply with.

The below images show the Website Dashboard and Job Dashboard within the Career Website administration area.

XD Recruitment: Configuration Guide

The 'Jobs' management interface includes a search bar, a filter dropdown, and a table of job listings. The table has columns for Job, Status, Location, Applications, Created at, and Expire at. A 'REQUEST CSV' button and a '+ NEW' button are located at the top right. A 'SEARCH' button is next to the search bar. A 'RESET YOUR SEARCH' link is at the bottom right.

Jobs

REQUEST CSV + NEW

Find by title or reference SEARCH

FILTER BY RESET YOUR SEARCH

Job	Status	Location	Applications	Created at	Expire at	
Ken Mar4 002542	Live	Cork	3	05 Mar 10:20	31 Mar 00:00	
Support Analyst 002522	Live		2	03 Mar 15:05	18 Mar 00:00	
Test Internal 002503	Live		0	02 Mar 15:04	16 Mar 00:00	

1.4. Recruitment Lifecycle

This section provides a high-level overview of the key stages of the recruitment lifecycle on the XD Recruitment platform

Stage	Overview
Create Vacancy	The recruitment administrator(s) sets up the vacancy on PeopleXD. This includes details such as the advertising title, advertising dates, job description, salary, department, vacancy questions, interview panel etc. Note: If using Staff Requests, this automatically results in the creation of a vacancy for an approved request.
Advertise	The vacancy is published online for applicants to review and apply for. This is published: • On the PeopleXD Portal for <i>Internal</i> applicants (staff). • On the external Careers Website for <i>External</i> applicants.
Manage Applicants	Internal and external applicants submit an online application form via the Careers Website. The recruitment administrator(s) can view the applications in real-time as they are submitted and update the records as part of the shortlisting process.
Interviews	Interview rounds are setup on PeopleXD, and applicants are invited to attend these. Applicants may attend many rounds of scheduled interviews/assessments as the vacancy progresses.
Job Offer	A job offer is recorded for the successful applicant, including the details that are used to create the corresponding employee contract on People Management e.g. the Post Appointment, org structure, salary details etc.
Take on to HR	When an applicant has accepted the offer, their applicant record is flagged to HR in People Management as a successful applicant. From here, they can be setup as an employee, using their applicant and job offer details as a foundation to build their employee contract.

2. Recruitment Administrator Access

2.1. Recruitment Administrator Dashboard

To access the Recruitment Dashboard, follow the below steps:

1. Navigate to the Recruitment Dashboard
2. The Dashboard widget appears on screen.

Note:

- The *Dashboard* widget is displayed by default on the *XD Recruitment Dashboard*. This is not configurable - it cannot be hidden.
- The stats shown represent the full set of recruitment data and are not restricted based on your data access.

2.2. Default Security

2.2.1. Default Menu Profiles

Menu Profile	Explanation
CorePortal_Recruit_Admin	This is the standard menu profile used to grant access to employees or managers to the <i>XD Recruitment Dashboard</i> . You can add further menu options that are required to give access to further widgets to this profile.

CorePortal_Employee	This is the standard menu profile used to grant access to employees to the <i>Employee Dashboard</i> . Although nothing is pre-configured on this profile for Recruitment, you can add further menu options that are required to give access to employee self-service (ESS) widgets to this profile to quickly roll out access to the corresponding widgets.
CorePortal_Manager	This is the standard menu profile used to grant access to managers to the <i>Manager Dashboard</i> . Although nothing is pre-configured on this profile for Recruitment, you can add further menu options that are required to give access to manager self-service (MSS) widgets to this profile to quickly roll out access to the corresponding widgets.

 **Note:** The menu profiles above can be edited to add or remove menu options and web services as required for your organisation. Alternatively, you can create new menu profiles from scratch or copy and edit the existing menu profiles.

2.2.2. Default Menu Options

The below menu options are the minimum needed to access the *XD Recruitment Dashboard* from an administrator's perspective.

System	Menu Option	Screen Path / Explanation
CorePortal	eRecruitment	This turns on access to <i>XD Recruitment Dashboard</i> via the <i>Quick Jump</i> menu
CorePortal	CorePortal - Erecruitment - Toolbox - Recruitment Admin	This turns on access to the Recruitment Admin button via the <i>Toolbox</i> tab

 **Note:** Data access for Recruitment is covered later in section [2.4 User Access](#)

2.3. Default Admin Settings

2.3.1. Overview

These are parameters that relate specifically to the *XD Recruitment Dashboard* and the widgets and tabs that are configured on XD for Recruitment.

2.3.2. Updating Portal Admin Settings

To update these:

1. Go to the Administrator Dashboard
2. From the Site Manager widget, open the **Admin Settings** option.
3. Search for the parameter and update as required.

 **Note:** If these parameters are used and then disabled or enabled without proper functional testing, the recruitment module can be impacted. These are additional parameters that are not mandatory to review.

The following table lists all the relevant portal parameters linked to recruitment, a vacancy, an applicant etc.

Parameter	Explanation
Cp_Vac_App	Set to Y to turn on vacancy grading approval
Hide_Vacfil_Costcentre	Hide Cost Centre field in the Vacancy Filter
Hide_Vacfil_Division	Hide Division field in the Vacancy Filter
Hide_Vacfil_Vacancytype	Hide Vacancy Type field in the Vacancy Filter
Hide_Vacancy_Postadmin	Hide Post Admin field in Vacancy Details Two
Hide_Vacancy_Reportingto	Hide Reporting To field in Vacancy Details Two
Cp_Close_Vacancy	Close vacancy on successful hire of an applicant
Cp_Derive_Org_And_Loc	Derive vacancy organisation unit and location by location. Set value as LOC, AREA or NULL
Cp_Recruitment_Advpost	Advanced Vacancy Post Lookup.
Cp_Restr_Screen_Intpan	Option to display a restricted version of Vacancy Details for Interview Panel

Cp_Vac_Filter_Category	Display or hide the category combo box on the vacancy filter screen. Set value to Y to DISPLAY combo box. Set value to N to HIDE combo box
Cp_Vac_Filter_Emp_Stat	Display or hide the employee status combo box on the vacancy filter screen. Set value to Y to DISPLAY combo box. Set value to N to HIDE combo box
Cp_Vac_Filter_Sub_Status	Display or hide the sub status combo box on the vacancy filter screen. Set value to Y to DISPLAY combo box. Set value to N to HIDE combo box
Cp_Erc_Invite_Status	Applicant status used when applicant is invited to an interview
Cp_Recruit_Email_Frome	The email address that is used for applicant status updates
Cp_Recruit_Email_Fromn	The name of the sender that is used for applicant status updates
Cp_Rec_SI_Restrict	Restrict Interview Panel to Applicants of Shortlisting Assignments (Y/N)
Erq_Anon_Panel_Exp	Remove experience information and associated icon from the View Applicants Screen
Erq_Anon_Panel_Loc	Hide applicants country and associated icon from the View Applicants Screen
Erq_Anon_Panel_Position	Remove position information and associated icon from the View Applicants Screen
Erq_Flag_Serial_App	Show Multiple Vacancies on View Applicants
Erq_Unsuitable_For_Org	Unsuitable applicant status for organisation
Erq_Unsuitable_Status	Unsuitable Applicant Status
Cp_Erc_Pers_Contact	Applicant Email Contact Type for New Starter

2.4. User Data Access

2.4.1. Overview

The purpose of this section is to provide guidance on how to grant access for users to see the vacancy and applicant records on the Recruitment Dashboard.

This is driven by Department levels and needs to be granted for administration of the system. Once you have access to data, you are able to see all vacancies setup in that department and applicant information for those vacancies.

2.4.2. Granting Access to Recruitment Data

To enable specific User Access on Recruitment, follow these steps:

1. Select the **Toolbox** tab within the Recruitment Dashboard.
2. Open **Manage Users**.
3. Search for a user by name or employee number.
4. Select *Department* that user requires access to.
 - a. Search for the *Departments* required.
 - b. Toggle  on or off.
5. Click **Save**.

