1.0 Introduction

Odyssey is Oxford's Radiation Management System. A central system to record and manage the University's radiation-related data including registered workers, materials and waste, and machine and equipment.

All radiation host departments will have access to the system and be required to keep their department records up to date. Only registered radiation workers with an Oxford Single Sign-On (SSO) will have access to the system.

Note: In the first phase of implementing the system only the Safety Office Radiation Team, Senior Radiation Protection Supervisors (SRPS), and Radiation Protection Supervisors (RPS) will have access to Odyssey.

Odyssey is a cloud-based system provided by Versant Physics, an American software company.

2.0 Worker Registrations

2.1 Registering a new radiation worker

An online form will be used to register a new radiation worker, whether they are a student, staff or visitor. The form is initiated in the system and will pass through the following stages for completion and approval:

Radiation Worker > RPS > SRPS > Academic Line Manager > Safety Office.

This form should be used when a radiation worker is registering for the first time in each host department. For example, if a worker is already registered with Biology and is now registering with Oncology, this form would be used to register the worker as a new worker to Oncology.

In addition, the form should also be used if a worker is registering to work at an external institute.

If the worker is already registered in a Host department but wishes to be registered for a different work type or additional radionuclides, then the 'Work Type Registration' form should be used. (See 3.1 Adding additional work types to a radiation worker record).

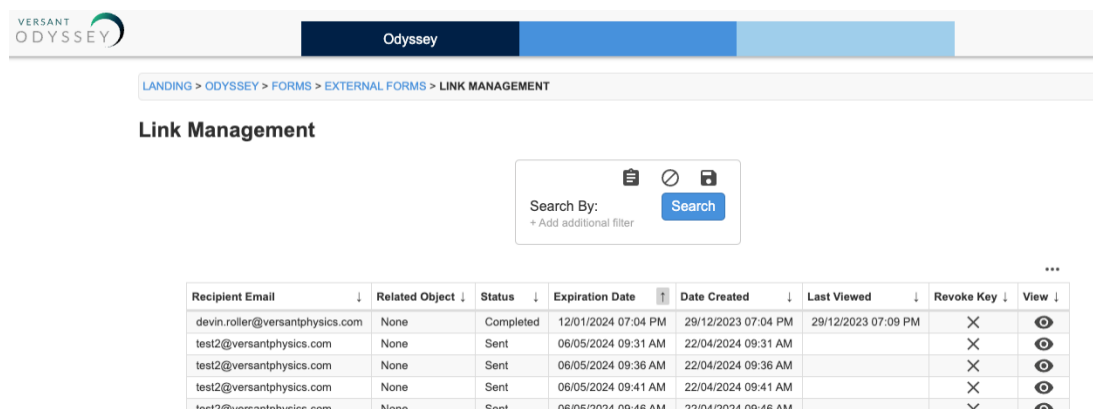

2.1.1 Registration forms have an expiry date to be completed

When any registration form is sent from Odyssey, it defaults to have an expiration date 6 weeks from the creation date. For example, if the form was sent to the worker on the 01/08/2024 and the worker selected the link to complete the form after 12/09/2024 they will receive an error page and will not be able to complete the registration form.

If this happens, the SRPS will need to send a new registration form to the worker. Then, the Safety Office will be required to Terminate the now expired work registration form.

Safety Office users and SRPS users can check whether a registration form has been viewed/completed and the expiration date by navigating to the Link Management Screen; Odyssey > Forms > Email Forms > Manage Sent Forms.

This is also where the Safety Office could revoke an email sent in error and then view the workflow to terminate it.

Recipient Email	Related Object	Status	Expiration Date	Date Created	Last Viewed	Revoke Key	View
devin.roller@versantphysics.com	None	Completed	12/01/2024 07:04 PM	29/12/2023 07:04 PM	29/12/2023 07:09 PM	×	👁
test2@versantphysics.com	None	Sent	06/05/2024 09:31 AM	22/04/2024 09:31 AM		×	👁
test2@versantphysics.com	None	Sent	06/05/2024 09:36 AM	22/04/2024 09:36 AM		×	👁
test2@versantphysics.com	None	Sent	06/05/2024 09:41 AM	22/04/2024 09:41 AM		×	👁
test2@versantphysics.com	None	Sent	06/05/2024 09:46 AM	22/04/2024 09:46 AM		×	👁

2.1.2 Initiating a new registration form

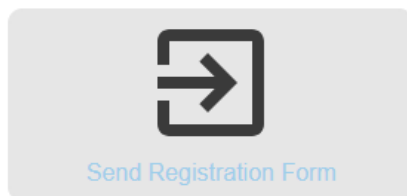

It is recommended the SRPS of the host department, for where the worker shall be working, should initiate the registration process. There may be circumstances in departments, whereby the RPS can initiate the form. This begins with sending the online form to the worker from Odyssey.

If the Worker has work with different RPS, it is not possible to specify this on the form. Another work type form should be initiated to capture that different work with the different RPS in the same department.

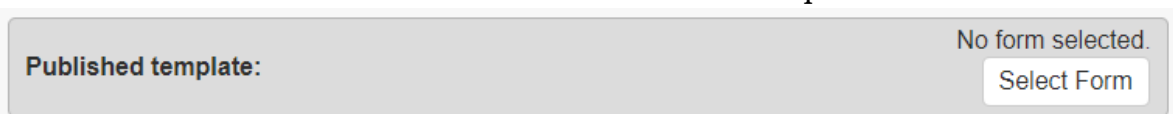

If you are a SRPS for more than one department ensure that the department that the worker will be working is selected in the top right of the screen.

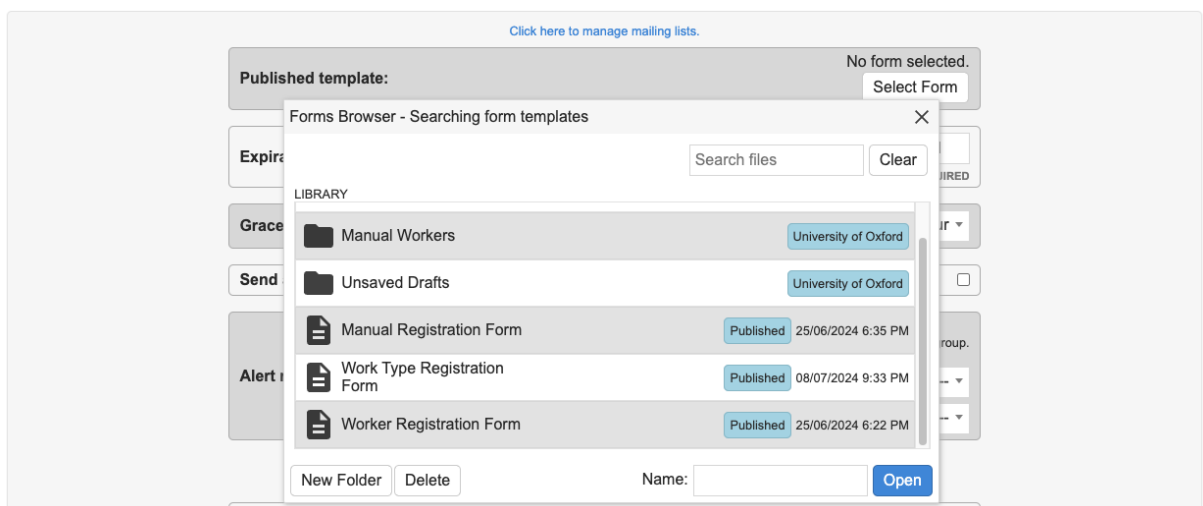

1. From the landing page, select the 'Send Registration Form' icon.

2. The 'Send Form' page will open.
3. Choose the 'Select Form' button within the 'Published template' section.

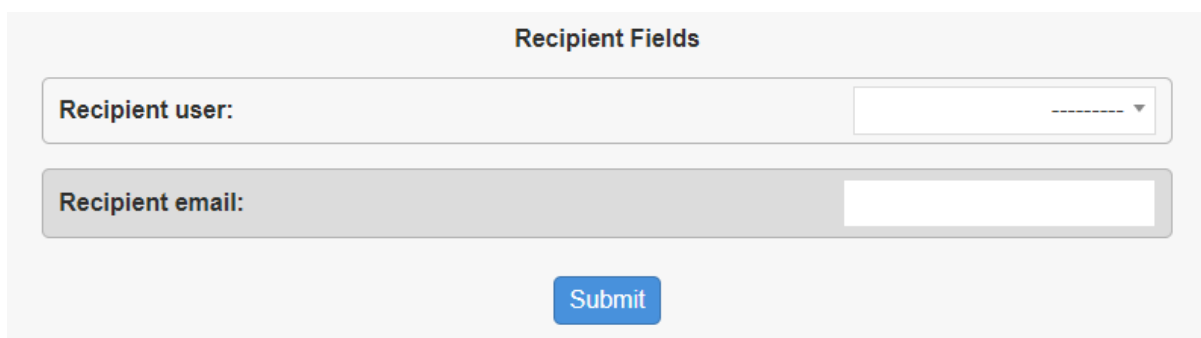

4. Select 'Worker Registration Form' from the list of form templates and select the 'Open' button.

Note: If you have selected the wrong form, you can choose the 'Select Form' button to select a different form.

5. If the worker is not registered for radiation work in another department, type the workers Oxford email address in the 'Recipient email' field.
Email address must be in the following format **name.surname@dept.ox.ac.uk**
If the worker is already registered, you may find them in the 'Recipient user' list.

You can select the selection arrow and start typing the person's name.
It is helpful to search for Surname.

The image shows a form titled "Recipient Fields". It contains two input fields: "Recipient user:" with a dropdown arrow, and "Recipient email:" with a text input field. Below these fields is a blue "Submit" button.

6. If you know who the applicant's Academic Line Manager (ALM) is, and who their RPS and SRPS will be, then you can complete these fields to be pre-populated for the worker. Otherwise, leave them blank for the worker to complete.

Note: The worker will be able to change these fields when they complete their section of the form.

Note: The fields marked with a red Asterix* in the Worker section of the form are mandatory for the Worker to complete to allow them to submit the form. They are not mandatory to initiate the form.

7. Select the 'Submit' button.

8. The form will now automatically be progressed to the Worker stage.

Note: If you have sent the form to the wrong email address, you will need to contact the Health and Safety System Support and ask them to revoke the email or terminate the workflow.

As the SRPS, you will need to send a new registration form to the correct Oxford email address.

2.1.3 The Worker stage (Stage 1)

The worker will be notified of the new registration form via email.

Note: Only the named Worker can complete the form as SSO (Single Sign-On) is required to access the system and therefore their form. This means they cannot delegate the completion of the form to anyone else.

System Guidance for workers can be found on the Safety Office website.

[Odyssey guidance](#) | [Safety Office \(ox.ac.uk\)](#)

1. Click the link in the email to open the registration form, and sign in using SSO.

brendan.oconnortest@it.ox.ac.uk_19/07/2024 10:10 AM
Template: Worker Registration Form_June 25
Workflow: Worker Registration
Current Stages: Radiation Worker

The general provisions of the Health and Safety at Work etc Act 1974 impose a duty on all employers to ensure, as far as reasonably practicable, the safety of their employees at work by maintaining safe plant, safe systems of work, and safe premises, and also by ensuring adequate instruction, training and supervision. The University is also bound by the Act to ensure the safety of all other persons, who (though not employees) may be affected by the University's work activities.

Use this form to register as a radiation worker. Please complete Stage 1, then the form will be reviewed by your SRPS/RPS and Line Manager before being approved by the Safety Office. You will be notified once approved.

Stage 1: Worker

* Surname
O'Connor Test

* Forenames
Brendan

* Forename First Initial (for use in TLD Identifier)
[Empty box]

* Sex
Select list item

* Email Address
brendan.oconnortest@it.ox.ac.uk

* Position Type
Staff

* Title
Select list item

* Date of Birth
[Empty box]

* Employing Department
IT Services

* Academic Line Manager or Supervisor's Email Address
[Empty box]

* RPS
Select user

* SRPS
Select user

* Are you currently appointed under the Ionising Radiations Regulations 2017 as a "classified person"?
[\[LINK TO DEFINITION OF A CLASSIFIED PERSON\]](#)
☐ No ☐ Unsure ☐ Yes

Comments
[Empty text area]

Notice to ionising radiation workers
(a) Exposure to ionising radiation can be harmful.
(b) If you are female, you should note that ionising radiation can be harmful to the foetus. It is important for you to inform your Senior Radiation Protection Supervisor as soon as possible in writing if you become pregnant.
(c) (not applicable to breastfeeding) Ionising radiation can also be harmful to a breast-fed infant because radionuclides taken into the mother's body could be transmitted to an infant in the mother's milk. It is important for you to inform the Senior Radiation Protection Supervisor as soon as possible in writing if you are breast feeding.

DECLARATION: I agree to comply with all University and legal requirements in connection with my work with ionising radiation, including the above Notice, the University General Local Rules & Departmental Local Rules.

After you have signed the form, please submit using the button at the top of the page.

* Worker Signature
[Empty signature box] Clear

2. Some fields will automatically be populated (e.g. names, email, position type and employing department), plus any that the SRPS has already completed on the worker's behalf.

Note: These fields are populated from an integration and cannot be changed within Odyssey. (See Section 3.10 Changes to Worker's Personal Details).

Note: The Forename First Initial field is used for TLD badge wearers. The box purposely only allows one character and should be the first initial of the worker's forename i.e. Sarah would enter 'S'.

3. The worker should complete the rest of the form ensuring all mandatory fields with a red asterisk are filled in.
4. If the Worker wishes they can also add comments. Any comments entered on the form will be visible in the subsequent stages of the registration process and will remain on the registration form, which is saved against the worker's profile.

Note: This means these comments are visible by anyone who has access to the registration form throughout registration process and anyone who can view the worker's profile.

5. **Position Type Visitor:** If the worker's position type is visitor, then the worker will need to upload an approval document from their employer acknowledging they will undertake radiation work at the University. This can be an email, Word document, PDF, or an image.

Note: Other approvers will be able to review the document in the subsequent registration stages.

6. The worker should read the notice and declaration before signing the form. By signing the declaration, the worker confirms they have been informed about and understand the risks involved in working with ionising radiation. They also agree to fully comply with the University's radiation protection measures and legal requirements.
7. They should sign the form in the 'Worker Signature' section. This will systematically set the 'Signed by' name and date.
8. Select the 'Submit' button at the top of the form.

A message will show at the top of the form, to acknowledge the form has been submitted 'Your form has been submitted and is now closed from further modification'.

9. The form will now be progressed automatically to the RPS stage.

Note: If the worker already has a profile in Odyssey, Odyssey will return the Worker to the Odyssey home screen.

If the user attempts to click back to modify the form, they will be unable to do so.

Once the worker's registration form has had all its stages completed and approved, they will receive a confirmation email that the Radiation Worker Registration is now complete and to contact their S(RPS) to ensure any required training/additional checks have been completed.

2.1.4 The RPS stage

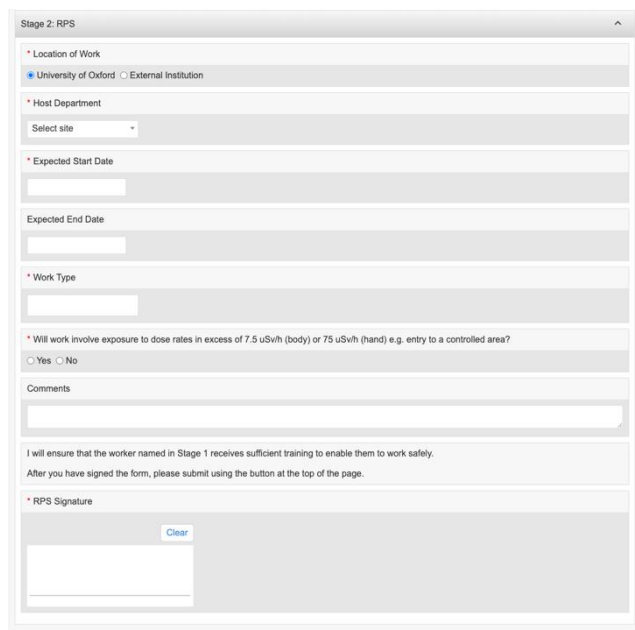

The purpose of the Stage 2 - RPS stage is to specify the work that the worker will be doing within the department. The person specified in the RPS section of the Stage 1 – Worker will be notified of a new registration form via an email and a system alert. For some departments the SRPS will also be the RPS.

Note: At this stage only the specified RPS can access the form (Safety Office can also), if the person specified as 'SRPS' accessed the form they would see the form but read only and it will display as 'You are not authorized under the current workflow stages'.