Note:

This can also be managed from the *Assign Access* screen in *People Management*. See the **Assign Access** user guide for more information

3. XD Recruitment Administrator Dashboard & Widgets

3.1. Baseline Configuration Overview

Note: The following points should be taken into consideration when configuring & viewing the Recruitment Dashboard & its accompanying widgets for the Employee Dashboard & Manager Dashboard:

- The Recruitment Dashboard can be re-configured and amended using the Dashboard Configuration screen. However, the items pre-configured as outlined in this guide are set-up as standard and to follow best practice configuration. Therefore, it is recommended that the set-up does not change.
- Access to the Recruitment Dashboard, Manager Dashboard, Employee Dashboard, tabs, screens & further options are controlled by Security Menu Profiles.
- Access to see vacancy records and applicants within these areas is controlled separately, via data access.

The Recruitment Dashboard is pre-configured with standard settings. The following table provides a list of the tabs and widgets that are available on install:

Tab	Widget
1. Dashboard	Dashboard
2. Vacancies	Vacancies
	Vacancies Stream
	Vacancies Chart

Tab	Widget
3. Toolbox	Toolbox
4. Applicants	Applicants
5. Interviews	Interviews

3.2. Dashboard Widget

Note:

- The *Dashboard* widget is displayed by default on the Recruitment Dashboard. This is not configurable - it cannot be hidden.
- The stats shown represent the full set of recruitment data and are not restricted based on your data access.

3.3. Vacancies Widget

3.3.1. Vacancies Widget Overview

In this section, all configurable elements within the *Vacancies* widget are covered including:

1. The widget itself.
2. All options available via the **Actions** button.
3. The **Add Vacancy** button.

3.3.2. Access to the Vacancies Widget

Note:

- This widget is pre-configured on the Recruitment Dashboard. This is available by default once you have access to the Recruitment Dashboard and cannot be hidden.
- The access to the data within this widget is managed via data access. See section [2.4 User Data Access](#).

3.3.3. Access to the Add Vacancies Button

This menu option controls the display of the **Add Vacancy** button.

System	Menu Option	Explanation
CorePortal	Create Vacancy	This turns on the Add Vacancy button on the <i>Vacancies</i> widget

3.3.4. Access to the Edit Vacancy Button

! Note:

- This button appears once you have data access to Departments (see section [User Data Access](#))
- Options within the *Vacancy* screen once you click **Edit Vacancy** become available once further Menu Options are enabled.

3.3.5. Access to the View Applicants Button

This menu option controls the display of the **View Applicants** button.

System	Menu Option	Explanation
CorePortal	eRecruitment - Applicant Status View	This turns on access to the View Applicants button on the drop-down list and in turn also controls access to view the Status History button.

3.3.6. Access to the Vacancy Overview Button

This menu option controls the display of the **Vacancy Overview** button.

System	Menu Option	Explanation
CorePortal	eRecruitment - Vacancy Summary Screen	This turns on access to view the <i>Vacancy Overview</i> screen on the <i>Vacancy</i> widget.

3.3.7. Access to the Assessment Overview Button

These menu options control the information within *Assessment Details* screen when the **Assessment Overview** button is clicked. The button always appears on screen, regardless of access.

Note:

- An assessment only appears on screen if an assessment has been setup on the vacancy for that applicant's status. The *Assessment Overview* option always appears regardless of access.
- The assessment feature is used in conjunction with the other standard recruitment features including the *Interviews* widget, the *Interview Panel* and *Shortlist Groups*.

System	Menu Option	Explanation
CorePortal	eRecruitment - Applicant Assessment View	This turns on access to view assessment data for an applicant, the Assessment Overview button and corresponding screen is not controlled by a menu option.
CorePortal	eRecruitment - Applicant Assessment Update	This turns on access to update assessment details for an applicant.

3.3.8. Access to the Copy Vacancy button

The following web service controls access to the Copy Vacancy button.

System	Menu Option	Explanation
Web Services	Create vacancy copy	This turns on access to the Copy Vacancy button.

3.4. Vacancy Detail Screen

System	Menu Option	Explanation
CorePortal	eRecruitment - Vacancy Details Screen	This turns on access to the <i>Vacancy Details</i> screen.

3.4.1. Vacancy Status

The following web services and menu options control access on the Vacancy Status screen.

System	Menu Option	Description
Web Services	Get vacancy volcanic	Get vacancy status/overview detail
Web Services	Update vacancy volcanic	Save vacancy status/overview detail
Web Services	Update vacancy volcanic unpublish	Expire a vacancy on volcanic
Web Services	Update vacancy volcanic publish	Publish a vacancy to volcanic
Web Services	Update vacancy volcanic relist	Update vacancy volcanic relist
CorePortal	CorePortal - Recruitment Vacancy Status	This controls access to the Vacancy Status section of a vacancy

3.4.2. Job Advert

The following menu option controls access to the Job Advert section of a Vacancy.

System	Menu Option	Explanation
CorePortal	CorePortal - Recruitment Job Advert	This turns on access to the Job Advert section.

Configuring the Reports to field

To ensure that the *Reports To* field on *Job Advert* screen is populated with the correct value(s), the manager's name must be validated against an org role.

1. Go to *CoreHR Back Office > CorePersonnel > Recruitment > Reference > Recruitment Parameters*.
2. Under the *Requisition Parameters* section, review the values for *Reporting to Org Group* and *Reporting to Role*. Update these values if necessary.

The screenshot shows a web interface titled "Requisition Parameters". It contains a checkbox for "Requisition Active" which is unchecked. Below it, there are two dropdown menus. The first is labeled "Reporting To Org Group" and has "Work Group" selected. The second is labeled "Reporting To Role" and has "Reports To Manager" selected. A red rectangular box is drawn around these two dropdown menus.

3. Go to *XD Portal > People Management dashboard > Data Centre > People Management*.

4. Select **Maintain Organisation Roles** and query the *Organisational Group* from step 2.

Organisational Roles Maintenance

Structure
ABC Solutions

Organisation Group
Work Group

Search Group Item

Find

Group Item	Description
FIN1	Accounts
A1	Branch Office 2
FIN2	Budget
CEO	Ceo
HR2	Compensation & Benefits
1	Default Workgroup

☒ Person Notification ☐ Email Notification

Role	Date From	Date To	Personnel Number	Forename	Surname	Interfaced	
Reports To Manager	15-Mar-2016		000039	Susan	Jennings	☐	...
Reports To Manager	07-Jun-2019		000146	Brian	O'Keeffe	☐	...

5. Select the *Group Item* which relates to the Organisation Group e.g. the *Work Group* code in this example above.
6. Add or remove an employee as a *Reports to Manager* to ensure they show up correctly on the vacancy.

Note:

- If using a Staff Request to create a vacancy, the reports to manager automatically populates based on how the staff request was created. For example, if a certain work group was added on the staff request, the field does not populate with the org role, it populates with the name of the manager with that assigned org role.
- If the vacancy is setup manually, the *Reports To* list contains all available reporting to managers.

3.4.3. Job Description

These menu options control the display of the *Job Description* tab.

System	Menu Option	Description
CorePortal	eRecruitment - Vacancy Detail Job	This turns on access to view the <i>Job Description</i> for a Vacancy
CorePortal	eRecruitment - Vacancy Detail Job - Update	This turns on access to edit the <i>Job Description</i> for a Vacancy

3.4.4. Current Questions

These Web Services control the display of the *Current Questions* tab.