1. Select the link in the email or the system alert to open the registration form.
2. The form will show Current Stages: RPS and Stage 1: Worker will be visible. The RPS should review any details entered by the Worker, comments and review classified person question.

The screenshot shows the Odyssey Radiation Management System interface. At the top, there's a navigation bar with 'Odyssey', 'Forms', and 'Data Entry' tabs. The user is logged in as 'RPS User - Chem/BioChem SCHL'. The main content area is titled 'LANDING > ODYSSEY > FORMS > DATA ENTRY'. Below this is a 'FILE' section with buttons for 'New', 'Open', 'Save', 'Save As', 'Submit', 'Convert PDF', 'Terminate Workflow', and 'Map Form Data'. The form is for 'brendan.oconnortest@it.ox.ac.uk' and is titled 'Template: Worker Registration Form_June 25'. The workflow is 'Worker Registration' and the current stage is 'RPS'. The form contains several sections: a header with a disclaimer about the Health and Safety at Work Act 1974; a personal details section with fields for Surname (O'Connor Test), Forenames (Brendan), Forename First Initial (B), Sex (Male), Email Address (brendan.oconnortest@it.ox.ac.uk), Position Type (Staff), Title (Mr.), Date of Birth (01/01/1980), and Employing Department (IT Services); an Academic Line Manager or Supervisor's Email Address field (tammi.williams@it.ox.ac.uk); RPS and SRPS selection fields (both set to 'RPS User'); a question about being appointed under the Ionising Radiations Regulations 2017 as a 'classified person?' (answered 'No'); a comments section with the text 'DFSFSFSFSFS'; a declaration section with a notice to ionising radiation workers and a declaration statement; and a worker signature section with a digital signature and the text 'Signed by: Brendan O'Connor Test Date: 19/07/2024'.

3. Scroll down to Stage 2: RPS.

The screenshot shows the 'Stage 2: RPS' registration form. It includes fields for 'Location of Work' (with radio buttons for 'University of Oxford' and 'External Institution'), 'Host Department' (with a 'Select site' dropdown), 'Expected Start Date' and 'Expected End Date' (date pickers), 'Work Type' (text input), and a checkbox for 'Will work involve exposure to dose rates in excess of 7.5 uSv/h (body) or 75 uSv/h (hand) e.g. entry to a controlled area?'. There are also radio buttons for 'Yes' and 'No', a 'Comments' text area, a signature line with a 'Clear' button, and a 'Submit' button at the top right.

4. Select whether the work will be taking place at the University or at an External Institution.

If 'External Institution' is selected then choose the name of the external institute from the list.

Note: If the external institution is not listed, please save and close the registration form and contact the Safety Office (see 6.4 The external institution the worker is wanting to register with is not listed).

5. Select the 'Host Department'.

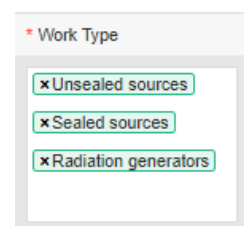

6. Complete the form with details of the work the applicant will be undertaking.

'Expected Start Date' This is the start date for when the applicant will start radiation work.

'Expected End Date' This field can be used to specify when the radiation work is likely to end and can be used in reports to help maintain an accurate list of workers in a department. For example, this might be helpful for students, fixed term contracts or if the project work is due to end by a particular date.

'Work Type' This will be the work type groups the worker will be working with: Radiation Generators, Sealed Sources and Unsealed Sources.

Multiple work types can be added to a registration form.

The screenshot shows the 'Work Type' selection interface. It features three checkboxes, each with a label: 'Unsealed sources', 'Sealed sources', and 'Radiation generators'. All three checkboxes are currently checked.

Depending on the work types selected further fields will display on the form and need to be completed – see table below.

Work Type Group	Work Type	Follow-up action 1	Follow-up action 2
Unsealed Sources	PET radionuclides	Specify radionuclides	None
	Iodination's	None	None
	Other Unsealed	Specify radionuclides	Provide more details
Sealed Sources	Teaching	Specify radionuclides	None
	Gamma irradiator	Specify department which it is being used in	Specify status of enhanced screening and review date
	Other sealed	Specify radionuclides	Provide more details
Radiation generators	X-ray set	Provide more details	None
	Electron microscope	None	None
	Particle accelerator	Specify department which it is being used in	None
	Other device > 5kV and emitting x-rays	Provide more details	None

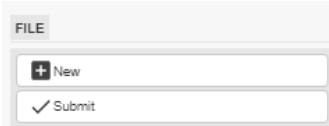

For each work type, you will need to complete the 'Start Date' for the work.

The review date can be used in reports to prompt a review of the worker's registration. This should be annually for Gamma irradiator work.

The 'End Date' field is used to de-register a worker, and is unlikely to be completed at the time of registration. (See 3.3 End dating a work type record)

Where more than one radionuclide needs to be specified, multiple can be added.

7. Ensure all mandatory fields are completed.
8. If you have any comments for the next stage in the approval process type them in the Comments box.
9. Read the declaration and sign the form in the 'RPS Signature' section.
If you have created a signature within Odyssey, you can use the 'Apply signature' button (see 5.3 Adding a signature), or draw a signature in the box.
10. Select the 'Submit' button at the top of the form.

A message will show at the top of the form, to acknowledge the form has been submitted, 'Successfully submitted workflow stage'.

11. The form will now be progressed automatically to the SRPS stage.

Note: Now the form is in Current Stages: SRPS, only the specified SRPS (or Safety Office) can access and amend the form. If the RPS now tries to access the form, they would see the form but read only and it will display as 'You are not authorized under the current workflow stages'.

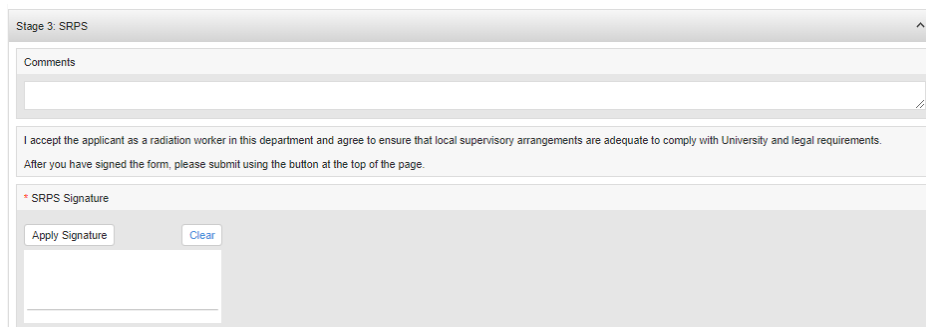

2.1.5 The SRPS stage

The purpose of the Stage 3 - SRPS stage is to review the details of the form and then accept the applicant as a worker within the department. The SRPS will be notified of a new registration form via an email and a system alert.

1. Select the link in the email to open the registration form.
2. Review the details in the worker and RPS stages of the form.
3. Edit any of the fields as necessary.

Note: Any changes made at this stage will not notify the worker nor the RPS. You will need to do this outside of Odyssey.

4. Add any additional comments. This may include any changes made to the form.

The screenshot shows the 'Stage 3: SRPS' form. It has a title bar with an upward arrow. Below is a 'Comments' section with a text area and a small icon. A declaration text reads: 'I accept the applicant as a radiation worker in this department and agree to ensure that local supervisory arrangements are adequate to comply with University and legal requirements. After you have signed the form, please submit using the button at the top of the page.' Below this is the 'SRPS Signature' section, which includes an 'Apply Signature' button, a 'Clear' button, and a large signature box.

5. Read the declaration and sign the form in the 'SRPS Signature' section.
If you have created a signature within Odyssey, you can use the 'Apply signature' button (see 5.3 Adding a signature), or draw a signature in the box.
6. Select the 'Submit' button at the top of the form.

The screenshot shows the 'FILE' section of the form. It contains two buttons: 'New' with a plus icon and 'Submit' with a checkmark icon.

A message will show at the top of the form, to acknowledge the form has been submitted, 'successfully submitted workflow stage'.

Note: Now the form is in Current Stages: ALM, only the specified ALM (or Safety Office) can access and amend the form. If the SRPS now tries to access the form, they will see the form but read only and it will display as 'You are not authorized under the current workflow stages'.

7. The form will now be progressed automatically to the Academic Line Manager stage.

2.1.6 The Academic Line Manager stage

The purpose of the Academic Line Manager (ALM) stage is for them to review the details completed on the form and confirm management responsibility that the worker registration is justified. The ALM will be notified of a new registration form via an email.

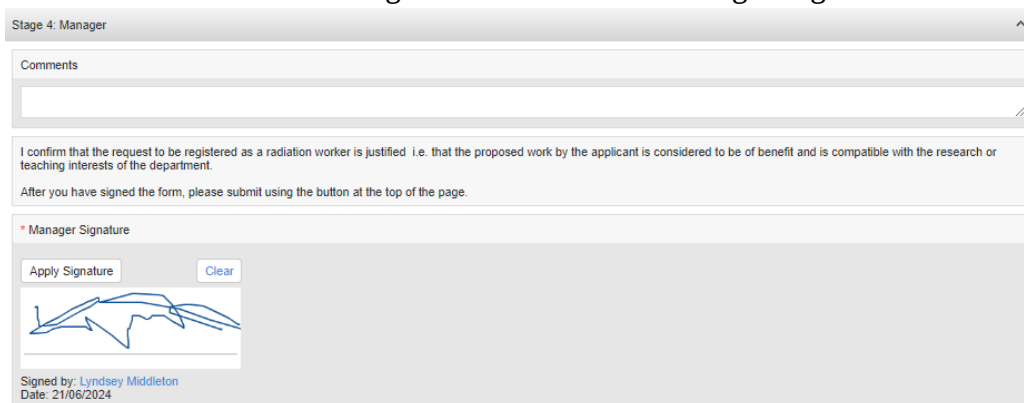

Note: The ALM may not necessarily be a system user, but they will still be able to view and approve this part of the form.

System Guidance for ALM can be found on the Safety Office website.

[Odyssey guidance](#) | [Safety Office \(ox.ac.uk\)](#)

In the situation whereby, a radiation worker has two Academic Line Managers, then the comments box should be used to make a note of the other ALM's name and confirm they are aware and approve of the worker's registration.

1. Select the link in the email to open the registration form.
2. The ALM should review the contents of the form.
 - a. If there is information that is incorrect, place a comment in the Comments box. This information will be read and edited by the Safety Office.
 - b. If the form is no longer required, follow the Terminate form process.
3. Read the declaration and sign the form in the 'Manager Signature' section.

4. Select the 'Submit' button at the top of the form.

A message will show at the top of the form, to acknowledge the form has been submitted, 'successfully submitted workflow stage'.

5. The form will now be progressed automatically to the Safety Office stage.

Note: Now the form is in Current Stages: Safety Office, only members of the Safety Office can access and amend the form. If the (S)RPS or ALM now tries to access the form, they will see the form but read only and it will display as 'You are not authorized under the current workflow stages'.

2.1.7 The Safety Office stage

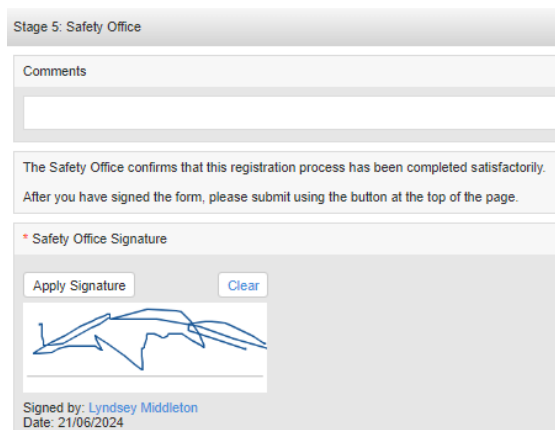

The purpose of the Safety Office stage is to confirm that the registration process has been completed satisfactorily. The work type details should also be risk-assessed in terms of requiring dosimetry or requiring classification.

All Safety Office users will be notified of a new registration form via an email and a system alert.

1. Select the link in the email to open the registration form.
2. Review the details completed on the form.
3. Edit any of the fields as necessary.

Note: Any changes made at this stage will not notify the workers, RPS, SRPS nor ALM. You will need to do this outside of Odyssey.

4. Add any additional comments.

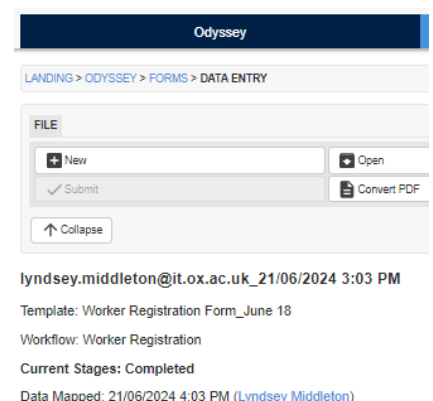

5. Read the declaration and sign the form in the 'Safety Office Signature' section. If you have created a signature within Odyssey, you can use the 'Apply signature' button (see 5.3 Adding a signature), or draw a signature in the box.
6. Select the 'Submit' button at the top of the form.

A message will show at the top of the form, to acknowledge the form has been submitted, 'successfully submitted workflow stage'.

This is the final stage of the registration process and once the form has been submitted the worker record is created in the system and can be accessed using the hyperlink on the worker's name at the top of the form.

2.2 Viewing a completed registration form

Completed registration forms for a radiation worker can be viewed in the Forms tab of the worker profile.

Note: This will only be for workers that have completed online forms since Odyssey was implemented, migrated workers will not have registration forms for their migrated work.

2.3 Registering a radiation worker with an external institute

Any workers that have a requirement to work at an external institute (i.e. not a University of Oxford department) should follow the process in section 2.1 Registering a new radiation worker.

You will be asked to specify an 'Oxford Host Department' which is the University department that the worker is associated with. This means that the (S)RPS of this department will have visibility of their worker record and work profile in Odyssey.

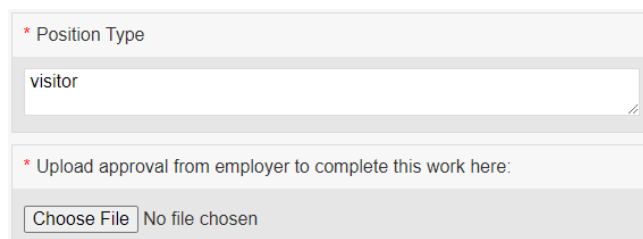

If external institute is not listed, please see 6.4 The external institution the worker is wanting to register with is not listed.

2.4 Registering a visitor for radiation work

Visitors to your department who will be working with ionising radiation¹ must be registered in Odyssey. Visitors that will be observing radiation work do not need to be registered. Please seek clarification from the Safety Office Radiation team if you are unsure if your visitor needs to be registered or not.

Visitors to the University can obtain a University Card/SSO account – this will be required in order to register in Odyssey. See 2.4.1 How to get a Single Sign-On (SSO) account.

Registering a visitor for radiation work is the same process as any other staff member or student, the only difference is that the visitor will need to upload an approval document from their employer during registration.

The screenshot shows a web form with two main sections. The first section is titled '* Position Type' and contains a text input field with the word 'visitor' entered. The second section is titled '* Upload approval from employer to complete this work here:' and contains a file upload interface with a 'Choose File' button and the text 'No file chosen'.

2.4.1 How to get a Single Sign-On (SSO) account

To use Odyssey a Single Sign-On (SSO), also known as an Oxford Account, is required. The trigger to get an SSO is applying for a University Card. Account activation detail for new members of staff, visitors and part-time students are provided by their college or department HR or IT team. More details are [available here](#).

All Staff and Students will have a University Card and SSO account and can therefore access Odyssey.

Visitors can also apply for a University Card and SSO account. Visitors are academics or researchers, who are not University employees, and generally come from another academic institution for a specific visit to Oxford usually lasting between a month and a year. More details are [available here](#), including the links to apply for a University Card:

If the visitor is a short-term visitor that has a requirement to use Odyssey, then they could apply for a Virtual Card. Virtual Access status is available for those who are not members of the University - such as external tutors, consultants and contractors - but who need to have access to certain web-based facilities, such as Odyssey. More details on this, and how to apply for this access is [available here](#).

¹ "Working" with ionising radiation means: (a) the production, processing, handling, disposal use, storage, holding or transport of radioactive substances; (b) the operation of electrical equipment emitting ionising radiation and containing components operating at [potential difference] energies above 5 kV. (c) work in places where the radon gas concentration exceeds an annual average activity concentration in air exceeding 300 Bq m³. Source: IRR17 Regulation 2(1)

2.4.2 Registering radiation workers manually (visitors without an Oxford SSO account)

Departments may occasionally have visitors come to Oxford to conduct radiation work for a short duration. If the worker will be working for less than a month and are therefore not able to apply for a temporary Oxford SSO account, they will be unable to use the 'New Worker Registration' form. Instead, the 'Manual Registration' form can be used, in which the Safety Office complete the 'Worker' section of the form.