System	Menu Option	Description
Web Services	Get question answer	Get answers associated with a question
Web Services	Create question answer	Create an answer attached to a question
Web Services	Delete question answer	Delete an answer associated with a question
Web Services	Update question answer	Update an answer associated with a question
Web Services	Get question category	Get question categories
Web Services	Create question category	Create a question category
Web Services	Update question category	Update a question category
Web Services	Delete question category	Delete question category
Web Services	Get question	Get question associated with a category
Web Services	Create question	Create a question
Web Services	Update question	Update a question
Web Services	Delete question	Delete a question
Web Services	Get vacancy question	Get questions assigned to a vacancy.
CorePortal	eRecruitment - Vacancy Detail Questions	This turns on access to view <i>Current Questions</i> against a Vacancy
CorePortal	eRecruitment - Vacancy Detail Questions - Update	This turns on access to edit and create questions against a Vacancy

3.4.5. Authorisation Details

One of the mandatory steps to carry out before posting a Vacancy to a Careers Website is authorising it for publishing. The image below highlights the details shown on this screen.

Vacancy Details: 002502 - Head of Technology
Recruitment > Vacancy Details: 002502 - Head of Technology

VACANCY DETAIL

- Vacancy Status
- Job Advert
- Job Description
- Current Questions
- Authorisation Details

Authorisation Details

Authorised By Sharon Looney

access PeopleXD

SAVE

The following menu option controls access to the Authorisation Details screen.

System	Menu Option	Explanation
CorePortal	eRecruitment - Authorise Vacancy	This enables access to the Authorise Vacancy screen. This action must be carried out prior to posting to Volcanic

3.4.6. Assessments

These below menu options control the information within *Assessment Details* screen when the **Assessment Overview** button is clicked. The button always appears on screen, regardless of access.

Note:

- An assessment only appears on screen if an assessment has been setup on the vacancy for that applicant's status. The *Assessment Overview* option always appears regardless of access.
- The assessment feature is used in conjunction with the other standard recruitment features including the *Interviews* widget, the *Interview Panel* and *Shortlist Groups*.

System	Menu Option	Explanation
CorePortal	eRecruitment - Applicant Assessment View	This turns on access to view assessment data for an applicant, the Assessment Overview button and corresponding screen is not controlled by a menu option.
CorePortal	eRecruitment - Applicant Assessment Update	This turns on access to update assessment details for an applicant.

3.4.7. Further Particulars

These menu options control the display of the *Further Particulars* tab.

System	Menu Option	Explanation
CorePortal	eRecruitment - Vacancy Detail Further Particulars	This turns on access to view the <i>Further Particulars</i> section for a Vacancy
CorePortal	eRecruitment - Vacancy Detail Further Particulars - Update	This turns on access to edit the <i>Further Particulars</i> section for a Vacancy

3.4.8. Comments

These menu options control the display of the *Comments* tab.

System	Menu Option	Explanation
CorePortal	eRecruitment - Vacancy Detail Comments	This turns on access to view the <i>Comments</i> section for a Vacancy
CorePortal	eRecruitment - Vacancy Detail Comments - Update	This turns on access to edit the <i>Comments</i> section for a Vacancy

3.4.9. Documents

These menu options control the display of the *Documents* tab.

System	Menu Option	Explanation
CorePortal	eRecruitment - Vacancy Documents View	This turns on access to view the <i>Documents</i> section for a Vacancy
CorePortal	eRecruitment - Vacancy Documents Update	This turns on access to edit & upload a document to the <i>Documents</i> section for a Vacancy

3.4.10. Interview Panel

Access to the *Interview Panel* section is managed via the individual items listed below. When at least 1 option is enabled, the *Interview Panel* section becomes available.

Interview Panel

These menu options control the display of the *Interview Panel* tab.

System	Menu Option	Explanation
CorePortal	eRecruitment - Interview Panel View	This turns on access to view the interviewers list who have been assigned to an interview schedule on a vacancy. This does not enable access to view the information behind the Interviewer Details button.
CorePortal	eRecruitment - Interview Panel Update	This turns on access to view and update the information behind the Interview Details button.

Shortlist Assignment

The 'Shortlist Group' feature is an extension of the 'Interview Panel' functionality, which allows for the creation of groups of applicants who are then assigned out to individual panel members to review.

This menu option controls the display of the *Shortlist* tab.

System	Menu Option	Explanation
CorePortal	Recruitment - Shortlisting Assessment Access	This turns on access to the <i>Shortlist Assignment</i> tab on <i>Interview Panel</i> .

To enable the 'Shortlist Group' feature, this is a global setting. This implies that for all vacancies, Shortlist Groups must be created for an interview panel member to access the vacancy and applicants on the *Interview Panel* widget.

1. Go to the Administrator Dashboard
2. From the Site Manager widget, open the **Admin Settings** option.
3. Search for parameter *cp_rec_sl_restrict*.
 - a. When set to 'Y': The Shortlist Group feature is active. Shortlist Groups must be created for the vacancy for an interview panel member to access the vacancy & applicants on the *Interview Panel* widget.
 - b. When set to 'N': The Shortlist Group feature is not active, which means there is no need to create a Shortlist Group. Once a panel member has been added to the vacancy, they have access to the vacancy & applicants on the *Interview Panel* widget without the need to be added to a Shortlist Group.

3.4.11. Events

These menu options control the display of the *Events* tab. When at least 1 option is enabled, the *Events* section becomes available.

The screenshot shows the 'Vacancy Details: 002502 - Head of Technology' page. On the left, a sidebar menu has 'EVENTS' expanded, showing 'Applicant Events' and 'Vacancy Events'. Below this are 'COSTS AND ADVERTISING' and 'SCHEDULES'. The main content area is titled 'Applicant Events' and is split into 'Available' and 'Selected' sections. Both sections have a 'Search Events' field and a 'Description' field. The 'Selected' section shows a list with one item, 'Cv Received'. At the bottom right is a green 'SAVE' button. The 'access PeopleXD' logo is at the bottom center.

System	Menu Option	Explanation
CorePortal	eRecruitment - Vacancy Events View	This turns on access to view Applicant and Vacancy Events on the Vacancy Details screen
CorePortal	eRecruitment - Vacancy Events Update	This turns on access to update Applicant and Vacancy Events on the Vacancy Details screen

Note: Both Menu Options above control the *Applicant Event* screen and the *Vacancy Event* Screen. There is no split in access.

3.4.12. Costs and Advertising

These menu options control the display of the *Costs and Advertising* tab. When at least 1 option is enabled, the *Costs and Advertising* section becomes available.

Costs

Once access is provided via the menu options below, the user has access to the *Costs* screen

System	Menu Option	Explanation
CorePortal	eRecruitment - Vacancy Costs View	This turns on access to view the <i>Costs</i> section for a Vacancy
CorePortal	eRecruitment - Vacancy Costs Update	This turns on access to add to and edit the <i>Costs</i> section for a Vacancy

Advertising

Once access is provided via the menu options below, the user has access to the *Advertising* screen.

System	Menu Option	Explanation
CorePortal	eRecruitment - Vacancy Advertising View	This turns on access to view the <i>Advertising</i> section for a Vacancy
CorePortal	eRecruitment - Vacancy Advertising Update	This turns on access to add to and edit the <i>Advertising</i> section for a Vacancy

3.4.13. Schedules

This menu option controls the display of the *Schedules* tab.

System	Menu Option	Explanation
CorePortal	eRecruitment Vacancy Schedules	- This turns on access to view the <i>Schedules</i> and the <i>Applicants</i> tab within this section. There is no split in access.

3.4.14. Broadbean

The XD Recruitment Broadbean feature allows the Recruitment administrator to:

- Post vacancies to Broadbean, creating adverts that are pre-populated with XD vacancy details.
- Extend the posting time for adverts already posted.
- Remove postings.
- Keep track on the vacancy's online status at any time.

Note: An active Broadbean customer account is required.

The Broadbean option on the Vacancy Details screen is menu option controlled. The below required menu option can be enabled on users' menu profiles, where relevant.

System	Menu Option	Explanation
CorePortal	Broadbean	This turns on access to view and edit the Broadbean details on the Vacancy that is to be posted to Broadbean.

The following parameters are required to be configured to ensure the Broadbean integration is setup correctly.

Parameter Name	Explanation	Example Value
Default Currency	Currency value for the Organisation.	EUR
API Key	CoreHR API key	122030609
Password	Broadbean password	Password1
Username	Broadbean username	Username1

To update these parameters:

1. Go to the Administrator Dashboard
2. From the Site Manager widget, open the **Admin Settings** option.
3. Search for "Broadbean"
4. Edit the correct values for each parameter, which you have received from Broadbean.
 - a. Repeat this process until all parameters have been successfully updated.

3.4.15. Linked Appointments

The image below reflects the linked appointment feature that can be used to link an existing appointment / contract to a vacancy.

Vacancy Details: 002502 - Head of Technology
Recruitment > Vacancy Details: 002502 - Head of Technology

REMOVE

access PeopleXD

There is no menu option that controls the **Linked Appointment** button. A list of posts available to the user appear based on the *People Management* data that they have been granted access to.

To carry this out:

1. Go to the Set Up tab on the Security Dashboard
2. From the System et Up widget, open the **System Users** option.
3. Select *Username* from drop-down list.
4. Select *Security Type of Personnel Access* from drop-down list.
5. Select *Structure* code in question from drop-down list.
6. Select *Access Level* required from drop-down list
7. Enable / disable data access. The screen saves automatically.

3.5. Vacancy Overview Screen

This menu option controls the display of the **Vacancy Overview** button.

System	Menu Option	Explanation
CorePortal	eRecruitment - Vacancy Summary Screen	This turns on access to view the <i>Vacancy Overview</i> screen on the <i>Vacancy</i> widget.

Additional menu options are required to view and edit items within this screen. These items are stated below.

3.5.1. Access to View Applicants

This opens the applicant's record. However, all options on that screen are controlled via the menu options that are provided in [section 3.10 Applicant Widget](#).

3.5.2. Access to Edit Vacancy Owner

This menu option controls the display of the **Edit Vacancy Owner** button.

System	Menu Option	Explanation
CorePortal	Recruitment - Edit Vacancy Owner	This turns on access to edit the <i>Vacancy Owner</i> for a Vacancy.

The *Vacancy Owner* list is configured via the *Recruitment User Profile* screen in PeopleXD Back Office:

1. Go to *PeopleXD Back Office* > *CoreHR* > *Security* > enter password "university".
2. Query the *Personnel No* of the employee in question
3. Enable the *CorePersonnel Access* indicator.
4. Save.
5. Go to *PeopleXD Back Office* > *CorePersonnel* > *Recruitment* > *Reference* > *Recruitment User Profile*.
6. Enable the **Recruitment Authoriser** indicator against the personnel number in question.
7. Save.

The *Vacancy Owner* field then pulls any users that are marked as a *Recruitment Authoriser*.

3.5.3. Access to Edit Interview Panel

This opens the *Interview Panel* screen and list out any interviewers that have been assigned to a Vacancy. However, all further options on that screen are controlled via the menu options that are provided in [section 3.4.10 Interview Panel](#).

System	Menu Option	Explanation
CorePortal	eRecruitment - Interview Panel View	This turns on access to view the interviewers who have been assigned to an interview schedule on a vacancy.

3.5.4. Access to Generate Document

This menu option controls the access to the *Generate Document (Letter)* screen via *Vacancy Overview*.

System	Menu Option	Explanation
CorePortal	Generate Documents	This turns on access to generate documents and letters.

3.5.5. Access to Generate Email

This menu option controls the access to the *Generate Email* screen via *Vacancy Overview*.

System	Menu Option	Explanation
CorePortal	Generate Email	This turns on access to generate emails.

3.6. Applicant Details Screen

When you select **View Applicants**, on the corresponding *Applicant Details* screen, there are further options available for each applicant listed:

- On the **Actions** button.
- On the  button.

The below table provides a list of the menu options that control access to options on the screen:

System	Menu Option	Explanation
CorePortal	eRecruitment - Applicant Status Update	This turns on access to the Edit Status button.
CorePortal	eRecruitment - Applicant Comments View	This turns on access to view Comments against an applicant.

System	Menu Option	Explanation
CorePortal	eRecruitment - Applicant Comments Update	This turns on access to update / create Comments against an applicant.

Note:

- **Application Details** access is explained in [section Dynamic Application Forms](#).
- **Assessment History** access is explained in [section 3.7 Assessment Details](#).
- The **Offer Details** button only appears if the *Applicant Status* has been set to *Applicant Offer Made* with the setting of *Applicant Offered Position*.
- The **Bulk Update** option available by default and are not configurable:

3.7. Assessment Details Screen

Note: The Assessment Scorecards feature is used in conjunction with other Recruitment features including the 'Interviews' widget, the 'Interview Panel' and 'Shortlist Groups'. Ensure that you refer to the corresponding sections to ensure these are configured as required.

The Assessment items that are available for selection when defining an Assessment Scorecard, are setup in the PeopleXD back office application. To configure / update Assessment Codes, follow the below steps.

1. Go to CorePersonnel Back Office > Reference > Reference A – C > Assessment Codes

The screenshot shows the 'Assessment Code Maintenance' window. It contains a table with the following data:

Assessment Code	Description	Possible Score	Weight Value
T1	Communication	5	1
T2	Innovation	5	1
T3	Meeting Objectives	5	1
C1	Resourcing	10	1
C2	Collaboration	100	1
C3	Time Management	5	1
C4	Problem Solving	10	1
G4	Management	10	1

2. On the *Assessment Codes Maintenance* screen, it is possible to create new or update Assessment Items.
3. To create new:
 - a. Click into the next available row or click the button to make a new row available
 - b. Provide a code and description for the new Assessment Item
 - c. Record the maximum *Possible Score* for this item
 - d. Apply a *Weight Value* for each item. This can be set to '1' for all, if weighting is not required
 - e. Click the Save button.
4. To edit an existing value
 - a. Update the *Description*, *Possible Score*, *Weight Value*, depending on requirements
 - b. Click the Save button.

3.8. Vacancies Stream Widget

This widget is on the recruit dashboard by default. Access to this widget is not controlled by a menu option. However, access to the data that appears on this is controlled by a menu option:

This menu option controls the display of the data within *Vacancies Stream* widget.

System	Menu Option	Explanation
CorePortal	eRecruitment - Applicant Activity Widget	This turns on access to view the data within the <i>Vacancies Stream</i> widget.

3.9. Vacancies Chart

Note: The *Vacancies Chart* widget is displayed by default on the Recruitment Dashboard. This is not configurable - it cannot be hidden. The stats shown represent the full set of recruitment data and are not restricted based on your data access.

3.10. Applicants Widget

The configurable elements of this widget are:

1. The **Applicants** tab, and further options on the corresponding screens.
2. The **Applications** tab.
3. The **Add Applicant** button.

3.10.2. Applications Tab

Dynamic Application Forms

The *Applications* tab is used to review the online application that an applicant has submitted to your organisation to be considered for the role. The following menu options control access to the information held within the *Applications* section of the *Applicants* widget:

System	Menu Option	Explanation
CorePortal	eRecruitment Applicant Status View	- This turns on the access for a user to see the data within the <i>Applications</i> section on the <i>Applicants</i> widget. This also gives access to the <i>Status History</i> screen once the History button is clicked.
CorePortal	eRecruitment Applicant Status Update	- This turns on access to update an applicant's details when the View Details button is pressed.
CorePortal	eRecruitment Applicant Talent Pool	- This turns on the access to the underlying screen when the Talent Pool button is pressed.

Viewing an Application Form

The following web service controls access to the dynamic application form for each applicant.

System	Web Service	Explanation
Web Services	Recruitment > Get vacancy application details	This turns on the access for a user to see the data within the <i>Applications</i> section on the <i>Applicants</i> widget.

To view a dynamic application form which has been updated with the information provided by the applicant on the Careers Website follow the steps below:

1. Go to the *Applicant Widget*.
2. Select the *Applicants* tab.
3. Choose the applicant in question.
4. On the *Competition Details* tab on the Applicant Detail screen, click **View**.
5. The applicants *Application Form* for each specific vacancy appears on screen. The below images show the detail provided.