This will register them as a worker, however they will not have access to Odyssey, as logging in requires an Oxford SSO.

Use this link, to submit a 'Manual Registration Form' request to the Safety Office:

[Odyssey Manual Registration Form](#)

2.4.3 Initiating the manual worker registration form

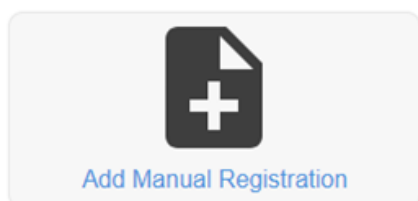

Once the Safety Office receive an 'Odyssey Manual Registration' form they will initiate the manual worker registration process within Odyssey.

The Safety Office will complete the worker details on the form before sending the form on to the following stages for completion and approval:

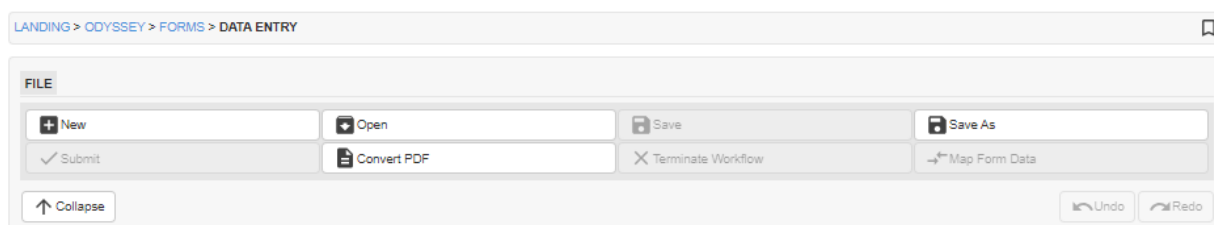

RPS > SRPS > Academic Line Manager > Safety Office.

This process is for Safety Office users only.

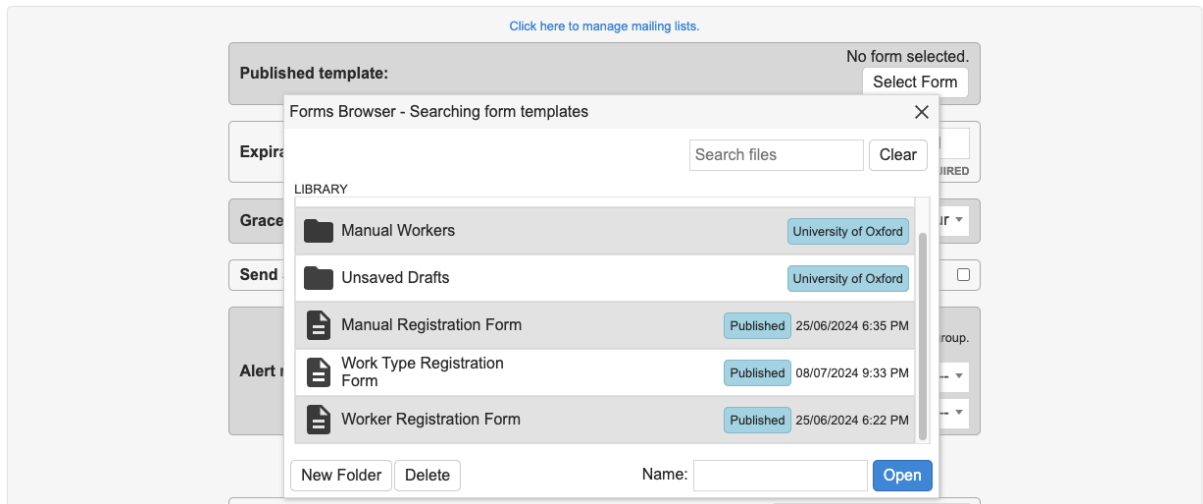

1. Ensure that the department that the worker will be working is selected in the top right of the screen.
2. From the landing page, select the 'Add Manual Registration' icon.

3. The 'Data Entry' page will open.
4. Select the 'New' button within the 'File' section.

5. Select 'Manual Registration Form' from the list and select the 'Open' button.

Note: If you have selected the wrong form, you can select the 'New' button to select a different form.

6. Complete the form on behalf of the visiting worker.

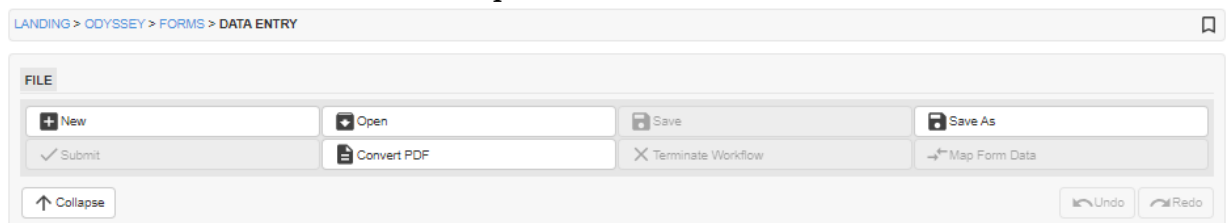

'Position Type' Enter 'Visitor' in this field.

Whilst this field will contain Staff, Student or Visitor for other registered workers, in this scenario, where you are using the manual registration form, 'Visitor' would be entered.

The approval document from the employer will need to be uploaded to the form.

'Employing Department' Enter 'Visitor – [name of institution/company]', for example, 'Visitor – Durham University'.

7. Select the 'Save As' button at the top of the form

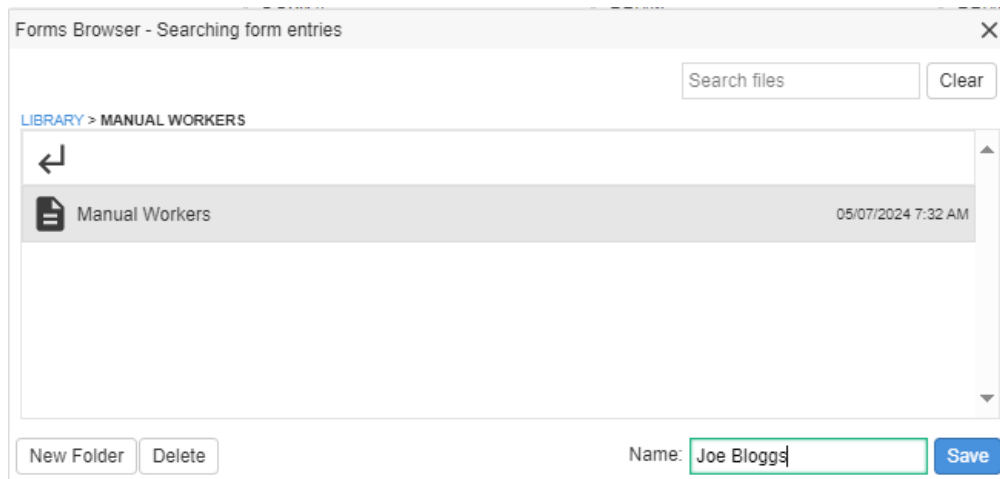

8. Select the 'Manual Workers' folder and select the existing folder for the department.

If a folder does not exist yet, select 'New Folder' and name it 'Manual Workers'.

Note: This folder will be specific to the department you selected in the top right corner at the start of this process.

9. In the 'Name' field type in the workers name and select the 'Save' button.

10. Select the 'Submit' button at the top of the form.

A message will show at the top of the form, to acknowledge the form has been submitted, 'successfully submitted workflow stage'.

The form will now be progressed automatically to the RPS stage and will need to be processed through all the approval stages as in [Section 2.1 Registering a new radiation worker](#).

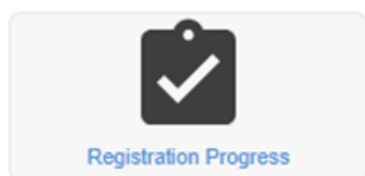

2.5 Viewing registration progress

You can view the progress of worker and work type registrations for the department(s) you are (S)RPS for. Safety Office users can view the progress of registrations in all departments.

This includes both completed registrations and those that are currently in progress.

Registrations includes those for new workers and new work types.

1. From the landing page, select the 'Registration Progress' icon.

- The table shows all registrations, and you can see which stage of the registration process the form is in (i.e. who needs to action the form) and the date it was created and last modified.

1 2

- You can open the form to view the details by selecting the 'Form Name' in the left column.

Note: the columns can be sorted by selecting the arrows on the column headers and you filter the list if you are looking for a more specific list of records.

This list can be used to identify registrations that may have stalled in the system (e.g. if someone is on annual leave/away on field work).

For example, the registration form is at the RPS stage and the RPS is away on field work. The SRPS can contact Safety Office to change the specified RPS to the SRPS or another RPS in department who will now be overseeing the work.

A member of the Safety Office would change the RPS and 'Save' the form meaning the newly specified RPS would be able to see the form and action it.

Note: The RPS will not be notified by email or system alert. This is because the workflow is not re-triggered by changing the appointed RPS. The workflow will notify the next stage, for example, RPS changed the ALM, the newly specified ALM will get notified as their workflow stage hasn't been triggered yet.

In exceptional circumstances, the Safety Office could access the registration form and complete it on behalf of the ALM/RPS/SRPS if appropriate.

Note: If you wish to check the expiry date of a link sent to a worker (set as default of 6 weeks from the form initiation) or an ALM then this can be done in the Link Management Screen; Odyssey > Forms > Email Forms > Manage Sent Forms.

2.6 Cancelling a Worker Registration form

A registration workflow may need to be terminated if the application is not justified, or the radiation-related work is no longer required. For example, another method has been deemed more appropriate for a particular experiment.

A worker registration can be terminated at any stage by the nominated person of the current stage Worker/RPS/SRPS/ALM. Contact Health and Safety Support Systems if a form needs terminating and the current stage user is unavailable.

Note: Once the worker registration has been terminated it cannot be undone and a new form would need to be initiated.

1. Either during the registration approval process, or by opening the form from the Workflow progress report, select the 'Terminate Workflow' button at the top of the form.

2. Enter the reason for terminating the application and select the 'Terminate' button.

3. The registration process will terminate. The incomplete registration will be saved with a current stage of Terminated.

Form Name	Form Template	Workflow	Current Stages	Date Created	Date Modified
lyndsey.middleton@gmail.com_24/06/2024 4:58 PM	Worker Registration Form_June 18	Worker Registration	Terminated	24/06/2024 04:58 PM	24/06/2024 05:03 PM

Terminated By: Lyndsey Middleton

Termination Reason: Worker no longer at the University

2.7 Appointing SRPS and RPS

The application form to appoint a new (S)RPS within a department will remain as the current form and will not be processed via Odyssey. The 'Notification of Appointment' forms are available on the [Safety Office website](#), and a copy should be forwarded to the University Radiation Protection Officer at the Safety Office.

Note: New SRPS and RPS must be registered as a radiation worker in Odyssey before they can be set up as a SRPS/RPS in the system. This must be for the same department as the SRPS/RPS appointment will be for. For example, they are being appointed in Physics and have a registration in Physics, this is correct. If, however, they have a work registration within Biochemistry and are newly appointed as RPS in Physics, they must complete a work registration for Physics.

Once the appointment has been approved, the Safety Office should add the new SRPS/RPS to the relevant permission groups. This process is for Safety Office users only.

1. Select Admin > Users > Groups to view all permission groups.
2. Select relevant groups. Click on group to edit the membership.

Roles (Inherited)

RPS - Botnar

SRPS - Botnar

3. Select the '+' sign by the worker that needs to be added to the group.

usr_281@migrated.ox.ac.uk	Frederick Abel	+
usr_440@migrated.ox.ac.uk	Friedrich Accum	+
usr_470@migrated.ox.ac.uk	Gary Ackers	+

4. The worker will then be added to the 'Selected Users' section.

Note: SRPS's need to be added to both the SRPS and RPS groups for their site. This ensures that they will appear in both RPS and SRPS dropdown lists and can therefore fulfil both these roles in the registration process if necessary. RPS's should only be added to the RPS permission group.

The Safety Office should then save the appointment form to the worker's profile in Odyssey.

1. The 'Notification of Appointment' form is received by the University Radiation Protection Officer.
2. Save the file to your local computer e.g. your Desktop
3. Go to the Workers profile. See 2.8 Viewing a radiation worker profile.
4. Select the 'Documents' tab and select the 'Add Document' button.

A blue rectangular button with the text "Add Document" in white.

5. Select the 'From Computer' button, and select the saved 'Notification of Appointment' form that you saved locally.
6. In the 'Document Label' name the saved document using naming convention: yyyy-mm-dd Worker Name - SRPS/RPS appointment
7. Notify HS System Support so they can assign the correct system permissions.

The Safety Office should then notify the RPS/SRPS to let them know that their system permissions have been updated. No system notifications will be sent.

There is a report available, named 'Dept RPS/SRPS System Users' to list all workers assigned RPS/SRPS roles in Odyssey.

Saved Reports

Saved Report: Dept RPS/SRPS System Users x ▼

2.7.1 Changes to RPS/SRPS appointments

The SRPS is responsible for keeping the worker data accurate and up to date. This includes notifying any changes to department SRPS/RPS roles.

If there are any changes to these roles in a department, the SRPS should first notify the Safety Office and discuss any pending role changes.

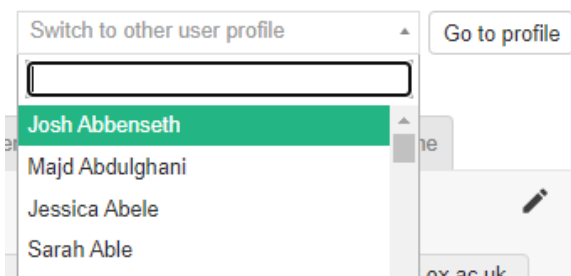

Health and Safety Systems Support should be contacted to action any permission changes needed within Odyssey. The Safety Office should upload any necessary documents/emails to the worker's profile in Odyssey.

2.8 Viewing a radiation worker profile

A radiation worker profile can be accessed in different ways:

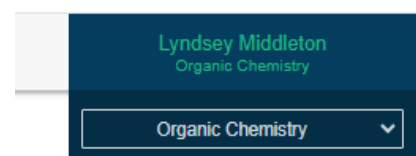

1. From the 'Active workers in my department' report, or any other report. The workers names are hyperlinks so they can be selected, and the profile page will appear.

2. Select the 'My Account' icon, then select 'Switch to other user profile' drop down box. This drop-down list will include active and non-active workers. You can search the name string to refine results further.

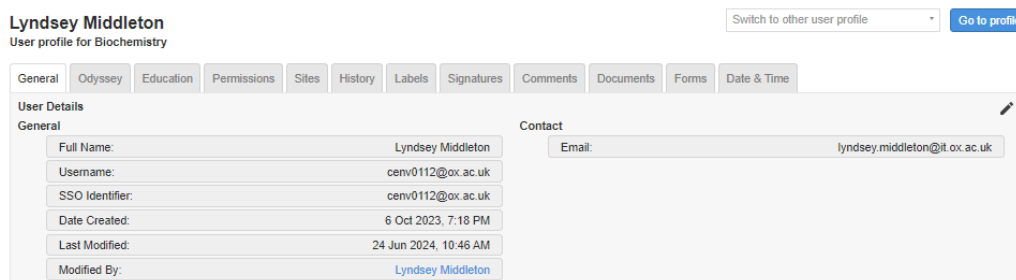

3. Safety Office users will also be able to access worker profiles from the 'Admin' icon.

Note: For SRPSs of multiple departments please ensure that you have selected the correct department in the top right corner.

A radiation worker profile has four sections.

1. **'General' details** This includes the workers name, SSO and email address, as well as details about when the record was created and when it was last modified and by whom. All these fields are read-only to workers and (S)RPS.

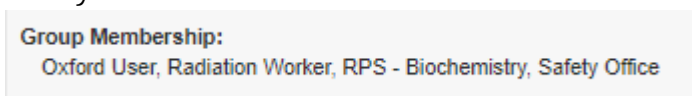

Note: If a worker no longer has any active work records (all work has been end-dated) then their profile will be 'Inactive', and this will be indicated after their name.

Bungo Akiyoshi (INACTIVE)

User profile for Biochemistry

2. **'Group Membership'** This is a list of all permission groups that the worker is a member of. All workers will be an 'Oxford User' and a 'Radiation Worker'. There are other permission groups for RPS and SRPS for each department and another group for Safety Office users.