Volcanic Admin	CorePortal	Recruitment Toolbox - Volcanic Admin

5. XD Recruitment Question Categories

5.1. What are Question Categories?

Questions can be used on an application form to include a specific question or set of questions per vacancy that are not setup on a standard application form.

Questions can include:

- Default sets of questions or 'profiles' that can be applied to many vacancies e.g. right to work questions, sets of questions that are specific to the business unit for the role.
- Ad-hoc questions i.e. questions specifically added for the vacancy being advertised.
- Killer questions i.e. questions that if the candidate answers in a particular way, can either prevent an application from being submitted or caution the recruitment administrator as part of the shortlisting process.

Application forms are configured to include a variable Question section. The actual questions that you define on the vacancy are included in the application form. This allows you to create application forms that are capable of gathering vacancy specific details from the applicants.

5.2. Setup Question Categories

Question Categories can be used to avoid having to re-create the same set of questions for a vacancy, multiple times.

To create a new question category, follow the below steps:

1. Select the **Toolbox** tab within the Recruitment Dashboard.
2. Open **Vacancy Question Categories**.

3. Click **Add** to create a new *Question Category*
4. Enter the following details:

Item	Explanation	Mandatory
Reference Code	This is an alphanumeric code to distinguish the categories from each other. Maximum of 13 alphanumeric characters allowed.	Yes
Description	This is an alphanumeric description to distinguish the categories from each other. Maximum of 40 alphanumeric characters allowed.	Yes
Active	This controls whether the category to be available for selection on a vacancy.	No
Mandatory	This means the category has to be included on the vacancy application form.	No

5. Flag whether the questions on the profile are **Mandatory**.
6. Switch on the **Active** indicator

5.2.1. Adding Questions to a Question Category

To add questions to a question category:

1. Click **View Questions** against the *Question Category* to be edited.

2. Click **Add** on the *View Questions* screen.

The following screen appears:

The screenshot shows the 'View Questions' screen with a blue header. Below the header is the 'Edit Question' form. The form has three main sections: 'Question *' with the text 'A new second question', 'Answer Type *' with a dropdown menu set to 'Free Text', and 'Category *' with a dropdown menu set to 'Sequence Testing'. Below these is a 'Sequence Number *' field with the value '4'. At the bottom, there are three toggle switches: 'Mandatory' (off), 'Private' (off), and 'Active' (on). A 'SAVE' button is at the bottom right. The 'access PeopleXD' logo is at the bottom center.

The following table outlines the type of answers that can be created per question within XD.

Option	Explanation
Drop-down list	This allows the user to choose one value from a pre-defined list.
Free Text	This allows the user to enter in a block of text that is not limited to a pre-defined list.
Numeric	This allows the user to enter in a value to answer the question.
Radio Button	This allows the user to select 1 option from a set of pre-defined options.
Section Header	This inserts a header onto the questionnaire on the recruitment website. The 'question' entered here becomes the header title.
Section Footer	This inserts a footer onto the questionnaire on the recruitment website. The 'question' entered here becomes the footer title.

The below image shows how the header, drop-down list and radio button options appear on screen during the application process.

Eligibility to Work

* Right to Work in Ireland

..

..

* Right to Work in UK

..

..

Available to start immediately

☐ No

☐ Yes

3. Add a sequence number for the order that a question is to display on a vacancy and then make the question active and flag as **Mandatory** or **Private**.
 - a. If a question is marked as **Mandatory**, the applicant has to answer it before moving onto the next section of the application form
 - b. If a question is marked as **Private**, the applicant's question and answer is hidden from the dynamic application form when viewed by a manager or an interview panel member.

5.2.2. Unsuitable Answers

These are a configurable set of questions and answers which allow for candidate screening to take place ahead of the application form being submitted or visible to recruitment administrators or interview panel members. They allow recruiters to determine the essential criteria that candidates must meet, in order to be eligible to apply for a vacancy.

To set up the Unsuitable Answer settings, follow the below steps:

1. Go to the Administrator Dashboard
2. From the Site Manager widget, open the **Admin Settings** option.
3. Search for the *Unsuitable Applicant Status* parameter.
4. The following parameter returns `erq_unsuitable_status`
5. Set this to an Applicant Status code where the applicant is to be flagged as if they answer a question with an unsuitable answer. For example, input the value `UNS` for an Applicant Status of *Unsuitable Application Answer*.
6. When an applicant applies and inputs an Unsuitable Answer, their applicant status automatically updates to *Unsuitable Application Answer*.

Vacancies Stream			
Applicant Activity	Date	Time	Vacancy
Timothy Byrne changed to Unsuitable Application Answer	15-Apr-2021	16:41	Finance Director 002762
Timothy Byrne applied for position Finance Director	15-Apr-2021	16:41	Finance Director 002762

To enable an answer to be marked as unsuitable, follow the below steps.

1. On the Question Category screen, click **Add** or **Edit Question**.
2. To add an unsuitable answer, ensure either the Select answer type or the Radio Button answer type are chosen.
3. Click **Add** to create new answer for these answer types.
4. Create the answers and enable the *Unsuitable Answer* toggle as the essential answer.

The screenshot shows the 'Add Question' form. At the top, there is a breadcrumb trail: Recruitment > Vacancy Question Categories > View Questions > Add Question. Below this, there are three toggle switches: 'Mandatory' (turned on), 'Private' (turned off), and 'Active' (turned on). To the right of these toggles is an 'ADD' button. Below the toggles, there is a section for 'Answers'. It has two rows: 'Yes' and 'No'. Each row has a toggle switch and a 'REMOVE' button. The 'Yes' row has its toggle turned off, and the 'No' row has its toggle turned on. At the bottom right, there is a 'SAVE' button. The 'access PeopleXD' logo is visible at the bottom center.

5. Click **Save**.

5.3. Adding Question Category to Vacancy

The *Current Questions* tab is where *Question Categories* for a vacancy can be added to and amended.

The screenshot shows the 'Vacancy Details' page for '002502 - Junior Assistant'. The page has a sidebar on the left with a menu: 'VACANCY DETAIL' (selected), 'Vacancy Status', 'Job Advert', 'Job Description', 'Current Questions', and 'Authorisation Details'. The main content area is titled 'Current Questions' and contains a table with the following columns: 'Order', 'Question', 'Category', 'Active', and 'DETAILS'. The table has four rows of data. To the right of the table, there is a dropdown menu with the following options: 'Add Question', 'Assign Category', and 'Killer Question Settings'. The 'UPDATE LIVE JOB' and 'ACTIONS' buttons are visible at the top right of the main content area.

Order	Question	Category	Active	DETAILS
1	Eligibility to ...	Question C...	☒	DETAILS
2	Right to Wor...	Question C...	☐	DETAILS
3	Right to Wor...	Question C...	☐	DETAILS
4	Available to ...	Question C...	☒	DETAILS

5.4. Deleting a Question Category

To delete a Question Category, from the Recruitment Toolbox, expand the three dot menu and click **Delete** on the Category that is to be deleted. You cannot delete a category where a question has already been answered by an applicant. The following warning message appears on screen: "Unable to Delete. A question in this category has already been answered."

5.5. Adding Adhoc Questions

The **Add Question** button allows you to add an ad-hoc question to a vacancy that is not linked to any *Question Category*.

Follow the same steps to create this question as were followed above when adding a question to a *Question Category*.

1. Click **Actions** and select **Add Question**
2. Add in your *question*.
3. Confirm your *answer type*.
4. Assign this question to a *Question Category*.
5. Confirm its sequence number
6. Check if it is mandatory, private or to be included in rating.
7. Click **Save**.

6. XD Reference Data

6.1. Overview

Reference data refers to the data that is available to select by end users of the system on the various pick lists/drop-down lists throughout PeopleXD. Reference data in XD Recruitment looks at items to be used on a vacancy, an application form and on an applicant's personal information record.

Reference data plays an important role in XD Recruitment, as it can trigger different processes to begin, it can flag applicants with different statuses or allows the creation of emails or documents to be created.

These sections of the document provide guidance on what reference data is available to configure and how/where to manage it.

6.2. General Reference Data

6.2.1. Advertising Codes

This is used to describe different advertising methods such as Newspaper or Radio etc.

1. Navigate to the People Management dashboard
2. Navigate to the Data Centre widget on the Data Centre tab.
3. Click **Open** on *Reference Data*.
4. Search for *Advertising Codes* and select the corresponding option.

The *Advertising Codes* screen opens, and all existing reference data items are listed.

Note: Reference data items created here are subject to the following rules:

- Code: Max of 4 alphanumeric characters
- Description: Max of 40 alphanumeric characters

This reference data item does not include an *Active Indicator*. Therefore, all items are active by default and are available for you to select.

6.2.2. Advertiser Profile

This is used to record Advertiser Profiles such as Recruitment Websites & their associated information:

1. Go to *CoreHR Back Office > CorePersonnel > Recruitment > Reference*.
2. Click **Advertiser Profile** to get to the corresponding screen.
The Advertiser Profile screen opens, and all existing reference data items are listed.
3. To add a new advertiser, click on the **New Advertiser** button.
This opens the *Add Advertiser* screen.
4. Click **OK** to exit and save.

6.2.3. Applicant & Vacancy Events

Used to track specific events and items to be completed outside of the system during the recruitment process. To add/manage Applicant or Vacancy Events:

1. Navigate to the People Management dashboard
2. Navigate to the Data Centre widget on the Data Centre tab.
3. Click **Open** on Reference Data.
4. Click the **Event Type** tile.
5. To add a new type:
 - a. Click **Add**.
 - b. Provide a *Code* and *Description*.
6. To flag an event as a Vacancy or Applicant event, update the corresponding indicator. If enabled, they appear on the corresponding list for all vacancies on Recruitment.
Click **Save**.

 **Note:** The Personnel Appointment option is a legacy item which does not need to be configured.

6.2.4. Assessment Codes

These are used for tracking an applicant's skills and competencies and appear to administrators and interview panel members on the *Assessment* screen. To add/manage these assessments codes:

1. Go to *CoreHR Back Office > Personnel > Reference > A - C > Assessment Codes*.
2. To add a new code:

- a. Click **Add**
 - b. Provide a *Code* and *Description*.
 - c. Add in the possible maximum score an applicant can get, along with its weighting.
3. Click **Save**.

6.2.5. Interviewer & Panel Member Types

This is used to track the type of interview member or panel member, for example:

- Internal
- External

To add/manage these types:

1. Select the **Toolbox** tab within the Recruitment Dashboard.
2. Open **Panel Member Types**.

- a. Click **Add**.
 - b. Provide an *Interview Type* and *Description*.
 - c. Choose the specific *Panel Member Type* available.
 - d. Ensure the *Active* indicator is enabled for use.
4. Panel Member Types templates can be setup here to allow you to create a default email notifications and subjects that are sent to panel member types.

Note: The Internal & External Applicant types are pre-configured and should not be altered.

6.2.6. Recruitment Cost Types

These are specific costs that can be tracked against a vacancy or a recruitment process to ensure the assigned budget is spent accordingly. For example:

- Room booking fees
- Travel expenses
- Lunch costs
- Accommodation costs

These are checklists to monitor and update vacancy costs during the timeline of the recruitment process for a vacancy.

To add/manage these cost types:

1. Navigate to the People Management dashboard
2. Navigate to the Data Centre widget on the Data Centre tab.
3. Click **Open** on Reference Data.
4. Click the **Recruitment Cost Types** tile.
5. To add a new type:
 - a. Click **Add**.
 - b. Provide a *Code* and *Description*.
6. Click **Save**.

6.2.7. Recruitment Disciplines

To add/manage Recruitment Disciplines:

1. Navigate to the People Management dashboard
2. Navigate to the Data Centre widget on the Data Centre tab.
3. Click **Open** on Reference Data.
4. Click the **Recruitment Disciplines** tile.
5. To add a new type:
 - c. Click **Add**.
 - d. Provide a *Code* and *Description*.
6. Click **Save**.

6.2.8. Position Types / Job Types

Used to group vacancies into different categories, depending on what your company needs e.g. Replacement / New Position or Contractor Required. In Portal, this is shown on the *Overview* section of the *Vacancy Detail* section. These are classified as Job Types within the Access Careers Website:

Vacancy Details: 002162 - Budget Analyst (PT)

Recruitment > Vacancy Details: 002162 - Budget Analyst (PT)

2. Navigate to the Data Centre widget on the Data Centre tab.
3. Click **Open** on Reference Data.
4. Click the **Position Types** tile.
5. To add a new type:
 - c. Click **Add**.
 - d. Provide a *Code* and *Description*.
6. Click **Save**.

6.2.9. Vacancy Status

This controls at what stage a vacancy is at. These statuses control if a vacancy appears on the *Recently Opened Vacancies* widget or the recruitment website. On XD Recruitment, this field relates to the *Status* field on the Vacancy Status section of Vacancy Details.

For Example:

- Vacancy Open
- Vacancy Closing

To add/maintain these statuses:

1. Navigate to the People Management dashboard
2. Navigate to the Data Centre widget on the Data Centre tab.
3. Click **Open** on Reference Data.
4. Click the **Other References** tile.
5. Select **Recruitment Status** from the Reference Type dropdown menu.
6. To add a new status, click **Add** and provide a *Code* and *Description*.
7. Click **Save**.

6.2.10. Vacancy Type / Job Functions

This can be used, along with section [4.2.7 Position Type](#), to group vacancies together for workflow reasons or reporting purposes. These are classified as Job Functions within the Access Careers Website

For example:

- Academic
- Clerical
- Professional
- Technical

6.3. Applicant Status

6.3.1. Overview

The recruitment process can vary depending on an organisation's set-up. As part of the Recruitment process, applicants are flagged with different statuses such as Applicant Acknowledged, Applicant Rejected etc.

To view/update these Applicant Status codes:

1. Select the **Toolbox** tab within the Recruitment Dashboard.
2. Open **Applicant Status**.

Note: In this reference data screen, the statuses that are supplied can be edited or added to. However, the code **AP** must remain as-is with the **Applicant Applied** indicator against it. The description can be altered against this.

Code	Description	Display Sequence	Active
AP	Applicant Applied	1	☒
APS	Applicant Shortlisted	2	☒
ASH	Applicant Successfully Hired	9	☒

6.3.2. Applicant Status Reference Codes

The below are the standard list of status codes that are available as part of baseline configuration.

Description	Code
Applicant Applied	AP
Applicant Shortlisted	APS
Applicant Successfully Hired	ASH
Application Pack Sent Out	APSO
Appointment Accepted	FILL
Appointment Offer Made	APPM
Appointment Offer but Declined	DECL
Before Offer Check	BOC
Invited to Aptitude Test	APT
Invited to Interview	INTV
Not Shortlisted	NS
Offer Accepted	OFF1
Online Interview Panel	OIP
Successful at Aptitude	SUCA
Successful at Interview	SUIN
Unsuccessful at Aptitude	UNSA
Unsuccessful at Interview	UNSU
Vacancy Withdrawn	VWDR
Verbal Offer	VM
Withdrawn Application	WTDR

6.3.3. Updating the Applicant Status Settings

Attached to each status, there can be an indicator flagged against it which prompts the system to carry out a different function depending on what indicator has been selected. To reach this screen and update each status follow the steps below:

1. Select the **Toolbox** tab within the Recruitment Dashboard.
2. Open **Applicant Status**.
3. For the required status, click the  button.