3. **'Radiation Worker' details** This contains information about the worker including their title, Academic Line Manager, Employing Department, Position Type, Date of Birth, Sex, TLD Name and information relating to whether the worker is 'Classified'. The 'Employing Department' and 'Position Type' fields are automatically filled in from integrations with other University systems. The remaining fields were completed

during the work registration process.

Note: These fields (excluding Employing Department and Position Type) can only be edited by Safety Office users. If any of this information needs to be changed, then please contact the Safety Office.

4. **‘Work Registration’ records** Each worker may have one, or multiple work registrations. There will be one tab per host department. The department tabs will show the details of the work that the worker has registered to do and includes the Host Department, SRPS, Expected Start and End Dates and whether the worker has ‘Increased exposure’. In addition, more granular detail about the work type is recorded which was captured during the registration process. This includes details about the Work Type, the RPS, the machines or equipment they are working with and the radionuclides if relevant.

Note: where the worker no longer has active work (all work types have been end-dated) the tab will still be visible, but the icon will change to be crossed out.

Note: Any text in **blue** is a hyperlink and can be selected to show more details, if the user has the correct permissions to see those details. (‘Permission Denied’ might appear until we roll out further system permissions for later phases of the project).

Radionuclides: [\(P-32\) Phosphorous-32](#)
Radionuclides: [\(S-35\) Sulfur-35](#)

Note: SRPS can view all the work that a worker is doing, if they are hosted in their department. Even work records for registrations in other radiation departments is visible, albeit read only. SRPS can edit some of these fields but only for work in their department. See 3.2 Keeping work registrations up to date.

3.0 Keeping radiation worker records updated

3.1 Adding additional work types to a radiation worker record

If an existing radiation worker has a requirement to do new work in a department they are actively registered with, then 'Work Type Registration' form should be used to authorise this.

The form is initiated in the system and will pass through the following stages for completion and approval:

RPS/SRPS > Academic Line Manager > Safety Office.

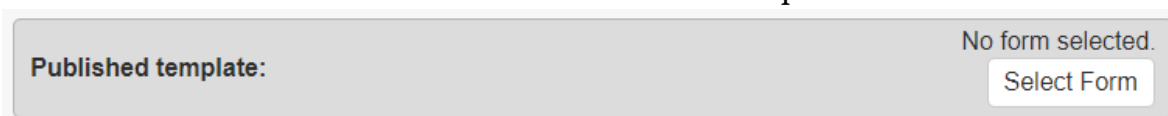

Note: for Work Type forms the RPS/SRPS can sign in parallel.

Unlike the 'Worker Registration Form' the worker does not need to complete any details. The new work record will be added to the worker's existing profile.

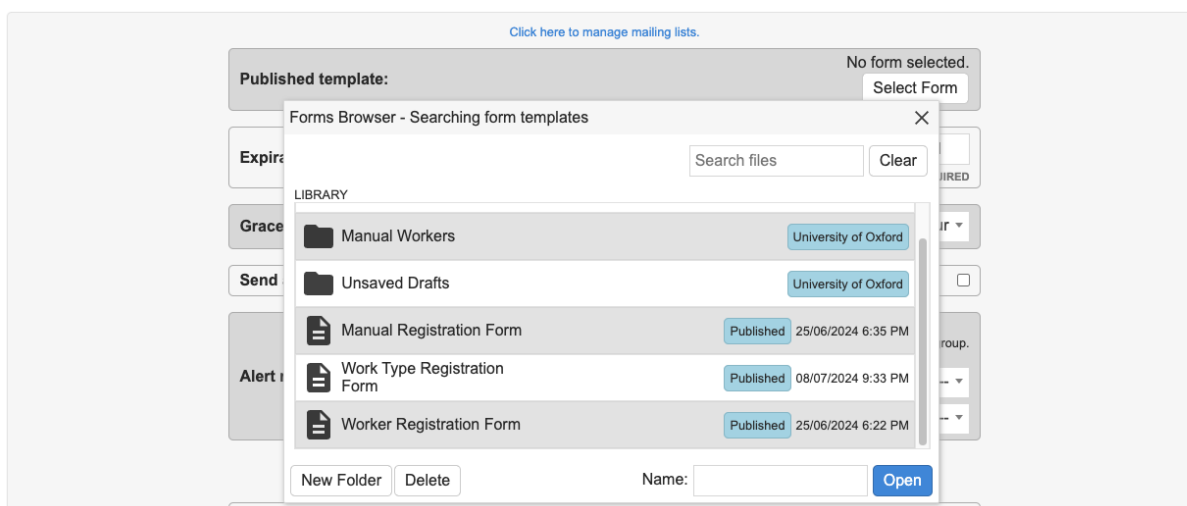

1. From the landing page, select the 'Send Registration Form' icon.

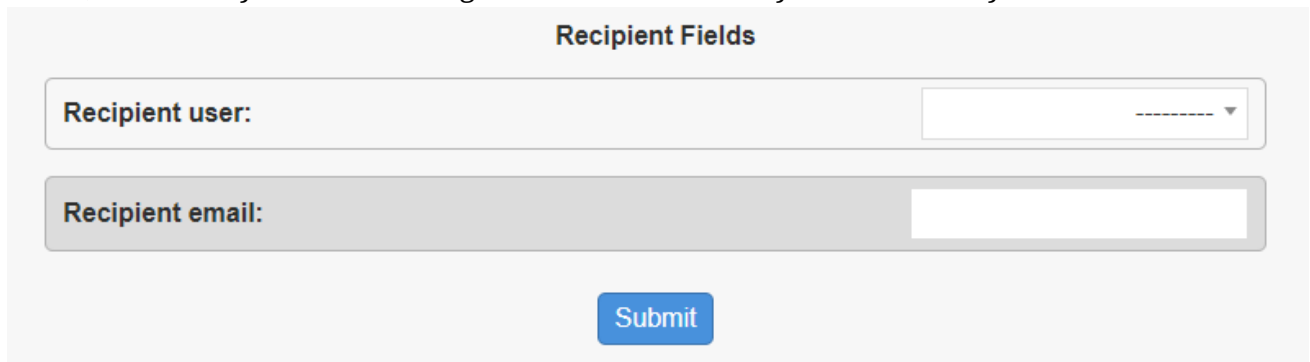

2. The 'Send Form' page will have opened.
3. Choose the 'Select Form' button with the 'Published template' section.

4. Select 'Work Type Registration' from the list and select the 'Open' button.

5. Select the worker's name from the 'Recipient user' list (it is better to use this than the email, to ensure you are selecting a worker who already exists in the system).

A screenshot of a web form titled "Recipient Fields". It contains two input fields: "Recipient user:" which is a dropdown menu with a dashed line and a downward arrow, and "Recipient email:" which is a text input field. Below these fields is a blue "Submit" button.

Note: You can select the selection arrow and start typing the person's name.

You can specify the Work Type Information and RPS/SRPS at this point, or at the next stage, step 7.

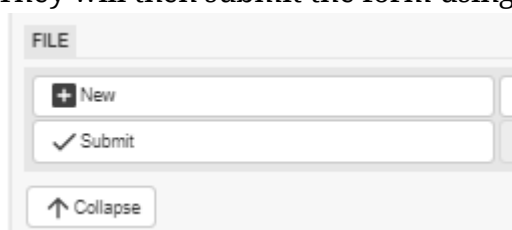

6. Select the 'Submit' button.
7. The workflow has now been initiated and is automatically in the RPS/SRPS stage. You will receive an email and alert that there is a new work type registration.

Note: If you have sent the form to the wrong email address, you will need to contact the Safety Office and ask them to revoke the email or terminate the workflow. As the (S)RPS, you will need to send a new work type form and ensure the correct user is selected.

8. Open the form and complete Stage 1 of the form specifying details about the new work type. For more details on this see 2.1.4 The RPS stage in the New Worker Registration form process.
9. Once the is completed, select the 'Submit' button.

Note: More than one new work type can be added here, if they are all within the same host department and supervised by the same RPS.

10. You will now see the form in the 'Workflows Progress' list, current stages RPS Signature, SRPS Signature.
11. The RPS and the SRPS will then receive an email and system notification that a new work type registration requires their approval. Both will need to review the form, sign it and submit it.
12. If not already reviewed and submitted by the SRPS, the SRPS will need to review the form and submit it.
13. The ALM will then receive a system alert and an email to review and sign the form. They will then submit the form using the button at the top of the screen.

A screenshot of a sidebar menu titled "FILE". It contains three items: a "New" button with a plus icon, a "Submit" button with a checkmark icon, and a "Collapse" button with an upward arrow icon.

14. The Safety Office will then receive a system alert and an email to review and sign the form to confirm that the registration process has been completed satisfactorily. They will then submit the form using the button at the top of the screen.
15. The new work type will now have been added to the radiation worker profile and the process is completed.
16. The worker's name can be selected to view this.

3.2 Keeping work registrations up to date

It is the SRPSs responsibility to ensure that the work records for all workers in their department are kept up to date as far as possible. This means that any workers who are no longer working with a specific work type need to have this work type registration end dated. If a worker no longer has any active work in the department, they will then be made inactive within that department by the Safety Office.

If a worker has no active work in any department, then their worker record will become inactive.

If a worker has a requirement in the future to again work with radioactive materials or equipment, then they would register as a new radiation worker and the record will become active again.

A duplicate worker record will not be created. Their new work registration would show as active, and their previous inactive tabs will also show.

3.3 End dating a work type record

1. Go to the Workers profile.
See 2.8 Viewing a radiation worker profile.

Switch to other user profile
Go to profile

lyndse

Lyndsey Middleton

2. Select the relevant department tab and select the pencil icon. You will only see the pencil/edit icon against the Department you have permission to manage.

3. Within the Sub Work Type, enter an end date.
If the user only has one work type, you can also enter the Expected End Date, however if the Worker has multiple work types that are still valid, it is best to ensure that the expected end date is valid (i.e. future date, or date of latest work type end date).

4. Select the 'Save' button. The display message will confirm your change submission. The changes will not be applied until they have been reviewed and approved by the Safety Office.

5. Following review and approval by the Safety Office the work registration record will be saved with an end date.

Work Registration Oxford User, RPS - Biochemistry

Host Department: [Ashmolean Museum](#) Expected Start Date: 22/06/2024

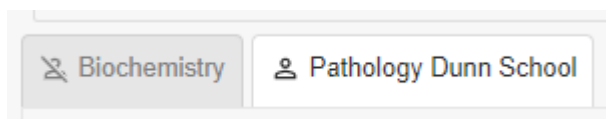

SRPS: [Tammi Williams](#) Expected End Date: None

Increased exposure?: No

Sub Work Type:

Work Type:	Unsealed sources
Sub Work Type:	PET radionuclides
RPS:	Tammi Williams
Start Date:	22/06/2024
End Date:	06/07/2024
Further Details:	None
Review Date:	None
Radionuclides:	(F-18) Fluorine-18
Radionuclides:	(Ga-68) Gallium-68

Note: If there are no longer any active work records this worker will become inactive in your department. This is subject to a process from the Safety Office, subsequently when this worker is made inactive, the department tab will change icon to indicate there are no active records in the department.

3.3.1 Other changes to work types

If there are other changes needed to the work records, such as removing one or two radionuclides from a record with multiple radionuclides, the process is to end date the existing work type record and then create a new work type registration for the remaining radionuclides. See 3.1 Adding additional work types to a radiation worker record.

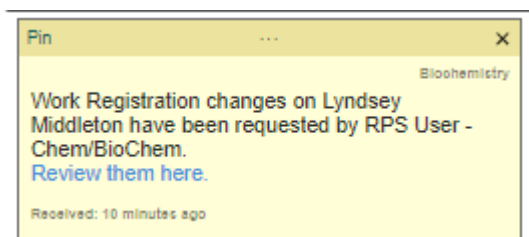

3.4 Approving changes to work registrations

This process is for Safety Office users only.

When (S)RPSs make changes to work registrations they require approval by a Safety Office user. The Safety Office will be notified of changes by email and system alert.

Note: The only changes that (S)RPSs are advised to make to work registrations is updating the end date when the work is completed. Whilst it is possible to make other changes, such as adding radionuclides and changing other details of the work type, this is not the intended process. Instead, the work type record would be ended and the new work type registration process should be followed.

1. Select the link in the email or the system alert to open the registration form.

2. Work registration record will have red icon to indicate that changes are awaiting approval.

Note: If the worker has multiple registrations ensure you select the Department. The notification tells you the RPS/SRPS who requested the change, but it does not specify the Department. You might have to select each tab to see the icon.

3. Select the red icon, any changes will be marked with 'Changed' in green text.

4. Review changes and approve or reject using buttons at the top of the work record.

Note: The user that requested the change and the data and time is supplied, should a conversation be needed to discuss the changes in detail with the (S)RPS.

Anything that is not an end date at present should have the changes Rejected.

5. Once approve/reject has been selected the changes are saved to the worker registration or rejected.
6. The (S)RPS who requested the change will receive an email/notification that the Work Registration changes requested for the worker have been approved and applied by the Safety Office member who applied (or rejected) them.

Note: It is not possible to approve parts of the change and not others.

Note: Selecting "Delete Request" will remove any record of the change request and will not display in reports. This function makes sense to use when the request was submitted in error.

3.4.1 Viewing pending changes to work registrations

A report is available to view all pending changes to work registrations. This will mean that sharing the responsibility for approving these changes amongst the Safety Office team is easier, and the potential for any to be missed minimised.

1. Ensure 'University of Oxford' is selected in the top right of the screen.
2. From the landing page, select the 'Reporting' icon.

3. Select the Saved Report: 'Work Registration Changes Requiring Approval'.
4. Select the 'Generate Report' button.

Work Registration Changes Requiring Approval						
Author ↓	Date Submitted ↓	Target ↓	Status ↓	Reviewed By ↓	Approval Date ↓	Rejected Date ↓
Brendan O'Connor Test	08/07/2024 2:19 PM	Brendan O'Connor Test Work Registration Physics	Awaiting review			
Brendan O'Connor Test	19/07/2024 12:39 PM	Robert Adler Work Registration Physics	Awaiting review			
Brendan O'Connor Test	19/07/2024 12:39 PM	Leon Cooper Work Registration Physics	Awaiting review			

Displaying 3 entries

Report generated on 19/07/2024

5. The 'Status' column will show any records awaiting review.
6. Select the worker's name in the 'Target' column to view worker's profile.
7. Review the changes and approve/reject.
8. Once a change is approved/rejected it no longer display on this report as the 'Status' will be updated and no longer match the report filter.

3.5 Marking a worker as inactive

This process is for Safety Office users only.

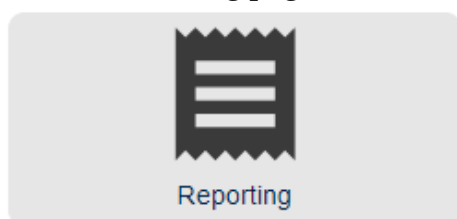

A worker record is marked as inactive when they no longer have any active work in any department. All their work records have been end dated. The Safety Office are responsible for marking such workers as inactive in Odyssey. Marking a worker as inactive will update the work department icon on the worker record and remove them from drop down lists of workers throughout the system.

Note: This process should be completed at least once a month

1. This needs to be completed for each department in turn, by selecting the department in the top right of the screen.

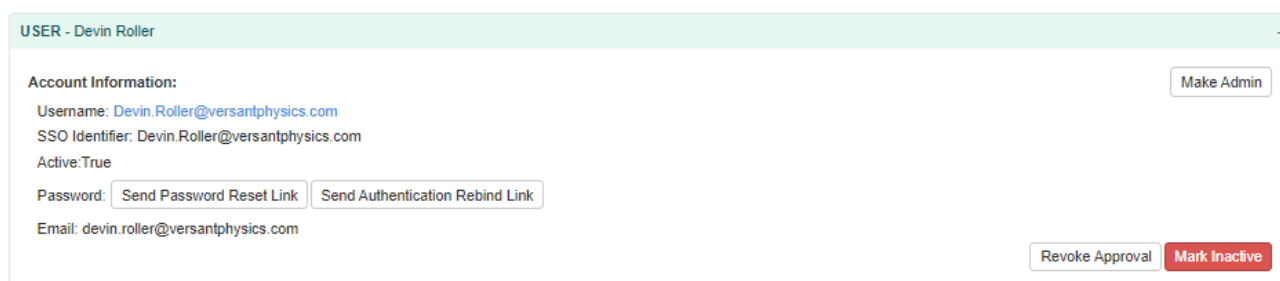

1. From the landing page, select the 'Reporting' icon.

2. Select the Saved Report: 'Inactive Workers in department'.
3. Select the 'Generate Report' button.
4. Run report 'Inactive workers in department'
This must be done for each department using site drop down list in top right of screen.

It might be easier to duplicate your web browser and have the report on one monitor, and carry out the next steps in a separate tab on a second monitor (if you have one). Remember to change the site in both windows.

5. Select the 'Admin' menu, then from the second menu select 'Users'.
6. From the list find the user or use the Search by to find them.
7. Expand the user and select the 'Mark Inactive' button.

3.6 Uploading documents to a worker profile

Documents can be uploaded against the worker profile in Odyssey. Both Safety Office and (S)RPS users can use this functionality (as well as radiation workers themselves). This can be used to upload relevant documents that relate to the radiation worker. They will then be visible to anyone that has access to the radiation worker profile.

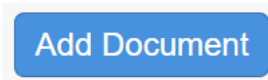

File formats accepted are PDF, Excel, Word, Text files, CSV, PNG, JPEG, and GIF. There is a max file size which is 1 GB for non-images and 10 MB for images.

These are documents that can be uploaded:

- **Local training checklist:** Uploaded by (S)RPS. This will be useful to see which training has been completed and which remains pending.
- **Safety Office Training Certificates:** Uploaded by radiation worker or (S)RPS. Safety office training certificates can be uploaded. It would be useful to see which workers have completed the training.
- **SRPS/RPS application forms:** Uploaded by the Safety Office. The 'Notification of Appointment' document will be uploaded to the worker profile.
See 2.7 Appointing SRPS and RPS

3.6.1 Upload a document:

1. Go to the Workers profile.
See 2.8 Viewing a radiation worker profile.
2. Select the 'Documents' tab and select the 'Add Document' button.

3. Select the 'From Computer' button, and select the file to upload.

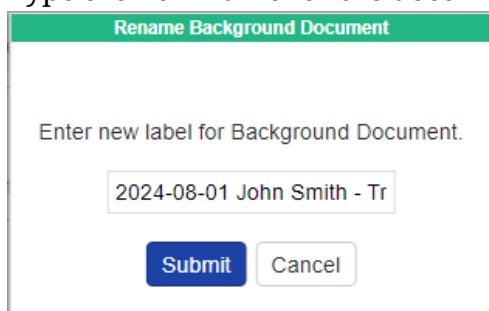

Add Background Document for Lyndsey Middleton

A form titled "Add Background Document for Lyndsey Middleton". It contains a "Document label:" field with the text "250624 LMiddleton Training" and a "REQUIRED" label. Below it is a "File:" field with a "test.txt" file selected. There are two buttons: "From Computer" and "From Cloud Library". At the bottom are "Cancel" and "Save" buttons.

4. In the 'Document Label' name the saved document using naming convention:
yyyy-mm-dd Worker Name - Document Description
for example "2024-08-01 John Smith - Training Checklist"
5. Select 'Save'

3.6.2 Edit Document Name

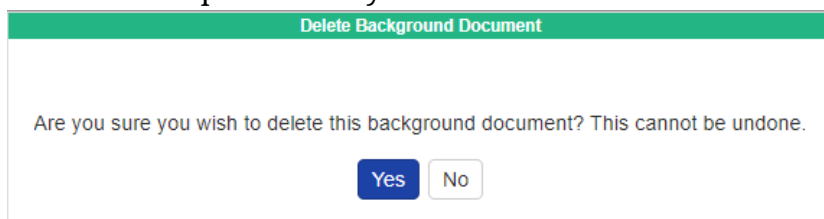

1. On the 'Documents' tab, select the pencil icon.
2. Type the new name for the document.

A dialog box titled "Rename Background Document". It contains the text "Enter new label for Background Document." and a text input field with the text "2024-08-01 John Smith - Tr". At the bottom are "Submit" and "Cancel" buttons.

3. Select the 'Submit' button.

3.6.3 Deleting Documents

1. On the 'Documents' tab, select the cross icon.
2. Select 'Yes' to permanently delete the document.

A dialog box titled "Delete Background Document". It contains the text "Are you sure you wish to delete this background document? This cannot be undone." At the bottom are "Yes" and "No" buttons.

3.7 Adding comments to the worker profile

(S)RPSs and Safety Office users can add comments to a radiation worker profile. This can be information that is not recorded anywhere else but is important to save against their record. Examples could be confirmations of dates that an RPS appointment form was received, or extra information about a certain type of work that is being done.

1. Go to the Workers profile.
See 2.8 Viewing a radiation worker profile.
2. Select the 'Comments' tab.

The screenshot shows the 'Comments' tab of a worker profile. At the top, there is a search bar with 'lyndse' entered and a dropdown menu showing 'Lyndsey Middleton'. A 'Go to profile' button is next to it. Below the search bar, there are tabs for 'General', 'Odyssey', 'Education', 'Permissions', 'Sites', 'History', 'Labels', 'Signatures', 'Comments', 'Documents', 'Forms', and 'Date & Time'. The 'Comments' tab is selected. The main area shows 'No comments found.' and a '1' in a green box. Below this is the 'Add Comment' section, which includes a text area with the placeholder 'Comment:', a rich text editor with a toolbar (File, Edit, View, Format) and a 'Save' button. The text editor contains the text 'RPS appointment letter received 12/06/2024'.

3. Enter your comments and select the 'Save' button.
4. The comment will be saved against the worker profile and can be edited or deleted. Multiple comments can be added to a worker record. The system user that added the comment is recorded as well as the time and date stamp.

The screenshot shows the 'Comments' tab of a worker profile. The main area displays a comment entry. The entry has a yellow header bar with the text 'COMMENT - Lyndsey Middleton' and '24/06/2024 03:50 PM'. Below the header bar is a yellow box containing the text 'RPS appointment letter received 12/06/2024'. To the right of the header bar are 'Edit' and 'Delete' buttons. Below the comment entry, it says 'Displaying 1-1 of 1 entries' and a '1' in a green box.

Note: Comments can be seen by all (S)RPSs that can view the worker profile and the worker themselves.

Note: The comments field can be added as a field to reports if necessary.

3.8 Marking a worker as Classified

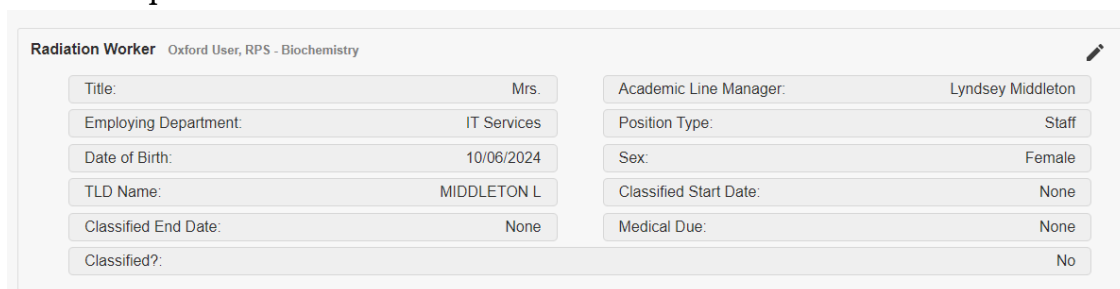

The Safety Office are responsible for maintaining classified worker records. It is important that these are kept up to date and that there is an accurate record of which workers have classified status at any time, and when their last and next medical due dates are.

1. Go to the Workers profile.
See 2.8 Viewing a radiation worker profile.

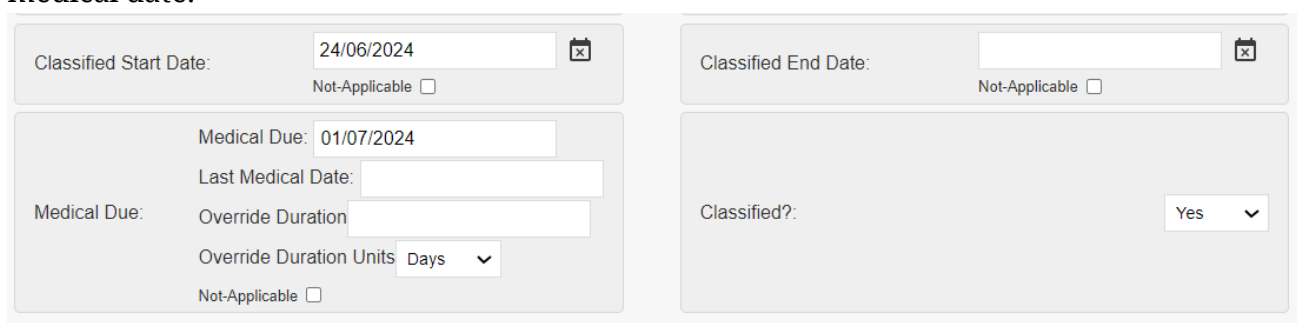

A dropdown menu titled 'Switch to other user profile' with a search bar containing 'lyndse'. Below the search bar, a green highlight is over the name 'Lyndsey Middleton'. To the right of the dropdown is a blue button labeled 'Go to profile'.

2. Select the pencil icon to edit the worker details.

The form shows details for a worker. Fields include: Title (Mrs.), Employing Department (IT Services), Date of Birth (10/06/2024), TLD Name (MIDDLETON L), Classified End Date (None), Classified? (No), Academic Line Manager (Lyndsey Middleton), Position Type (Staff), Sex (Female), Classified Start Date (None), and Medical Due (None). A pencil icon is in the top right corner.

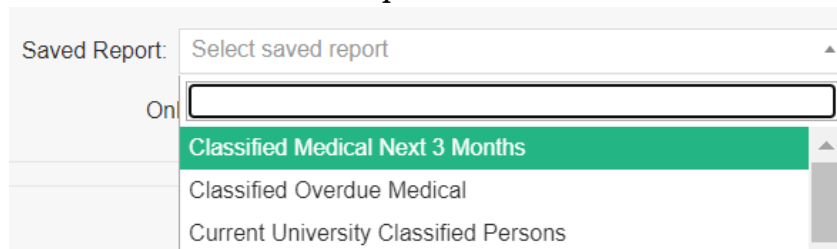

3. Update 'Classified?' to 'Yes' and enter the 'Classified Start Date'.
4. Either enter the 'Medical Due' date or, if known, the 'Last Medical Date', this will automatically populate the 'Medical Due' with the date in 365 days from the last medical date.

This section contains two main input areas. The first area has 'Classified Start Date' (24/06/2024) and 'Classified End Date' (empty). The second area has 'Medical Due' (01/07/2024), 'Last Medical Date' (empty), 'Override Duration' (empty), and 'Override Duration Units' (Days). The 'Classified?' dropdown is set to 'Yes'.

5. If the worker is no longer Classified, then the worker record needs to be updated with a 'Classified End Date'.

Note: There are various reports available related to classified workers.

A dropdown menu titled 'Saved Report:' with a search bar. The menu is open, showing options: 'Classified Medical Next 3 Months' (highlighted in green), 'Classified Overdue Medical', and 'Current University Classified Persons'.

3.9 Updating a Worker's Academic Line Manager (ALM)

Only Safety Office users can update the ALM field.

If a worker's ALM needs to be updated, then the (S)RPS should email the Safety Office to request this.

Note: If the Worker has a new Work Registration form or a Work Type form and the most recent ALM is populated here, this will update the Workers record with the latest ALM from a Registration/Work Type form.

3.10 Changes to Worker's Personal Details

Odyssey is integrated with other University systems and as such some of the fields on the worker profile are populated from these.

The personal details taken from other University systems are:

- Name
- SSO
- Email address
- Employing department
- Position type

The only way to change this information would be in the source systems themselves, for students this would be Student Self Service and for staff it is Employee Self Service.

The fields that can be changed within Odyssey are:

- Title
- Date of birth
- Sex

Only Safety Office users can make these changes so (S)RPSs should email the Safety Office to request any changes to these.

4.0 Reports

There are 21 pre-defined (saved) reports that have been created in Odyssey. These have been specifically created to cater for the more common requirements that Departments and Safety Office have in terms of reporting on worker information and are available to be run on demand.

The pre-defined reports cannot be overwritten by (S)RPS, but it is possible to edit the report results by adding filter queries. The additional filter queries cannot be saved. If there was a need to update pre-defined saved reports a request can be made to update this report for all.

Furthermore, it is possible to create custom reports. See 4.6 Creating a new report.

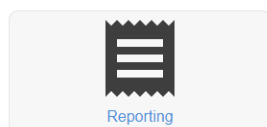

4.1 Running a report

If you are a SRPS for more than one department ensure that the department that the worker will be working is selected in the top right of the screen.

Note: Safety Office users may find it easier to stay within the 'University of Oxford' site but select the department in the 'Filter report results by' menu.

1. On the landing page, select the 'Reporting' icon.

2. Select the 'Load Saved Report' button within the section.

Reporting

3. Select a report from the 'Load Saved Report' to access your 'Saved Reports'..

By default, the list will show the saved reports. The pre-defined reports are described in 4.8

- Report Catalogue section of this document.
- Select 'Generate Report' button and the report data will be displayed on screen.

Active Workers in my Department

Oxford User

Name	Employing Department	Position Type	Host Department
Miguel Aloubierre	Department of Biochemistry	Student	Biochemistry
Rudolph Bergh	Medical Sciences Doctoral Training Centre	Student	Biochemistry
Katherine Bittig	Biochemistry	Visitor	Biochemistry
Alison Butler	Biochemistry	Visitor	Biochemistry
Emanuel Costa	Biochemistry	Student	Biochemistry
Joseph Crosse	Department of Biochemistry	Staff	Biochemistry
Gustaf Dalén	Department of Biochemistry	Student	Biochemistry
Helen Dyer	Department of Biochemistry	Staff	Biochemistry
Albert Fert	Department of Biochemistry	Student	Biochemistry
Hero Fiennes-Tiffin	St Edmund Hall	Student	Biochemistry

4.2 Downloading reports

All reports can be downloaded to CSV format or PDF using these buttons:

Add Automated Report Email Report Download CSV View PDF

If you want to manipulate the data, downloading a CSV file will allow you to open it in Excel.

4.3 Applying logos or footer text to a report

Templates can be defined for reports so that when reports are run, they have specific logos or header/footer information.

A standard template is available to all Departments to use called '**University Template**' which contains the University logo and a standard footer: 'University of Oxford Radiation Management System'.

Multiple templates can be defined, and a specific template selected each time a report is run. If no template is selected, then no logo or footer text will appear on the report.

- On the 'Reporting' page, select the 'Show' button within the 'Saved Reports' section.

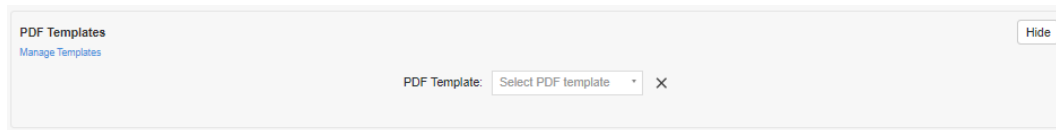

PDF Templates

Show

- From the PDF Template menu, select the template you require.

4.3.1 To create a new template

1. Within the 'PDF Templates' section, select 'Manage Templates'

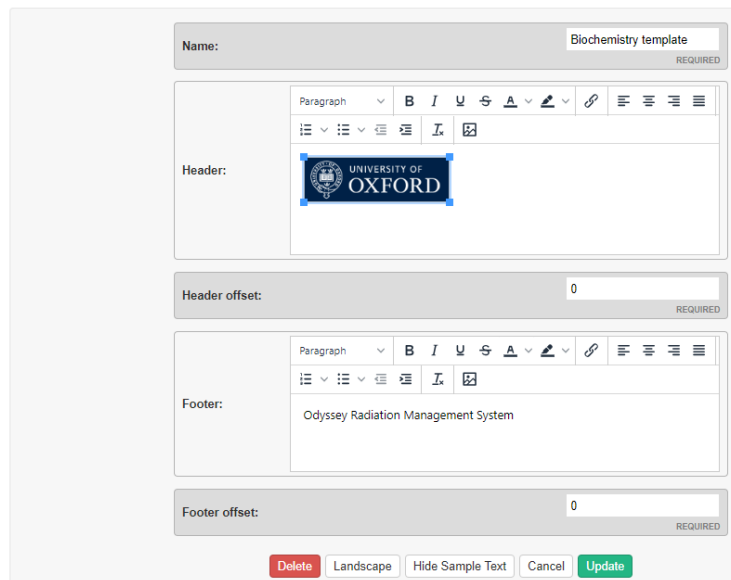

PDF Templates
Manage Templates

PDF Template: Select PDF template X

2. Select the 'New Template' button in the top right of the page.

Edit PDF Template

New Template

Name: Biochemistry template REQUIRED

Header: UNIVERSITY OF OXFORD

Header offset: 0 REQUIRED

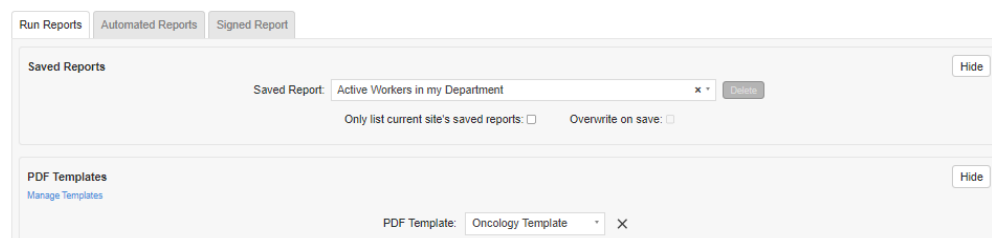

Footer: Odyssey Radiation Management System

Footer offset: 0 REQUIRED

Delete Landscape Hide Sample Text Cancel Update

3. Type the name for the template in 'Name:'
4. Add the header and footer information.
 - a. Formatting such as bold, italics can be applied to text
 - b. Images can be uploaded – select the 'Insert image' button. 
5. When complete select the 'Update' button.
6. Once the template has been created, after selecting the report, ensure that a 'PDF Template' is selected.
7. Then when 'Generate Report' is selected the report will run with the template information.