4. Select **Status Detail**.
5. Enable the required setting as needed – see the table below for an explanation of each.

Status Detail	Explanation
Applicant has Applied	This must be set against the Applicant Status (code) of AP. Every applicant that applies has this as an initial status.
Applicant Offered Position	This status drives the Appointment Offer functionality it is recommended to be set against a status of 'Applicant Offer' etc.
Applicant has accepted position	This is the final status that is set against a successful applicant. When this is flagged against an applicant, they are then available to be onboarded as an employee.
Available for interview panel update	This allows interview panel members to view this status and use it as part of updating an applicant's profile and status.
Applicant can accept position online	An applicant is to accept or reject the offer using the recruitment website.
Applicant to be place on panel	This status can be set against applicants that are to be placed on an applicant panel for selection.
Reference Required	An applicant has been asked to provide a reference before continuing applicant journey.
Email Template after Status Change	This triggers an email to be sent the applicant when the applicant has been changed to this status.

6.3.4. Display Sequence

This manages how the statuses appear in order when using the “Edit Status” functionality on a vacancy.

Before:

After:

6.3.5. Applicant Status Emails

The *Applicant Status Email* feature allows for an email to be generated, based on the update of the applicant's *Applicant Status* value.

This only occurs when the Applicant Status value is changed on the *Vacancy > View Applicants* screen for a single applicant.

 **Note:** Emails do not trigger when an *Applicant Status* is updated on any other screen in Recruitment.

Email templates can be configured for individual Applicant Status values. Once an applicant's Applicant Status value is updated to one of the chosen values, a new pop-up screen provides the email template, which can be pre-populated with the applicant's specific details. The recruitment administrator can review and update the email text before sending the email.

Emails are generated individually per applicant i.e. these cannot be generated in bulk based on a bulk Applicant Status update.

Example uses of this feature include having pre-configured templates to notifying a candidate that:

- their application has been withdrawn / unsubmitted.
- they have been added to a reserve panel of candidates.

 **Note:**

- This functionality is not related to the Event Management System or Document/Email Generation features.
- These other options can still be used to send bulk email communications to applicants for other stages in the recruitment process e.g. 'Invite to Interview', 'Application Received', 'Not Shortlisted', 'Unsuccessful at Interview' etc.

Email Sender Name & Address

The sender name and email address must be configured, in order to send emails. To configure these options:

1. Go to the Administrator Dashboard
2. From the Site Manager widget, open the **Admin Settings** option.
3. Search for the parameters below and update as required:
 - a. **cp_recruit_email_fromn** – the name of the sender
 - b. **cp_recruit_email_frome** – the email address of the sender

Creating an Email Template

To generate an email for an applicant status value, it is first required to configure an email template. This template can include merge fields, which can be updated to reflect actual applicant data, when the email is generated for a specific applicant.

1. Select the **Toolbox** tab within the Recruitment Dashboard.
2. Select the **Applicant Status** option.
3. Click the  button and select **Email Template**.

Email Template - Invited To Interview

Recruitment > Applicant Status > Email Template - Invited To Interview

Data Source

Email Notification

Notification Subject *

Invitation to Interview: (<<RECRUITMENT_ID>>)

Notification Body *

Dear <<APPLICANT_FORENAME>>,

We are pleased to invite you to interview for the position of <<RECRUITMENT_DESCRIPTION>>.

Date: <<INTERVIEW_DATE1>>

access PeopleXD

CLEAR SAVE

4. Select a data source from the *Data Source* drop-down list.

The data sources contain lists of merge fields that can be added to a template and are updated to reflect the corresponding data for the chosen applicant when generating the email. It is only possible to use one data source per template.

There are 2 possible data sources to choose from:

- a. *Application Detail* - includes applicant, vacancy, application, and schedule field.
- b. *Application Schedule Detail* - includes applicant and schedule fields.

The merge fields available for the *Email Notification* drop-down list is updated to reflect the chosen data source.

5. Configure the *Notification Subject*:
 - a. Type the text required for the email subject & use the *Email Notification* drop-down list, to identify merge fields to be used in the subject.
 - b. Merge fields appear wrapped in << >> and this denotes a field that is be replaced with actual applicant or vacancy related data.
6. Configure the *Notification Body*.
7. Click **Save**.

Update Applicant Status Setting

An indicator of **Email Template after status change** must be updated for the Applicant Status, in addition to configuring the template.

1. Select the **Toolbox** tab within the Recruitment Dashboard.
2. Select the **Applicant Status** option.
3. Select the  button for the required Status and select **Status Detail**.
4. Enable the **Email Template after status change** indicator.
5. Click **OK**.
6. Click **Save** on the *Applicant Status* screen.

Editing an Existing Template

To edit the content of any existing Applicant Status email templates:

1. Select the **Toolbox** tab within the Recruitment Dashboard.
2. Select the **Applicant Status** option.
3. Select the  button for the chosen *Applicant Status* value and select **Email Template**.
4. Update the notification subject and / or body as required.
5. Click **Save**.

Removing a Template

To prevent an existing email template from generating with and Applicant status is changed:

1. Select the **Toolbox** tab within the Recruitment Dashboard.
2. Select the **Applicant Status** option.
3. Select the  button for the chosen *Applicant Status* value and select **Email Template**.
4. Disable the **Email Template after status** change indicator.
5. Click **OK**.
6. Click **Save** on the Applicant Status screen.

The email is no longer generated when that Applicant Status value is chosen for an applicant.

6.3.6. Screens where Applicant Status can be updated

Updating an Applicant's Status can be carried out in multiple places around the XD Recruitment platform. These places are listed below.

- View Applicants Screen - Application Detail
- View Applicants Screen - Applicant Detail - Competitions - View
- Interview Panel Widget - Panel - View Applicants - Application Detail
- Interview Panel Widget - Panel - View Applicants - Assessment
- Interview Panel Widget - Panel - View Applicants - Applicant Detail - Competitions - View
- Interview Panel Widget - Interviews - View Application
- Interview Panel Widget - Interviews - View Applicant - Competitions - View Application
- Interview Panel Widget - Interviews - View Applicant - Competitions - View Assessment
- Interview Panel Widget - Interviews - View (Vacancy Screen Open) - Competitions - View

6.4. Diversity & Disability Details

Note: These reference data items do not include an **Active** indicator. Therefore, all items are active by default and are available to the user to select.

6.4.1. Gender Identity

1. Navigate to the People Management dashboard
2. Navigate to the Data Centre widget on the Data Centre tab.
3. Click **Open** on Reference Data.
4. Click the **Other References** tile.
5. Update Reference Type to *GNDRID* (Gender Identity).

All existing reference data items are listed on screen.

Reference data items created here are subject to the following rules.

6.4.2. Sexual Orientation

1. Navigate to the People Management dashboard
2. Navigate to the Data Centre widget on the Data Centre tab.
3. Click **Open** on Reference Data.
4. Click the **Other References** tile.

The *Other References* screen opens.

5. Update Reference Type to *SEXORT* (Sexual Orientation Codes).
All existing reference data items are listed on screen

Reference data items created here are subject to the following rules.

- *Code*: Max of 6 alphanumeric characters.
- *Description*: Max of 40 alphanumeric characters.

6.4.3. Ethnic Origin

1. Navigate to the People Management dashboard
2. Navigate to the Data Centre widget on the Data Centre tab.
3. Click **Open** on Reference Data.
4. Click the **Ethnic Types** tile.

The *Maintain Ethnicity Codes* screen opens. All existing reference data items are listed on screen.

Reference data items created here are subject to the following rules.

- *Code*: Max of 6 alphanumeric characters
- *Description*: Max of 40 alphanumeric characters

6.4.4. National Identity 1 & 2

1. Navigate to the People Management dashboard
2. Navigate to the Data Centre widget on the Data Centre tab.
3. Click **Open** on Reference Data.
4. Click the **Other References** tile.
5. Update Reference Type to *NATID1* / *NATID2* (National Identity 1 or 2).

All existing reference data items are listed on screen.

Reference data items created here are subject to the following rules.

- *Code*: Max of 6 alphanumeric characters
- *Description*: Max of 40 alphanumeric characters.

6.4.5. Citizenship

1. Navigate to the People Management dashboard
2. Navigate to the Data Centre widget on the Data Centre tab.
3. Click **Open** on Reference Data.
4. Click the **Citizenship Codes** tile.