Manage Templates

PDF Template: Oncology Template X

4.4 Emailing reports

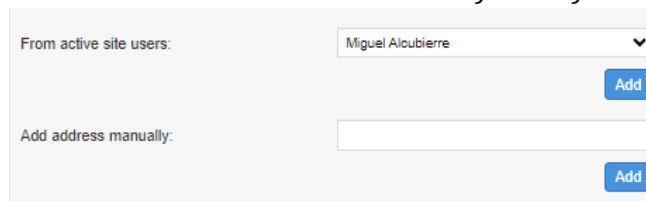

After generating a report, it can be emailed.

1. Generate the report.
2. Select the 'Email Report' button.

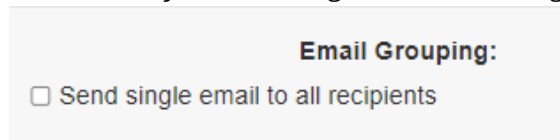

A horizontal row of four buttons: 'Add Automated Report', 'Email Report', 'Download CSV', and 'View PDF'.

3. Add the recipients:
 - a. Select Registered Radiation Workers from the list of 'active site users'
 - b. Add the email addresses manually if they are non-system users.

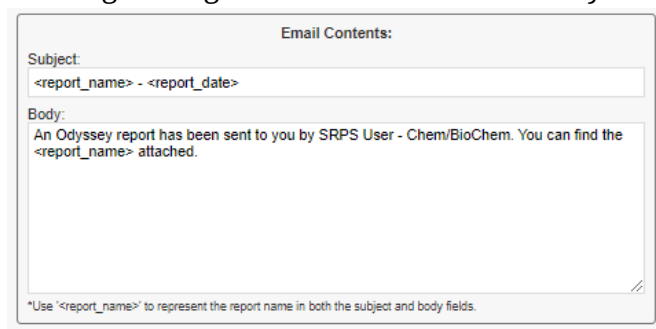

A form with two sections. The first section is labeled 'From active site users:' and contains a dropdown menu with 'Miguel Alcubierre' selected and an 'Add' button. The second section is labeled 'Add address manually:' and contains a text input field and an 'Add' button.

Note: Multiple users can be added and you can select if you'd prefer to send the emails individually or as a single email to the group.

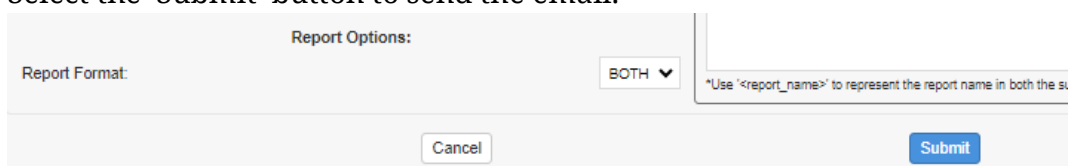

Email Grouping:
☐ Send single email to all recipients

4. The email contents can be edited. The <report_name> and <report_date> can be used to bring through these fields automatically.

Email Contents:
Subject:
<report_name> - <report_date>
Body:
An Odyssey report has been sent to you by SRPS User - Chem/BioChem. You can find the <report_name> attached.
*Use '<report_name>' to represent the report name in both the subject and body fields.

5. Select the 'Report Format' – options are PDF, CSV or both.
6. Select the 'Submit' button to send the email.

Report Options:
Report Format: BOTH
*Use '<report_name>' to represent the report name in both the subject and body fields.
Cancel Submit

4.5 Automating reports

After generating a report, it can then be automated, so it is emailed to a recipient or mailing list at a pre-defined date/time or interval. This will mean that the report doesn't need to be run manually each time.

The Safety Office and Department (S)RPS users can choose Saved Reports (or their own created reports) to be automated for their own needs.

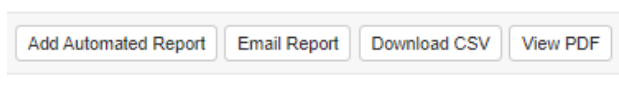

Note: If the report contains date filters, it is recommended using the relative date ranges (e.g. Next 3 months opposed to a specific date range (e.g. 1 Sep 24 – 31 Dec 24).

Note: If the Safety Office create an automated report at parent level – University of Oxford this is not displayed to all departments.

If the SRPS of 'Physics' creates an automated report, the RPS(s) of Physics will also be able to see those automated reports in their table of automated reports.

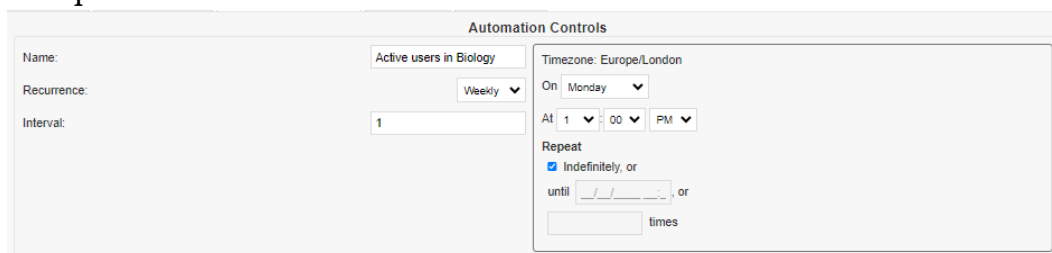

4.5.1 Add an Automated Report:

1. Select the 'Add Automated Report' button.

A row of four buttons: 'Add Automated Report', 'Email Report', 'Download CSV', and 'View PDF'.

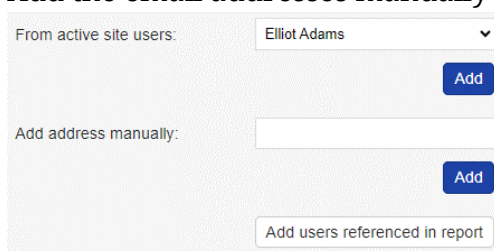

2. Complete the 'Automated Report Form' with details of the:
 - a. 'Name'
 - b. 'Recurrence' pattern of once, daily, weekly, monthly or yearly
 - c. 'Interval' (e.g. for create fortnightly or quarterly patterns)
 - d. a 'Repeat' schedule

The 'Automation Controls' form contains the following fields:

- Name: Active users in Biology
- Recurrence: Weekly
- Interval: 1
- Timezone: Europe/London
- On: Monday
- At: 1:00 PM
- Repeat: ☒ Indefinitely, or until []/[/]/[], or [] times

3. Add the recipients:
 - a. Select Registered Radiation Workers from the list of 'active site users'
 - b. Add the email addresses manually if they are non-system users.

The form for adding recipients includes:

- From active site users: Elliot Adams (dropdown menu)
- Add button
- Add address manually: []
- Add button
- Add users referenced in report button

Note: Users referenced in the report can be automatically added to the recipients list using the 'Add users referenced in report' button.

Note: Multiple users can be added and you can select if you'd prefer to send the emails individually or as a single email to the group.

Email Grouping:

☐ Send single email to all recipients

4. The email contents can be edited.

Email Contents:

Subject:
<report_name> - <report_date>

Body:
An Odyssey report has been sent to you by SRPS User - Chem/BioChem. You can find the <report_name> attached.

*Use '<report_name>' to represent the report name in both the subject and body fields.

5. Select the 'Report Format' – options are PDF, CSV or both.
6. Select the 'Save' button.

Report Options:

Report Format: PDF ▼

*Use '<report_name>' to represent the report name in both the subject and body fields.

Cancel Save

7. The report will then be automatically sent at the required date/time and then resent at the defined interval.

4.6 Creating a new report

New reports can be created to suit a new requirement. These can be based on existing saved reports or created from scratch.

4.6.1 Adding additional fields to an existing saved report

Additional fields can be added from the 'Oxford User' template, which are fields about the worker, or from the 'Work Type' itself.

1. On the 'Reporting' page, scroll to the 'Mark the template fields to be included in the report'. Select the 'Show' button next to the 'Oxford User' heading.

- Fields already displayed on the report will be ticked.
Select the additional fields to be added as columns to the report.

Mark the template fields to be included in the report:

Oxford User Show all fields: ☐

☐ Title ☐ Academic Line Manager ☐ Employing Department ☐ Position Type ☐ Visitor Contact Information ☐ Date of Birth

☐ Sex ☐ TLD Name ☐ Classified Start Date ☐ Classified End Date ☐ Medical Due ☐ Last Medical Date ☐ Classified?

☐ Migrated ☒ Host Department ☐ Expected Start Date ☐ SRPS ☐ Expected End Date ☐ Increased exposure?

☒ Sub Work Type (nested)

Oxford User Sub Work Type Nested Fields

☐ External Institution ☐ Work Type ☒ Sub Work Type ☐ RPS ☒ Start Date ☒ End Date ☐ Radionuclides

☒ Location ☐ Further Details ☒ Enhanced Screening? ☐ Review Date

Save Report Filters Generate Report

- To add 'Work Type' field, select the 'Sub Work Type (nested)' check box.
- To save this changed report as a new report select 'Save Report Filters' and give the report a name. You can also select the groups that will see this report in their menus. Select the 'Save' button.

Save Report

Name:

Groups:

- ☒ SRPS - Biochemistry
- ☒ SRPS - Chemistry

Cancel Save

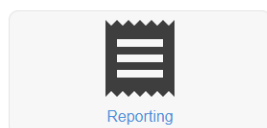

- The report will now appear in the menu for those groups of users.

Note: Reports can only be deleted by the groups that created them, otherwise the 'Delete' button will be greyed out.

4.6.2 Creating report from scratch

It is easier to create a new report from a saved report that is similar, but it is also possible to create a new report from scratch.

- On the landing page, select the 'Reporting' icon.

- In the 'Filter report results by' use:
 - the 'Report Type' menu and select 'Group Report'
 - the 'Groups' menu and select 'Oxford User'.

All reports on worker information need to be based on this template and group.

Filter report results by:

Report Type: Group Report

Groups: xOxford User

Site: -----

User Status: Active

3. In the 'Mark the template fields to be included in the report' select the 'Show' button next to the 'Oxford User' heading.
4. Select the fields to be added as columns to the report.

Mark the template fields to be included in the report:

Oxford User

Show all fields: ☐

Save Report Filters Generate Report

5. To add 'Work Type' field, select the 'Sub Work Type (nested)' check box.
6. In addition, filters can be added to the report using the 'Add Template Field Filter' button. These filters narrow the data selection depending on the criteria selected.

User Column Options:

Add Template Field Filter

Template Field: Any Start Date (Registration Details) in relative time period previous 6 Week(s) X

Note: Multiple filters can be added to a report using the AND/OR logic

4.7 General Report Tips

4.7.1 Group rows by user

Some reports default to show workers and their work registrations which means there can be multiple rows per worker (one for each work type). To see one row per worker, check the box 'Group rows by user'

Filter report results by:

Report Type: Group Report

Groups: xOxford User

Site: -----

User Status: Active

Group rows by user: ☒

4.7.2 Running Reports as Safety Office users

When running reports as a Safety Office user (*including admin/support user*), the results will include **any Safety Office/admin users** in the list of results. This is because Safety Office users are also 'Oxford Users' at the root level of 'University of Oxford'.

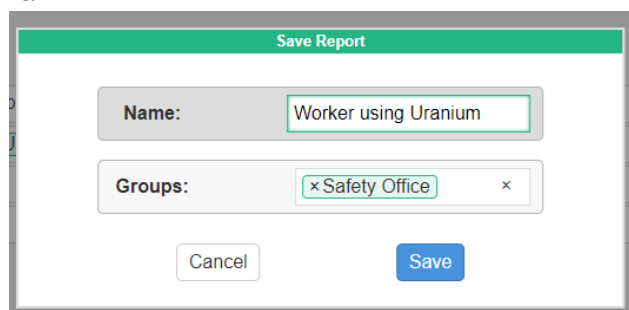

Root level allows Safety Office users to see the highest level and all sub levels of department data below that root level.

It is not possible to filter these Safety Office/admin/support users out of the reporting function by switching the site or specifying the Site within reporting. However, if the report is run and exported as a CSV file, they could be removed from the downloaded CSV file.

(S)RPS users **will not** see these Safety Office/support users when running their department reports as these root users are restricted from their sub-department views, handled by a permission.

4.7.3 Save reports to groups

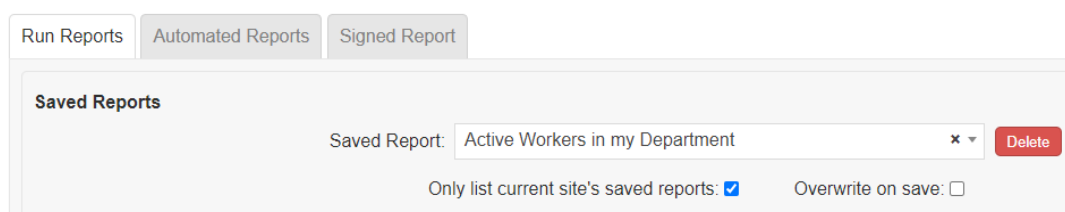

When saving a new report there is an option to save reports for certain groups only. For example, the Safety Office can select to save a report so only other Safety Office users can see it.

4.7.4 Only list current site's saved reports

When selecting Saved reports there is an option to 'Only list current site's saved reports'. Selecting this will only list those reports specifically saved to that site. For the Safety Office this setting is useful in filtering out departmental saved reports.

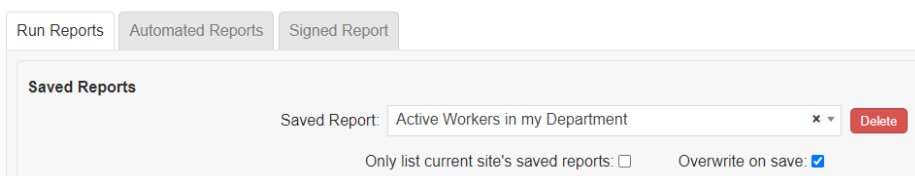

Reporting

4.7.5 Overwrite on save

If an existing saved report is amended, then the option is available to 'Overwrite on save' which will then update the original report. This will also allow for renaming the report. Use this with caution.

Reporting

4.7.6 Drilling down to worker records

When viewing reports on screen, you can select to drill down into worker records using the hyperlinks:

Workers with Unsealed Sources

Report No. & Name	2. Current University Classified Persons																														
Report Objective	To show all workers that are currently flagged as Classified within Odyssey																														
Audience	Safety Office, (S)RPS																														
How can I use this report?	1. To check which workers are flagged as Classified within the system 2. To check the departments that these workers have active work in 3. To check they all, have a last medical date recorded																														
Tips	4. Safety Office - Ensure that 'University of Oxford' is selected as 'Site' to include workers for the whole University																														
When should I run this report?	Monthly																														
Report Example:																															
Current University Classified Persons Oxford User <table><tr><th>Name</th><th>Email</th><th>Classified Start Date</th><th>Last Medical Date</th><th>Classified?</th><th>Host Department</th></tr><tr><td>Samuel Hill</td><td>testert.amm@gmail.com</td><td>29/04/2024</td><td>15/04/2024</td><td>Yes</td><td>Physics</td></tr><tr><td>Brendan O'Connor Test</td><td>brendan.oconnortest@it.ox.ac.uk</td><td>None</td><td></td><td>Yes</td><td>Physics; Physics</td></tr><tr><td>Alex Ramsay</td><td>alex.ramsay@versantphysics.com</td><td>None</td><td></td><td>Yes</td><td>None</td></tr><tr><td>Katelyn Ramsay</td><td>katelyn.waters@versantphysics.com</td><td>None</td><td>08/03/2024</td><td>Yes</td><td>Ashmolean Museum; Biology; Botnar; Biochemistry; SOMIL; Ashmolean Museum</td></tr></table> Displaying 4 entries Report generated on 10/06/2024		Name	Email	Classified Start Date	Last Medical Date	Classified? Report No. & Name	3. Current Workers Employing Department
Report Objective	To view workers and the department that they are employed by which can be different to the department in which they are doing radiation work (Host Departments)
Audience	Safety Office
How can I use this report?	1. SRPS can view the employing departments for all the workers that have their department as host department. This may be useful to identify those workers whose employing department is elsewhere in the University 2. Safety Office can select one or more 'Employing Departments' and get a report of all workers and where in the University they have active work
Tips	3. Safety Office users may need to select more than one 'Employing Department' as there can be multiple Physics departments for example
When should I run this report?	As required

Report Example:

Biochemistry - Current Workers Employing Department

Oxford User

Name	Employing Department	Position Type	Host Department	SRPS	Start Date	End Date
Miguel Alcubierre	Department of Biochemistry	Student	Biochemistry	Guest catherine.pears@bioch.ox.ac.uk	29/08/2019

Report No. & Name	4. Current Workers Host Department																																																																																																								
Report Objective	To understand which workers, have active work in a department																																																																																																								
Audience	Safety Office, (S)RPS																																																																																																								
How can I use this report?	1. To show all workers that are currently working in my department, the work type they are doing and the start and end dates of any work type registrations. Workers with more than one work registration will have more than one row in the report unless the ‘group rows by user’ check box is used.																																																																																																								
Tips	2. Safety Office - Ensure that ‘University of Oxford’ is selected as ‘Site’ to include workers for the whole University 3. Use the ‘Group rows per user’ to have one row per worker 4. To see which external institutes workers may be working at select to include the ‘External Institution’ check box Mark the template fields to be included in the report: Oxford User Show Oxford User Work Type Nested Fields ☐ Work Type ☐ Work Sub Type ☐ RPS ☒ Start Date ☒ End Date ☐ Radionuclides ☒ Location ☒ Further Details ☐ Enhanced Screening? ☐ Review Date ☐ External Institution Save Report Filters Generate Report																																																																																																								
When should I run this report?	As required

Report No & Name	5. Department Summary																																																																																																			
Report Objective	To have an overview and of who is working in each department and what they are working with (also includes those that are not working in primary dept). It also includes (S)RPS information																																																																																																			
Audience	Safety Office, (S)RPS																																																																																																			
How can I use this report?	1. To get an overview of workers and work types within a department 2. To understand if any workers are working with radiation in other radiation departments 3. To see information on workers (S)RPS where available																																																																																																			
Tips	4. RPS will only be listed for workers who have completed an electronic registration form (not migrated records) 5. Use the ‘Group rows per user’ to have one row per worker 6. Work records that have been end dated will be listed on the report. These can be removed by adding a Template Field Filter: Add Template Field Filter Template Field: Any End Date (Registration Details) is null X																																																																																																			
When should I run this report?	As required																																																																																																			
Report Example:

Report No & Name	6. Department Summary by ALM																																																																																																																																																									
Report Objective	To view a list of all workers with active work in a department and to see who their Academic Line Managers are																																																																																																																																																									
Audience	Safety Office, (S)RPS																																																																																																																																																									
How can I use this report?	1. Similar report to Department Summary but also lists the ALM for each radiation worker																																																																																																																																																									
Tips	2. Run this report if you would like to view the ALM information for each worker 3. Use the ‘Group rows per user’ to have one row per worker 4. You can sort by ALM or add a Template Field Filter to see workers with a specific ALM or multiple ALMs Add Template Field Filter Template Field: Academic Line Manager (Radiation Worker) is like matthew.higgins@bioch.ox X OR Template Field: Academic Line Manager (Radiation Worker) is like lyndsey.middleton@it.ox.ac X																																																																																																																																																									
When should I run this report?	As required																																																																																																																																																									
Report Example:

Report No. & Name	7. Gamma Irradiator Users
Report Objective	To understand which active workers, have a work type of Gamma Irradiator
Audience	Safety Office, (S)RPS
How can I use this report?	1. To list all active workers that are currently working with gamma irradiators in the University/Department 2. To check that all gamma irradiator users have completed the enhanced screening
Tips	3. Safety Office - Ensure that ‘University of Oxford’ is selected as ‘Site’ to include workers for the whole University 4. Report shows all work records with a work type ‘Gamma Irradiator’ even if they have an end date. You can sort by end date so that all active ones are listed first 5. If a worker has had a work type of ‘Gamma Irradiator’ which now has an end date, these records will still show if the worker is ‘Active’ 6. If a worker has had a work type of ‘Gamma Irradiator’ in another department these records will show on the report in the department the report is being run for
When should I run this report?	As required

Report Example:

Gamma Irradiator Users

Oxford User

Name	Email	Host Department	Work Sub Type	Start Date	End Date	Location	Enhanced Screening?
Akiko Adachi	akiko.adachi@oncology.ox.ac.uk	Oncology (ORCRB)	Gamma Irradiator	01/11/2023		Oncology (ORCRB)	Yes
Aws Al-Deka	aws.al-deka@wrh.ox.ac.uk	Surgical Sciences	Gamma Irradiator	09/12/2021		Surgical Sciences	Yes
Adele Alagia	adele.alagia@path.ox.ac.uk	Pathology Dunn School	Gamma Irradiator	22/06/2020		Pathology Dunn School	Yes
Ftoon Aljarbou	ftoon.aljarbou@lincoln.ox.ac.uk	Oncology (ORCRB)	Gamma Irradiator	12/08/2020		Oncology (ORCRB)	Yes
Francesca Amoroso	francesca.amoroso@oncology.ox.ac.uk	Oncology (RRI)	Gamma	07/03/2022		Oncology (RRI)	Yes

Report No. & Name	8. Gamma Leavers
Report Objective	To understand which workers have worked with Gamma Irradiators in the past
Audience	Safety Office, (S)RPS
How can I use this report?	1. To understand which workers have had a work type of Gamma Irradiators but that work type has now ended
Tips	2. Safety Office - Ensure that 'University of Oxford' is selected as 'Site' to include workers for the whole University 3. If a worker has had a work type of 'Gamma Irradiator' in another department these records will also show on the report in the department the report is being run for 4. Worker records will appear more than once if they have had multiple work records with a work type of 'Gamma Irradiator' 5. Sort by end date to view those who have most recently completed work with gamma irradiators at the top of the report 6. Use a filter on 'End Date' to view those records that have been ended in the last 6 months
When should I run this report?	As required

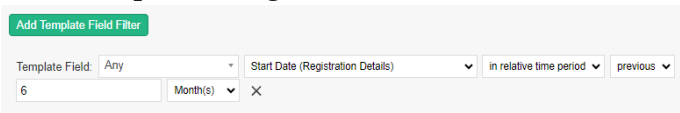

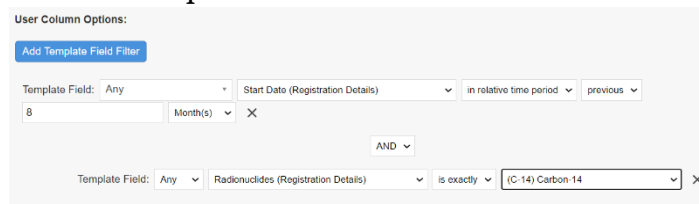

Report Example:

Gamma Leavers								
Oxford User

Report No. & Name	10. New Work Types
Report Objective	To show all work type records that have been added for a department in the previous month
Audience	Safety Office, (S)RPS
How can I use this report?	1. To get an overview of any work registrations that have been added in the previous month so they can be reviewed by the (S)RPS or Safety Office
Tips	2. The filter can be changed to show new records added in a different period (e.g. 6 months)  3. Report can be sorted by 'Start Date' to view the most recent new work types at the top of the report 4. Worker records can be opened from this report to view more details 5. Add a filter on 'Radionuclides' to identify any worker starting work with a particular radionuclide 
When should I run this report?	As required

Report Example:

Report No. & Name	11. Radionuclide Worker Summary																																																																																				
Report Objective	To understand what radioactive materials workers are using within the University. This information informs risk assessments (understanding the doses, potential for TLD wear and permit limits & conditions)																																																																																				
Audience	Safety Office, (S)RPS																																																																																				
How can I use this report?	1. To get a summary of all workers in a particular department that have a work type of sealed or unsealed sources 2. To get a summary of which radionuclides workers are using 3. To identify all workers in the University (or a particular department) working with a certain radionuclide, or work type																																																																																				
Tips	1. Report can be sorted by work type, radionuclide, start date 2. Add a report filter on sub work type to limit the results to only those working with ‘PET Radionuclides’ (for example) 3. Add a ‘Template Field Filter’ to identify those working with a specific radionuclide Template Field: Any Radionuclides (Registration Details) is exactly (H-3) Tritium × 4. Safety Office - Ensure that ‘University of Oxford’ is selected as ‘Site’ to include workers for the whole University																																																																																				
When should I run this report?	As required																																																																																				
Report Example:

Report No. & Name	12. Workers Using Radiation Generators																																																																
Report Objective	To understand what radiation generating equipment workers are using within each department and around the University. This information informs the annual report.																																																																
Audience	Safety Office, (S)RPS																																																																
How can I use this report?	1. To understand which workers, have a work type of ‘Radiation Generators’ in a particular department 2. To understand the location of the equipment they are using (if particle accelerator), and whether it is at an external institution																																																																
Tips	1. Safety Office - Ensure that ‘University of Oxford’ is selected as ‘Site’ to include workers for the whole University 2. Sort by ‘Work Sub Type’ to see all records for specific work type 3. Sort by ‘Start Date’ to see workers that have recently started working with radiation generators 4. Work records with end dates are included in the report. You can sort by the end date column to view all active records 5. Add a template filter on ‘Start Date’ to see all workers that have started work with radiation generators in a specific period Add Template Field Filter Template Field: AnyWork Type (Registration Details)is exactlyRadiation generators× AND Template Field: AnyStart Date (Registration Details)in relative time periodprevious3 Month(s)×																																																																
When should I run this report?	As required																																																																
Report Example:																																																																	
 Workers Using Radiation Generators Oxford User <table><tr><th>Name</th><th>Email</th><th>Host Department</th><th>Sub Work Type</th><th>Start Date</th><th>End Date</th><th>Location</th><th>Further Details</th></tr><tr><td>Shaun Bell</td><td>testerta.mmi@gmail.com</td><td>Physics</td><td>Electron microscope</td><td>28/05/2024</td><td></td><td>N/A</td><td>None</td></tr><tr><td>Lyndsey Middleton</td><td>lyndsey.middleton@it.ox.ac.uk</td><td>Physics</td><td>Particle accelerator</td><td>10/06/2024</td><td></td><td></td><td>None</td></tr><tr><td>Lyndsey Middleton</td><td>lyndsey.middleton@it.ox.ac.uk</td><td>Physics</td><td>Particle accelerator</td><td>10/06/2024</td><td></td><td></td><td>None</td></tr><tr><td>Katelyn Test</td><td>katelyntest@versantphysics.com</td><td>Ashmolean Museum; Biochemistry</td><td>Particle accelerator</td><td>30/05/2024</td><td></td><td>Botnar</td><td>None</td></tr><tr><td>Katelyn Test</td><td>katelyntest@versantphysics.com</td><td>Biochemistry</td><td>Particle accelerator</td><td>30/05/2024</td><td></td><td>Botnar</td><td>None</td></tr><tr><td>Tammi Williams</td><td>tammi.williams@it.ox.ac.uk</td><td>External Institutions; Biochemistry; Physics; Ashmolean Museum</td><td>Particle accelerator</td><td>31/05/2024</td><td></td><td></td><td>None</td></tr><tr><td>Tammi Williams</td><td>tammi.williams@it.ox.ac.uk</td><td>Physics</td><td>Particle accelerator</td><td>31/05/2024</td><td></td><td></td><td>None</td></tr></table> Displaying 4 entries Report generated on 11/06/2024 University of Oxford Radiation Management System		Name	Email	Host Department	Sub Work Type	Start Date	End Date	Location	Further Details	Shaun Bell	testerta.mmi@gmail.com	Physics	Electron microscope	28/05/2024		N/A	None	Lyndsey Middleton	lyndsey.middleton@it.ox.ac.uk	Physics	Particle accelerator	10/06/2024			None	Lyndsey Middleton	lyndsey.middleton@it.ox.ac.uk	Physics	Particle accelerator	10/06/2024			None	Katelyn Test	katelyntest@versantphysics.com	Ashmolean Museum; Biochemistry	Particle accelerator	30/05/2024		Botnar	None	Katelyn Test	katelyntest@versantphysics.com	Biochemistry	Particle accelerator	30/05/2024		Botnar	None	Tammi Williams	tammi.williams@it.ox.ac.uk	External Institutions; Biochemistry; Physics; Ashmolean Museum	Particle accelerator	31/05/2024			None	Tammi Williams	tammi.williams@it.ox.ac.uk	Physics	Particle accelerator	31/05/2024			None

Report No. & Name	13. Workers with Increased Exposure																																																															
Report Objective	To show all workers that have been flagged as having increased exposure to radiation and are therefore wearing dosimetry badges																																																															
Audience	Safety Office, (S)RPS																																																															
How can I use this report?	1. To show all workers in a department that have dosimetry badges 2. Safety Office can see all workers in the University that have dosimetry badges along with their host and employing departments and their SRPS's 3. Safety Office can check whether any TLD wearers have duplicate TLD names, and if so, they can edit the worker records from the report																																																															
Tips	4. Safety Office can sort the report by host department 5. Can view radiation departments Employing Departments in case of a dose incident																																																															
When should I run this report?	As required																																																															
Report Example:

Report Objective	To understand which workers are working with which unsealed sources within each department and in the University as a whole (this information informs the annual report)																																			
Audience	Safety Office, (S)RPS																																			
How can I use this report?	1. To understand which workers, have a work type of ‘Unsealed Sources’ in a particular department																																			
Tips	2. Safety Office - Ensure that ‘University of Oxford’ is selected as ‘Site’ to include workers for the whole University 3. Sort by ‘Work Sub Type’ to see all record for specific work type 4. Sort by Start Date to see workers that have recently started working with unsealed sources 5. Add a ‘Template Field Filter’ to identify those working with a specific radionuclide Template Field: Any Radionuclides (Registration Details) is exactly (H-3) Tritium X																																			
When should I run this report?	As required																																			
Report Example:																																				
Workers with Unsealed Sources Oxford User <table><thead><tr><th>Name</th><th>Email</th><th>Host Department</th><th>Sub Work Type</th><th>Start Date</th><th>End Date</th><th>Radionuclides</th></tr></thead><tbody><tr><td>Shaun Bell</td><td>testerta.mmi@gmail.com</td><td>Ashmolean Museum</td><td>PET radionuclides</td><td>28/04/2023</td><td>28/04/2024</td><td>N/A</td></tr><tr><td>Victor-Luis Capone Test</td><td>victor-luis.caponetest@it.ox.ac.uk</td><td>Biochemistry</td><td>PET radionuclides</td><td>28/05/2024</td><td>18/06/2024</td><td>(Ga-68) Gallium-68</td></tr><tr><td>Brendan O'Connor Test</td><td>brendan.oconnortest@it.ox.ac.uk</td><td>Physics</td><td>Iodinations</td><td>29/05/2024</td><td></td><td>N/A</td></tr><tr><td>Brendan O'Connor Test</td><td>brendan.oconnortest@it.ox.ac.uk</td><td>Physics</td><td>Iodinations</td><td>28/05/2024</td><td></td><td>N/A</td></tr></tbody></table> Displaying 3 entries Report generated on 11/06/2024		Name	Email	Host Department	Sub Work Type	Start Date	End Date	Radionuclides	Shaun Bell	testerta.mmi@gmail.com	Ashmolean Museum	PET radionuclides	28/04/2023	28/04/2024	N/A	Victor-Luis Capone Test	victor-luis.caponetest@it.ox.ac.uk	Biochemistry	PET radionuclides	28/05/2024	18/06/2024	(Ga-68) Gallium-68	Brendan O'Connor Test	brendan.oconnortest@it.ox.ac.uk	Physics	Iodinations	29/05/2024		N/A	Brendan O'Connor Test	brendan.oconnortest@it.ox.ac.uk	Physics	Iodinations	28/05/2024		N/A

Report No & Name	16. Identify Inactive Workers
Report Objective	To identify radiation workers that have no active work in a department and can therefore be made inactive within that department
Audience	Second line support
How can I use this report?	1. Second line support will use this report to remove site membership for radiation workers who no longer have active work in a department. This will remove their name from drop down lists and remove their access to that host department site within the Odyssey
Tips	2. It needs to be run for each department in turn by selecting the department name > Generate Report
When should I run this report?	Monthly
Report Example:	
	