All existing reference data items are listed on screen.

Reference data items created here are subject to the following rules.

- *Code*: Max of 6 alphanumeric characters.
- *Description*: Max of 40 alphanumeric characters.

6.4.6. Country of Origin

To manage Country Code reference data:

1. Navigate to the People Management dashboard
2. Navigate to the Data Centre widget on the Data Centre tab.
3. Click **Open** on Reference Data.
4. Click the **Country Codes** tile. The *Maintain Country Codes* screen opens. All existing reference data items are listed on screen.

Reference data items created here are subject to the following rules.

- *Code*: Max of 6 alphanumeric characters
- *Description*: Max of 40 alphanumeric characters

6.4.7. Religion

1. Navigate to the People Management dashboard
2. Navigate to the Data Centre widget on the Data Centre tab.
3. Click **Open** on Reference Data.
4. Click the **Religion Codes** tile. The *Maintain Religion Codes* screen opens. All existing reference data items are listed on screen.

Reference data items created here are subject to the following rules.

- *Code*: Max of 6 alphanumeric characters.
- *Description*: Max of 40 alphanumeric characters.

6.4.8. Time Living in this Country

1. Navigate to the People Management dashboard
2. Navigate to the Data Centre widget on the Data Centre tab.
3. Click **Open** on Reference Data.
4. Click the **Other References** tile.
5. Update Reference Type to *LENTIM* (Length of Time). All existing reference data items are listed on screen.

Reference data items created here are subject to the following rules.

- *Code*: Max of 6 alphanumeric characters.
- *Description*: Max of 40 alphanumeric characters.

6.4.9. Family Status

1. Navigate to the People Management dashboard
2. Navigate to the Data Centre widget on the Data Centre tab.
3. Click **Open** on Reference Data.
4. Click the **Other References** tile.
5. Update Reference Type to *FAMSTS* (Family Status Types). All existing reference data items are listed on screen.

Reference data items created here are subject to the following rules.

- *Code*: Max of 6 alphanumeric characters.
- *Description*: Max of 40 alphanumeric characters.

This Reference Type includes an 'Active' indicator:

- *Enabled*: Reference Data Item appear throughout PeopleXD.
- *Disabled*: Reference Data Item do not appear throughout PeopleXD.

6.4.10. Marital Status

1. Navigate to the People Management dashboard
2. Navigate to the Data Centre widget on the Data Centre tab.
3. Click **Open** on Reference Data.
4. Click the **Marital Status** tile.
5. Search for *Marital Status* and select the corresponding option. The *Maintain Marital Status Codes* screen opens. All existing reference data items are listed on screen.

Reference data items created here are subject to the following rules.

- *Code*: Max of 1 alphanumeric character.
- *Description*: Max of 40 alphanumeric characters.

6.4.11. Disability 1 & Disability 2

1. Navigate to the People Management dashboard
2. Navigate to the Data Centre widget on the Data Centre tab.
3. Click **Open** on Reference Data.
4. Click the **Other References** tile.
5. Update Reference Type to *DISABL* (Disability Codes). All existing reference data items are listed on screen.

Reference data items created here are subject to the following rules.

- *Code*: Max of 6 alphanumeric characters.
- *Description*: Max of 40 alphanumeric characters.

7. XD Emails & Notifications

7.1. Overview

Emails can be sent from the People XD system:

1. Applicant Status templates as per section
2. Event Management System
3. Applicant Careers Website

7.2. Event Management System

The PeopleXD Event Management System (EMS) module allows for the recruitment module to be configured so that emails and notifications can be generated in PeopleXD based on certain data triggers populated on the system

These can be generated for any user of the system via:

- Individual emails
- Group emails
- Organisation Roles

To create / maintain the emails and notifications for recruitment:

1. Navigate to the People Management dashboard
2. Navigate to the Data Centre widget on the Data Centre tab.
3. Click **Open** on **HR Admin Setup Settings**.
4. Click the **HR Event Configuration** tile.
5. Once in this screen, select the *Event Category* drop-down list, which provides you with the following recruitment events:

Event	Explanation
Recruitment Advertising Events	This relates to where and when this vacancy was published to an advertiser.
Recruitment Applicant Events	This relates to any applicant data that has been created or amended on the system.
Recruitment Events	This relates to any update or amendment to data against a vacancy profile on the system.

6. Select the  button which brings you to the Event Type Maintenance screen to configure the notification. For example, notifications in the Applicant Event category could be setup for:
- a. Notification of Invite to Interview (based on *Applicant Status*)
 - b. Notification of Shortlist Addition
 - c. Notification of Offer

8. Employee & Manager Self Service

8.1. Employee Dashboard Widgets

Two widgets can be enabled here on an Employee's Dashboard.

1. Open Positions
2. Interviews

8.1.1. Open Positions

The following Menu Options are used to control access for employees to the *Open Positions* widget

System	Menu Option	Explanation
CorePortal	Recruitment - Open Positions Widget	This turns on the <i>Open Positions</i> widget on the <i>Employee Dashboard</i> .
Web Services	Recruitment > Get vacancy openlist	This ensures the list of vacancies are populated on the Open Positions widget.

8.1.2. Interviews

Note: The same configuration options apply here, as covered already in [section 8.3 Interview Widget](#), when adding this to the Recruitment Dashboard. Ensure that the employee's menu profiles are updated to include the required menu options.

8.2. Manager Dashboard Widgets

A manager can be given access via two widgets on the *Manager Dashboard* to view and update applicant information, which are listed below. Ensure that the manager's menu profiles are updated to include the required menu options:

Widget	Explanation
Interviews	The same configuration options apply here, as covered already in section 8.3 Interview Widget
Vacancies Stream	This functionality replicates what can be actioned on the <i>Vacancies Stream</i> widget as per section 3.8 Vacancies Stream Widget .

The screenshot displays the XD Recruitment dashboard. On the left is a vertical sidebar with icons for user profile, team, clock, briefcase, prohibition, list, briefcase, and user. The main content area is divided into two sections. The top section, titled 'Vacancies Stream', contains a table with the following data:

Applicant Activity	Date	Time	Vacancy	
Peter Travers applied for position Junior Assistant	12-Mar-2021	14:45	Junior Assistant 002502	VIEW
Mark Test changed to Invited To Interview	12-Mar-2021	11:36	XD Manager Job 002422	VIEW
Mark Test changed to Applicant Shortlisted	12-Mar-2021	11:36	XD Manager Job 002422	VIEW
Mark Test changed to Applicant Shortlisted	12-Mar-2021	11:12	XD Manager Job 002422	VIEW

At the bottom right of the stream is a pagination indicator: '1 - 25 of 117' with left and right arrow icons. Below the stream is an 'Interviews' widget with a 'VIEW ALL' button. It contains a table:

Area	Items	
Interviews	0	VIEW
Interview Panel	0	VIEW
Job Gradings	0	VIEW

8.3. Interview Widget

8.3.1. Menu Options

These menu options control access to the information held within the *Interview* widget.

System	Menu Option	Explanation
CorePortal	Erecruitment - View Interviews	This gives access to the <i>Interviews</i> widget, including both the <i>Interviews</i> and <i>Interview Panel</i> screen.

Note: This is available by default on the Recruitment Dashboard. It is recommended to make this available on the *Employee Dashboard* or *Manager Dashboard*. This ensures that any employee on the 'Interview Panel' for vacancy, who does not have access to the Recruitment Dashboard, can access the details of the vacancy & applicants on PeopleXD.

8.3.2. Updating Applicant Status Codes

For the interview panel member to update the *Applicant Status* value for applicants on the *Interview Panel* screen, it is required to flag the specific set statuses that are to be made available to them.

To flag the *Applicant Status* values:

1. Select the **Toolbox** tab within the Recruitment Dashboard.
2. Select the **Applicant Status** option.
3. Identify the Applicant Status values to be updated or create new codes if required.
4. Click the  button and select **Status Detail**.
5. Enable the **Available for interview panel update** option.
6. Click **OK**.