Report No. & Name	17. Classified Overdue Medical
Report Objective	To show all workers that are currently flagged as Classified that have an overdue medical date
Audience	Safety Office
How can I use this report?	1. To check which workers are flagged as Classified where their 'Medical Due' date is in the past. 2. These workers can then be chased up and OH informed if necessary.
Tips	3. Safety Office - Ensure that 'University of Oxford' is selected as 'Site' to include workers for the whole University
When should I run this report?	Monthly
Report Example:	
	

Report No. & Name	18. Classified Medical Next 3 Months																								
Report Objective	To show all workers that have a medical due date within the next 3 months																								
Audience	Safety Office																								
How can I use this report?	1. To show all workers that have a medical due date within the next 3 months, failure to undergo a medical can lead to loss of classification status.																								
Tips	2. Select Medical Due column to sort by medicals due first 3. Safety Office - Ensure that 'University of Oxford' is selected as 'Site' to include workers for the whole University																								
When should I run this report?	Monthly																								
Report Example:																									
 Classified Medical Next 3 Months Oxford User <table><thead><tr><th>Name</th><th>Email</th><th>Medical Due</th><th>Classified?</th><th>Host Department</th><th>SRPS</th></tr></thead><tbody><tr><td>Jacob Hartman</td><td>jacob.hartman@versantphysics.com</td><td>21/04/2024</td><td>Unsure</td><td>None</td><td>None</td></tr><tr><td>Spencer Keashly-Warters</td><td>spencer.kw@versantphysics.com</td><td>30/05/2024</td><td>No</td><td>None</td><td>None</td></tr><tr><td>Tammi Williams</td><td>tammi.williams@it.ox.ac.uk</td><td>26/04/2024</td><td>Unsure</td><td>External Institutions; Ashmolean Museum; Biochemistry</td><td>None</td></tr></tbody></table> Displaying 3 entries Report generated on 11/04/2024 University of Oxford Radiation Management System		Name	Email	Medical Due	Classified? Report No. & Name	19. Department SRPS Summary																	
Report Objective	An overview of all departments and their SRPS's																	
Audience	Safety Office																	
How can I use this report?	1. Safety Office can run this to ensure that all the SRPS and department details are correct, and to get an overview of all current departments with radiation work.																	
Tips	2. Email addresses can be selected as additional columns by selecting that field in the Template Field Filter																	
When should I run this report?	As required																	
Dept SRPS Summary Department <table><tr><th>Name</th><th>Dept Code</th><th>SRPS</th></tr><tr><td>Ashmolean Museum</td><td>ED</td><td>Kelly Domoney</td></tr><tr><td>Biochemistry</td><td>AL</td><td>Catherine Pears</td></tr><tr><td>Biology</td><td>CB</td><td>Paul Jarvis</td></tr><tr><td>Biomedical Services</td><td>GV</td><td>Jordan Tanner</td></tr></table>				Name	Dept Code	SRPS	Ashmolean Museum	ED	Kelly Domoney	Biochemistry	AL	Catherine Pears	Biology	CB	Paul Jarvis	Biomedical Services	GV	Jordan Tanner
Name	Dept Code	SRPS

Biochemistry	AL	Catherine Pears																
Biology	CB	Paul Jarvis																
Biomedical Services	GV	Jordan Tanner																

Report No. & Name	20. Department RPS/SRPS System Users Summary																								
Report Objective	To show all system users that are defined as (S)RPS's within the system and their associated departments																								
Audience	Safety Office																								
How can I use this report?	1. To confirm who the (S)RPS's are for each department																								
Tips	2. This report can be run and then used with the 'Email report' option to send an email to all (S)RPS's																								
When should I run this report?	As required																								
Report Example:																									
Dept RPS/SRPS System Users RPS - Ashmolean Museum <table><tr><td>Username</td><td>Name</td><td>Email</td><td>Permits</td></tr><tr><td>kelly.domoney@ashmus.ox.ac.uk</td><td>Guest kelly.domoney@ashmus.ox.ac.uk</td><td>kelly.domoney@ashmus.ox.ac.uk</td><td>None</td></tr><tr><td>alex.ramsay@versantphysics.com</td><td>Alex Ramsay</td><td>alex.ramsay@versantphysics.com</td><td>None</td></tr></table> Displaying 2 entries SRPS - Ashmolean Museum <table><tr><td>Username</td><td>Name</td><td>Email</td><td>Permits</td></tr><tr><td>kelly.domoney@ashmus.ox.ac.uk</td><td>Guest kelly.domoney@ashmus.ox.ac.uk</td><td>kelly.domoney@ashmus.ox.ac.uk</td><td>None</td></tr><tr><td>alex.ramsay@versantphysics.com</td><td>Alex Ramsay</td><td>alex.ramsay@versantphysics.com</td><td>None</td></tr></table>		Username	Name	Email	Permits	kelly.domoney@ashmus.ox.ac.uk	Guest kelly.domoney@ashmus.ox.ac.uk	kelly.domoney@ashmus.ox.ac.uk	None	alex.ramsay@versantphysics.com	Alex Ramsay	alex.ramsay@versantphysics.com	None	Username	Name	Email	Permits	kelly.domoney@ashmus.ox.ac.uk	Guest kelly.domoney@ashmus.ox.ac.uk	kelly.domoney@ashmus.ox.ac.uk	None	alex.ramsay@versantphysics.com	Alex Ramsay	alex.ramsay@versantphysics.com	None

Report No. & Name	21. Work Registration changes requiring approval
Report Objective	Show all worker records that have been changed and are awaiting Safety Office approval.
Audience	Safety Office
How can I use this report?	1. To show any records awaiting Safety Office approval. Although system alerts are sent, if multiple Safety Office are working through these then this report can ensure that all tasks have been completed
Tips	2. Add additional ‘Statuses’ to see previously ‘Approved’ or ‘Rejected’ changes Filter report results by: Report Type: Staged User Template Field Changes Site: Author: Reviewer: Status: ⌵ Awaiting Review ⌵ Approved ⌵ Rejected ⌵
When should I run this report?	As required

Report Example:

Work Registration Changes Requiring Approval

Author	Date Submitted	Target	Status	Reviewed By	Approval Date	Rejected Date
SRPS User - Chem/BioChem	04/04/2024 11:12 AM	Unknown; view user’s profile	Awaiting review			
RPS User - Chem/BioChem	12/04/2024 6:40 PM	Unknown; view user’s profile	Awaiting review			
SRPS User - Chem/BioChem	06/06/2024 7:55 AM	Unknown; view user’s profile	Awaiting review			
SRPS User - Chem/BioChem	06/06/2024 8:02 AM	Unknown; view user’s profile	Awaiting review			
RPS User - Chem/BioChem	10/06/2024 10:59 PM	Unknown; view user’s profile	Awaiting review

5.0 System Admin and Set up

5.1 Logging into Odyssey

Odyssey is a cloud-based system and is accessed via an internet browser such as Microsoft Edge (Chrome or Firefox also supported). Odyssey is accessed via Single Sign-on (SSO), password and authentication.

To log into Odyssey, users must have an Oxford Single Sign-On (SSO) account and be a registered radiation worker.

1. Select [Odyssey - Oxford's Radiation Management System](#) link.
2. On the Single Sign-On page, enter hen signing in to your SSO account, provide your username in the format abcd1234@ox.ac.uk and SSO password
3. A two-digit number will be displayed on screen, then Microsoft Authenticator will prompt for this
4. You will then be successfully signed in to Odyssey – RMS.

5.2 Keeping Department Details up to date

SRPS? Addresses...

5.3 Adding a signature

An electronic signature can be saved which means that signing registration forms is a more efficient process. This is useful for (S)RPS and Safety Office users.

Note: This is not available for ALMs who will need to sign the forms each time

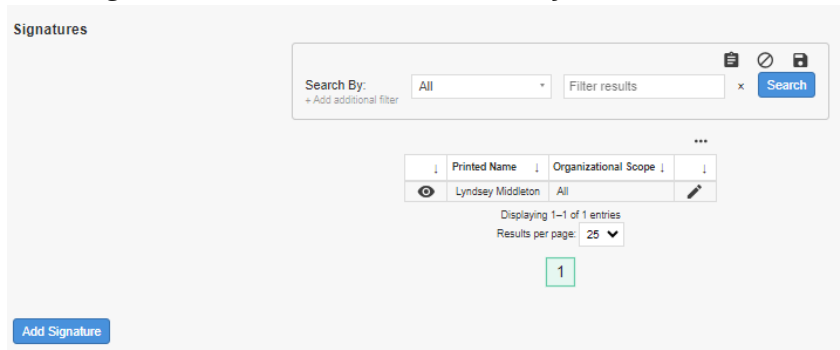

To create an electronic signature:

1. Go to 'My Account' and select the 'Signatures' tab.
2. Select 'Add Signature'.
3. Either draw a signature in the box or upload a signature file and add your name in 'Print Name'. Then 'Save'.

Add Signature

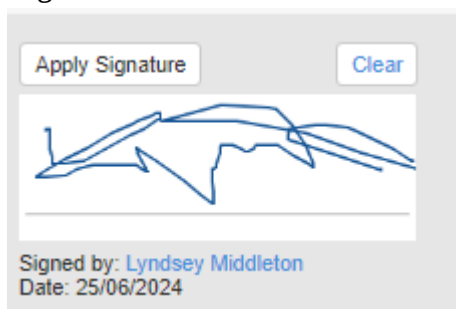

The screenshot shows the 'Add Signature' form. At the top, there is a 'Print Name' field with the text 'Lyndsey Middleton' and a 'REQUIRED' label. Below this is the 'Signature' section, which includes a 'Draw or upload' label. There are two options: 'Draw Signature' with a large empty box for drawing, and 'Upload Image' with a 'Choose file' button and 'No file chosen' text. A 'Clear' link is next to the drawing box. Below the signature options is the 'Scope' section, labeled 'Organizations where this signature may be used'. It contains an 'Organizations' field with a dropdown arrow. At the bottom of the form are 'Cancel' and 'Save' buttons.

4. Your signature has now been added to your account.

Note: You can delete a signature by selecting the pencil icon and selecting 'Delete'.

5. The signature can then be applied by selecting the 'Apply Signature' button on the registration forms.

5.4 System Accessibility

Odyssey is a web-based system and therefore accessibility options are handled by the users' web browser.

5.4.1 Current Accessibility Issues

We acknowledge that there are several areas where Odyssey - RMS does not fully meet the accessibility standards:

1. **Colour Contrast:** Some text and background colour combinations do not meet the minimum contrast thresholds, making it difficult for users with visual impairments to read the content.
2. **Unique Attributes:** Certain attributes across our web pages are not unique, which may cause issues for users relying on assistive technologies.
3. **Form Elements:** Some form elements are missing appropriate labels, which can make navigation and form submission challenging for users using screen readers.
4. **Link Identification:** Several links are distinguishable only by colour. This reliance on colour makes it difficult for colour blind users and those using assistive devices to identify these links easily.

5.4.2 Ongoing Improvements

Versant, the supplier of Odyssey, are actively working on resolving these issues as part of their product pipeline to ensure the platform is accessible to all users.

If you encounter any accessibility barriers or have suggestions on how we can improve, please contact Health and Safety Systems Support (see 6.0 System Support).

Your feedback is vital in helping enhance the accessibility of Odyssey.

6.0 System Support

6.1 System Guidance

Online support for using Odyssey is available through the Safety Office web pages:

[Registration of radiation workers | Safety Office \(ox.ac.uk\)](#)

[Odyssey guidance | Safety Office \(ox.ac.uk\)](#)

There is variety of resources including short videos.

The in-system Help will direct you to the [Ionising radiation | Safety Office \(ox.ac.uk\)](#) web page.

1. Select the menu in the top right corner with your name on it and select 'Help'

6.2 Helpdesk Contact Details

If you require further support or have a question please contact Health and Safety Systems Support using the email address:

hssystemssupport@safety.ox.ac.uk

6.3 I sent a worker registration form instead of work type form

If you have sent the worker registration form to a worker, and they already have a work registration in your department you do not need to cancel it.

The form can be processed as usual and the system will still update their user profile with the work type details from that form. It just means the worker will be required to complete their section again, which is not necessary when using the work type form.

6.4 The external institution the worker is wanting to register with is not listed

If the external institute where your worker is working isn't listed, you can save and close the Worker Registration or Work Type form.

Contact the Safety Office to discuss the requirement. The Safety Office can then authorise the additional external institute being added to the system.

6.5 The radionuclide(s) the worker will be working with are not listed

If the radionuclide(s) your worker is working with are not listed, you can save and close the Worker Registration or Work Type form.

Contact the Safety Office to discuss the requirement. The Safety Office can then authorise the additional radionuclide(s) being added to the system.

7.0 Training Environment (Sandbox)

A 'sandbox' environment has been made available to all SRPS and RPS users.

It can be accessed here: [Odyssey - Sandbox](#).

The 'sandbox' environment has a different colour scheme to distinguish it from the 'live' system.

It will evolve with later phases of the project when permissions are added for permits, machines and equipment.

For Workers Go Live, the 'sandbox' is built to let you experiment and create false records without risking system integrity. It mimics the 'live' (Production) environment with the following exceptions:

1. It does not send emails (sending a worker's registration form will not trigger an email to the worker).
2. It has a limited test data set of workers.
3. It is not a fully scaled 'live' (Production) environment, so on occasion it might appear slower to run reports as an example.

Note:

Please ensure that if you're initiating a worker's registration form for an actual worker it is done so on the correct environment as it is not possible to copy this data over.

The Workers Module Sandbox is designed to provide RPSs and SRPSs with a safe environment to learn and become familiar with Odyssey. It also allows SRPSs to train RPSs in using the system effectively.

To help you get acquainted with the features of the Workers Module, use the following scenarios to guide your training (you can run through these tasks as many times as necessary):

7.1 Scenario 1 – New System

You're signing into a new system and need to familiarise yourself with the main features you're going to use, as well as set up your system signature.

1. Select the My Account icon from the dashboard
2. Look at the tabs visible
3. Select the signatures tab to set up your signature (See 5.3 Adding a signature)
4. Upload and save an image
5. Draw and save
6. Use the Odyssey logo to navigate back to the landing page

7.2 Scenario 2 – The Worker Registration form

A new worker is due to start, and you need to send a worker registration form.

1. Initiate the worker registration form and pre-fill some information (see 2.1 Registering a new radiation worker)
2. The form should be sent to the RPS you are training
3. Fill in the RPS and SRPS names
4. RPS – the RPS you are training
5. SRPS – yourself
6. ALM – yourself
7. Safety Office – Contact the Project team to progress the form

This should allow you to experience the workflow from start to finish.

7.2.1 Check progress and fill in a worker registration form

It has been a while since you sent the registration form, and you want to check its progress

1. Select the Registration Progress icon (see 2.5 Viewing registration progress)

You can see that the worker has completed their stage of the form. You can now complete your part

2. Open the form to complete and submit it.

7.2.2 Terminating a worker registration form

The radiation related work on the form is no longer required, so you need to terminate the form

1. You will need to initiate a worker registration form and progress it to the RPS/SRPS stage (Scenario 2)
2. Terminate the worker registration form, providing a justifiable reason

7.3 Scenario 3 – The work type registration form

A worker in your department's research has progressed and they now need to work with N-13 and F-18.

1. Send a Work Type Registration form
2. Pre-fill the RPS and SRPS names before submitting the form
3. RPS - the RPS you are training
4. SRPS - yourself
5. ALM - yourself
6. Safety Office - Contact the Project team to progress the form

7.3.1 Entering an end date for the work type

The worker has now ended their work with N-13 so you will need to add an end date.

1. Go to My Account
2. Use the 'Switch to other user profile' function to find the worker and update the end date.

7.4 Scenario 4 – Reporting

You want to run a report that shows who is currently working in your department and send it to yourself as a PDF.

1. Select Reporting from the landing page
2. Select the appropriate report from the list of saved reports

Explore some of the other saved reports in the system and play around with the filtering options to create new reports.

Use these scenarios to give structure when training but also explore the system at your own leisure, using the sections of this guidance document.

8.0 Document History

Change History/Review

Date	Version	Author	Summary of the change
7 June 2024	0.1	ITS877 Project Team	Original system guide created for go live of the worker module (project phase 1)
15 August 2024	1.0	Paul Kayente (URPO)	Reviewed and approved
16 September	1.1	ITS877 Project Team	Updates following review of feedback received
1 October	1.1	ITS877 Project Team	Update to Section 2.7 Appointing RPS and SRPS
